Dear Mr. Alex Chavers:

Southern Company Services (SCS), owner and operator of the Power Systems Development Facility (PSDF), hereby notifies you in accordance with Part I.D.2. of NPDES Permit No. AL0069272 that all wastewater flows from all point sources identified in Part I.A. of that permit have permanently ceased. SCS is therefore requesting that coverage under the current NPDES permit be terminated. The operation of the PSDF has ceased and the facility itself has been largely demolished. Therefore, Permit No. AL0069272 is no longer needed. Certain stormwater discharges flow through outfalls identified in Permit No. AL0069272; however, these discharges are properly regulated under stormwater permit No. ALR10BFAE.

Please call me at (205) 670-5919 or Randy Pate at 205-670-5981 if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads 'John W. Northington'.

John W. Northington  
Director / National Carbon Capture Center
