Fort Rucker, AL 36362

RE: **UIC PERMIT NUMBER ALSI9923007**
Christian Road Jet Fuel Spill Site
Christian Road
Fort Rucker, Dale County, Alabama

Dear Mr. Ryan Arne:

A **Draft** copy of the permit is enclosed for your review.

If you have any comments on the draft permit, please submit them to this office **within the next thirty (30) days** so that any issues of concern might be resolved.

If you have any questions, please call me at (334) 271-7844.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jeff Aul".

Jeff Aul

Enclosure: Draft UIC Permit ALSI9923007

UNDERGROUND INJECTION CONTROL PERMIT

PERMITTEE: Fort Rucker Directorate of Public Works

FACILITY/LOCATION: Christian Road Jet Fuel Spill Site
Christian Road
Fort Rucker, Dale County, Alabama
Latitude: N 31.372297/ Longitude W -85.728181

PERMIT NUMBER: ALSI9923007

INJECTION WELL CLASS: Class V

SOURCE OF POLLUTANTS: Injection of activated carbon, calcium sulfate dehydrate, and electron acceptors solutions to aid in the remediation of existing contamination.

In accordance with and subject to the provisions of the Safe Drinking Water Act, as amended, 42 U.S.C. §§ 300f-300j (the "SWDA"), the Alabama Water Pollution Control Act, as amended, Code of Alabama 1975, §§ 22-22-1 to 22-22-14, (the "AWPCA"), the Alabama Environmental Management Act, as amended, Code of Alabama 1975, §§ 22-22A-1 to 22-22A-15, and rules and regulations adopted thereunder, and subject further to the terms and conditions set forth in this permit, the Permittee is hereby authorized to construct and operate injection well(s) of the above-described class.

ISSUANCE DATE:

EFFECTIVE DATE:

EXPIRATION DATE:

DRAFT

PART I Authorization to Operate

- A. The permittee is authorized to operate Class V Injection Wells, at the facility described in the permit application and in the cover page of this permit, in accordance with the provisions set forth in this permit.
- B. This permit and the authorization to inject shall remain in effect until the expiration date stated on the cover page of this permit. If the permittee desires to continue injection past the expiration date of this permit, the permittee shall request a permit reissuance at least 180 days prior to expiration of this permit.

PART II Construction Requirements**A. Injection Well Requirements**

The permittee shall inject only the activated carbon, calcium sulfate dehydrate, and electron acceptors solution as described and approved in the permit application.

B. Modifications

Approval of the Alabama Department of Environmental Management (ADEM) shall be obtained prior to modification of any injection well activity. Modification shall mean any action that will change the nature of the injection activity, the methods of monitoring injection, or will result in injection of a fluid not specifically authorized by this permit.

C. Operation

The injection wells shall function properly. Should the wells not function properly the permittee shall take corrective action, to include cessation, as required by the ADEM.

PART III Monitoring and Operating Requirements**A. Injection Fluid**

The permittee shall not inject any substance that is defined as hazardous or toxic by Federal or State laws or regulations or any substance not identified in the application for this permit. The injection of substances other than those identified in the permit application is prohibited. The permittee shall provide a means for confirmatory sampling of the injection material, should the need arise.

B. Monitoring Wells

1. The permittee shall monitor and limit groundwater in accordance with Appendix A. The injection activity shall not result in the exceedance of any established MCL in groundwater outside the areas of contamination.
2. The groundwater monitoring regime must be sufficient to detect any adverse effects to groundwater quality due to the injection activity. The Department may change the sampling requirements if the sampling data indicate a need to do so.
3. Monitoring wells shall be sampled for background water quality prior to injection.

PART IV Records, Reports, & Submittals

A. Records

1. The permittee shall retain all records concerning the data used to complete the permit application, the operation of the wells, and the nature and composition of pollutants injected; to include records of the calibration of instruments, meters and gauges, quality control records, and recordings from continuous monitoring instrumentation; until at least three years after the injection activity ends.
2. When requested by the ADEM, the permittee shall deliver copies of any of the records maintained in accordance with this permit.

