

KIDS CAN HELP RECYCLE

You can help mom and dad separate recyclable items from your garbage at home. Look in the yellow pages of the phone book or contact your local recycling center to see what items are recycled in your community. It's important to recycle, and here are some reasons why.

SAVES ENERGY

Making products from recycled materials uses less energy than making products from new materials.

REDUCES POLLUTION

Manufacturing with recycled material is cleaner and less harmful.

CONSERVES NATURAL RESOURCES

Every ton of recycled paper produced saves about 17 trees and 7,000 gallons of water.

REDUCES AMOUNT OF LAND NEEDED FOR LANDFILLS

When fewer materials are thrown away, the amount of waste that ends up in landfills is reduced and less space is needed for future disposal sites.

Help Conserve Our Natural Resources, Recycle!

This color sheet was printed with funds provided by the Alabama Department of Economic and Community Affairs - Science, Technology and Energy Division.
