The Very Small Quantity Generator

Information presented in this fact sheet is intended to provide a general understanding of the regulatory requirements governing very small quantity generators of hazardous waste. This information is not intended to replace, limit, or expand upon the complete regulatory requirements found in Division 14 of the ADEM Administrative Code.

WHAT IS A VERY SMALL QUANTITY GENERATOR?

Generators of hazardous waste are divided into three categories based upon the quantity of hazardous waste generated. If you generate less than 220 pounds of hazardous waste and no more than 2.2 pounds of acute hazardous waste in a calendar month, you are a Very Small Quantity Generator (VSQG) for that month. The requirements that apply to you as a VSQG are found primarily in ADEM Admin. Code r. 335-14-3-.01(4); where appropriate, that rule references other parts of ADEM Admin. Code Division 14. See ADEM’s fact sheet, Hazardous Waste: The Basics, for additional general information regarding generators of hazardous waste.

WHAT IS A HAZARDOUS WASTE DETERMINATION?

A hazardous waste determination is the process of identifying whether any of the wastes you generate either exhibit a characteristic of hazardous waste or are found on one or more of the lists of hazardous waste. For details on how to make this determination, refer to ADEM Admin. Code r. 335-14-3-.01(2), as well as ADEM's fact sheet, Hazardous Waste Determination.

SHOULD I HAVE AN EPA IDENTIFICATION NUMBER?

As a VSQG, you are not required to obtain an EPA Identification Number; however, you may obtain one, if desired, by submitting ADEM Form 8700-12 (Notification of Regulated Waste Activity) in accordance with ADEM Admin. Code r. 335-14-3-.01(8). If you have an active EPA Identification Number, an annual notification will be required based on the schedule found at ADEM Admin. Code r. 335-14-1-.02(1)(a).

If you have an active EPA Identification Number and wish to stop using it, you must send a letter to ADEM requesting that the number be deactivated. The deactivated number can not be used for any purpose after that point.

WHAT ARE MY TIME AND QUANTITY ACCUMULATION LIMITS?

You are allowed to accumulate your hazardous waste on-site without having either a permit or interim status with amount of time those wastes are accumulated; however, the following quantity limits do apply:

- If you accumulate more than 2,200 pounds of hazardous waste on-site at any one time, you must manage it in accordance with the Small Quantity Generator (SQG) rules found at ADEM Admin. Code r. 335-14-3-.01(6).
- If you accumulate more than 2.2 pounds of acute hazardous waste, or more than 220 pounds of residues from a cleanup of acute hazardous waste, on-site at any one time, you must manage it in accordance with the Large Quantity Generator (LQG) rules found at ADEM Admin. Code r. 335-14-3-.01(7).

If you experience a one-time event that would place you in a higher generator status, you may handle that waste under the alternative standards for episodic generation found at ADEM Admin. Code r. 335-14-3-13. These standards allow you to manage waste from a one-time event without changing your generator status.

HOW SHOULD I MANAGE MY HAZARDOUS WASTE CONTAINERS?

While there are no specific regulatory requirements regarding the management of your containers under most circumstances, suggested best management practices include:

- Use containers that are in good condition and compatible with the waste;
- Keep containers closed, except when adding or removing waste;
- Mark each container with the words “Hazardous Waste” and a description of the waste (“spent solvents” for instance);
- Inspect the area where containers are stored routinely, looking for leaks or deterioration; and
- Handle and store containers in a manner that will prevent leaks.

If you accumulate hazardous waste on-site, you should operate in a way that minimizes the possibility of fire, explosion, or spills. Also, you should be prepared to respond to emergency situations at your site. Suggested emergency preparedness actions include:

- Provide a way for employees to summon help, especially if they are working alone;
• Provide an external communication device capable of summoning local emergency assistance;
• Maintain fire extinguishers and spill control equipment so that they are available and functional when you need them;
• Maintain adequate space to facilitate effective and timely emergency response – keep walkways and exits clear;
• Ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures; and
• Post information next to the telephone regarding the location of emergency response equipment and how to contact the fire department.

You should respond to emergencies by taking appropriate immediate control measures; contact appropriate response authorities; and notify the Alabama Emergency Management Agency (800-843-0699, 24 hours per day), the National Response Center (800-424-8802, 24 hours per day) and ADEM (334-271-7700, 8:00 a.m. to 5:00 p.m. Monday through Friday), if a release has reached surface water or could threaten human health or the environment outside your site.

WHAT SHOULD I DO WHEN SHIPPING WASTE OFF-SITE?
You may prepare your waste for shipment off-site or you may rely on a transporter to do so. In either case, you must ensure that the waste you ship off-site is properly prepared for shipment before leaving your site. This includes proper packaging, labeling, marking, and placarding of waste shipments to meet the requirements of the United States Department of Transportation regulations in 49 CFR Parts 172 to 179, where applicable.

While ADEM regulations do not require that you prepare a uniform hazardous waste manifest in order to ship your hazardous waste, transporters; treatment, storage, or disposal facilities; or other states (if the waste will be sent to a facility in another state) may require you to do so. You should contact your transporter; treatment, storage, or disposal facility; and the applicable state environmental agency to answer to this question prior to shipment of your waste off-site.

WHAT RECORDS AM I REQUIRED TO KEEP?
You must keep records of any test results, waste analyses, or other determinations made in accordance with ADEM Admin. Code r. 335-14-3-.01(2) [hazardous waste determination] for at least three years from the date the waste was last sent for treatment, storage, or disposal.

ARE THERE ANY SPECIAL REQUIREMENTS REGARDING DISPOSAL OF MY WASTE?
Your hazardous waste must be either treated or disposed in an on-site facility or delivered to a treatment, storage, or disposal facility that:

• Is permitted to manage hazardous wastes by the State in which it is located;
• Has qualified for interim status to manage hazardous waste in the State in which it is located;
• Is permitted, licensed, or registered by a State to manage municipal solid waste;
• Is permitted, licensed, or registered by a State to manage non-municipal non-hazardous waste;
• Beneficially uses or reuses, or legitimately recycles or reclaim waste; or
• In the case of universal waste, is a universal waste handler or destination facility subject to the appropriate requirements; or
• Is a large quantity generator under the control of the same “person” as the very small quantity generator

Note: All waste destined for disposal in a commercial hazardous waste disposal facility located in the State of Alabama must have prior approval for disposal in accordance with ADEM Admin. Code r. 335-14-3-.08. Also, all industrial waste destined for disposal in a commercial solid waste disposal facility located in the State of Alabama must have prior approval for disposal in accordance with ADEM Admin. Code r. 335-13-4-.21(1)(c). For details on this procedure, refer to the appropriate rule, as well as ADEM’s fact sheet, Waste Disposal Approvals.

WHERE CAN I GET ADDITIONAL INFORMATION?
U. S. Environmental Protection Agency (http://www.epa.gov)
ADEM Guidance (http://www.adem.alabama.gov/programs/land/guidanceReports.cnt)

Telephone:
ADEM Ombudsman • • • • • • • • • • • • • • • • 800-533-ADEM (2336)
Hazardous Waste Compliance Inspectors • • • • • • • 334-270-5637

TIP
To protect the environment and reduce your regulatory requirements, minimize the amount of waste you generate.