B. Reports

1. The permittee shall submit an injection report to the ADEM no later than (30) days after the injection and shall include the information listed below:
 - a) The date of the injection.
 - b) The amount of solution injected.
 - c) The location(s) of the injection.
2. The permittee shall submit quarterly groundwater monitoring reports to the ADEM no later than (30) days after the end of each quarterly period. The first report submitted shall include the results of the baseline sampling event.
3. Injection reports and groundwater monitoring reports must be submitted electronically via the Department's AEPACS system (<https://adem.alabama.gov/aepacs>). To participate in this program, the appropriate representatives of the permittee must establish an AEPACS account and request access to this site.
4. The permittee shall report to the ADEM any of the following:
 - a) Any planned action which will change the use of the injection wells, will result in injection of a fluid different from that authorized by this permit, will change the method of operations of any injection well, or will change the method of the monitoring of well operations or injected fluids.
 - b) Any planned transfer of ownership of all or part of the permitted facility.
 - c) Any relevant facts of which the permittee becomes aware which should have been submitted in a permit application and any corrections to data previously submitted in a permit application.
5. Other Submittals

Studies, engineering reports, plans and specifications, plugging and abandonment plans, logging reports, and other technical documents submitted to comply with this permit shall be prepared by or under the supervision of qualified persons defined by the underground injection control (UIC) regulations of the ADEM.

PART V Plugging and Abandonment

- A. The permittee shall perform any abandonment and closure actions that may be required by the ADEM to remove a threat to groundwater quality or to the health of persons which is caused by the injection activity.
- B. Upon the end of use for each injection well, the permittee shall plug and abandon each well in a manner which protects each USDW from pollution by surface water and which prevents the movement of any pollutant or formation fluid from one USDW to another or from one formation to another and which isolates the injection zone.

PART VI Permit Modification, Revocation, Suspension, and Termination

- A. The ADEM may impose emergency additional conditions to this permit when necessary to protect waters of the state from pollution. These conditions may include suspension of the permit to inject and shall remain in effect until the permit is modified, revoked, suspended or terminated in accordance with the UIC regulations of the ADEM.
- B. Non-emergency permit modification, revocation, suspension, and termination actions shall be accomplished in accordance with the ADEM Administrative Code Rule 335-6-8.

PART VII General Provisions

- A. The permittee shall comply with all provisions of the UIC regulations of the ADEM and shall comply with all provisions of this permit and shall reduce or halt injection if needed to maintain compliance with the permit and regulations.
- B. The permittee shall comply with all applicable Federal and State hazardous waste management regulations.
- C. The permittee shall allow members of the ADEM staff to:
 - 1. Access property and records of the permittee for purposes of inspection.
 - 2. Collect samples of the injected fluids, process and wastewater streams associated with the permitted injection wells.
 - 3. Collect samples from any monitoring wells.
 - 4. Obtain copies of records upon request.
- D. The permittee shall immediately take all reasonable steps to minimize or correct any adverse environmental impact resulting from the operation of the permitted injection wells.
- E. This permit does not convey any property rights of any sort, or any exclusive privilege.
- F. The filing of a request by the permittee for a permit modification, revocation, and reissuance, or termination, or a notification of planned changes or anticipated noncompliance does not stay any permit condition.
- G. Any noncompliance with this permit constitutes a violation of the Alabama Water Pollution Control Act and/or the underground injection control regulations and is grounds for enforcement action such as permit termination, revocation, modification; or denial of a permit renewal application.

- H. All provisions of the ADEM Admin. Code Rule 335-6-8-.12 are incorporated as terms and conditions of this permit by reference.
- I. Injection into waters of the state, which in this case is groundwater, in accordance with this permit shall not result in the exceedance of any primary or secondary Maximum Contaminant Level (MCL) in groundwater as established by the Environmental Protection Agency. Injection into groundwater, in accordance with this permit shall not result in a violation of a surface water quality standard.

DRAFT

APPENDIX A

Groundwater monitoring wells MW-5 and MW-6 shall be sampled prior to startup and then as specified below:

<u>EFFLUENT CHARACTERISTIC</u>	<u>UNITS</u>	<u>DISCHARGE LIMITS</u>	<u>MONITORING REQUIREMENTS</u>	
			FREQUENCY	SAMPLE TYPE
pH	S.U.	Report	Quarterly	Grab
Nitrate	mg/L	10	Quarterly	Grab
Sulfate	mg/L	Report	Quarterly	Grab

DRAFT

ADEM Permit Rationale

Date: September 27, 2021

Prepared by: Jeff Aul

Permittee Name: Fort Rucker Directorate of Public Works

Facility Name: Christian Road Jet Fuel Spill Site

Location: Christian Road
Fort Rucker
Dale County, Alabama
Lat: N 31.372297/Long.W -85.728181

UIC Permit Number ALSI9923007

Draft Permit is: Initial Registration / New Use

Injection Description: from

Discussion: Standard permit drafted.

1. No hazardous injection
2. Sampling point required
3. No sampling required
4. No BMP's required
