FEE SCHEDULE C (Continued)

EXPLANATORY NOTES

- (1) Fee applies to initial unit (design) of a given type at a facility.
- (2) Fee applies to additional designs and/or units of the same type unit or process at a given facility.
- (3) Refer to rule 335-14-8-.04(3) for classification of minor mods. Each separate mod request requires a separate fee payment. Multiple changes to a permit consolidated in one mod request will be charged a single fee for each applicable unit. (e.g., A facility permitted for container storage and a landfill who requests modifications to both units will be charged the appropriate fee for each unit.)
- (4) Refer to rule 335-14-8-.04(2) for classification of major mods. Each separate mod request requires a separate fee payment. Multiple changes to a permit consolidated in one mod request will be charged a single fee for each applicable unit. (e.g., A facility permitted for container storage and a landfill who requests modifications to both units will be charged the appropriate fee for each unit.)

FEE SCHEDULE C

- (5) If clean closure is not attained and a post-closure permit is required, then the cost is credited to the post-closure permit fee. Closure plan fees shall be charged per unit to be closed.
- (6) Fees for miscellaneous units (rule 335-14-5-.24) and for other units not specifically listed shall be assessed based on the fees established for the permit type most closely analogous to the activity in question. For example, an open burning/open detonation unit would be assessed fees for thermal treatment; a stabilization unit would be assessed fees for treatment; etc.
- (7) Fee applies to all treatment units except land treatment units and thermal treatment units.
- (8) Fee applies to incinerators, boilers, industrial furnaces, and other thermal treatment units.
- (9) Fee applies to each hazardous waste management unit which is subject to post-closure permitting requirements. Multiple units which are closed under a single (common) cap will be charged the fee for a single post-closure unit. Fee also applies to certification of post-closure plans required by order.
- (10) Fee applies to permits which include solid waste management unit (SWMU) requirements (pursuant to ADEM Admin. Code rs. 335-14-5-.06(12), 335-14-5-.19, 335-14-8-.02(5) (d), but do not include regulated hazardous waste management unit requirements. This fee applies to facilities which have completed all closure and post-closure requirements for regulated hazardous waste management units, but do not complete all SWMU requirements. Fee applies to modifications which are not unit specific (i.e., mods not affecting the unit type, design, or configuration). Examples: contingency plan changes, transfer of ownership, personnel training plan changes, changes to groundwater monitoring system, etc.
- (11) Additive fees are levied in addition to base application fees as applicable. Total fees due are sum of base application fees and additive fees applicable to a given facility/application.
- (12) Initial fee applies to the first contaminant plume at a facility. The additional unit fee will be charged for each additional, separate plume at the same facility.
- (13) Fee applies to each trial burn performed.
- (14) Initial fee applies to the first investigation at a facility imposed by the Department under ADEM Admin. Code r. 335-14-5-.06(12). The fee is applicable at the time the investigation is imposed. The additional unit fee will be charged for each additional, separate investigation at the same facility (e.g. an investigation of a newly discovered area of contamination). This fee is also applicable to any investigation required by statute or order that is designed to

FEE SCHEDULE C

assess the extent of contamination at a facility or a single unit within a facility.

- (15) Fee applies to each separate corrective action program proposal or corrective measures implementation plan submitted. CAPs which integrate multiple technologies (e.g., pump and treat, biological, chemical, physical, etc.) into a single system shall be charged a single fee for the system. Facilities which have multiple separate programs (e.g., two separate groundwater contamination plumes, one remediated using pump and treat and the other using vapor extraction) shall be charged a separate fee for each separate system. This fee is also applicable to passive corrective measures (e.g. land-use restrictions, monitored natural attenuation).
- (16) Fee applies to each separate corrective action management unit (CAMU) designated/approved at a facility. This fee is in addition to any other fees applicable to any hazardous waste management units included within a CAMU.
- (17) Fee determined based on type of units (Storage - \$4,855; Treatment [except Land Treatment] - \$5,820; Disposal/Land Treatment - \$11,650).
- (18) Fee applies to facilities which receive hazardous waste from off-site sources (e.g., commercial facilities).
- (19) Fee applies to thermal treatment units required to conduct indirect risk assessments.
- (20) Initial fee applies to the first CS work plan at a facility. The additional unit fee will be charged for each additional, separate CS workplan at the same facility.
- (21) Initial fee applies to the first IM work plan at a facility. The additional unit fee will be charged for each additional, separate IM workplan at the same facility.
- (22) Initial fee applies to the first CMS work plan at a facility. The additional unit fee will be charged for each additional, separate CMS workplan at the same facility.
- (23) Fee is charged per each RFA Report prepared for a given facility.
- (24) Landfill 5-Year Review Certification fee applies to operating hazardous waste land disposal facilities subject to 335-14-5-.05.

335-1-7-.01 Applicability.

The provisions of this Chapter shall apply to any person who operates a stationary source, except as provided in Rule 335-1-7-.03.

Author: Richard E. Grusnick

Statutory Authority: Code of Ala. 1975, §§22-22A-4, 22-22A-5, 22-22A-6, and 22-22A-8.

History: Effective Date: December 19, 1991. **Amended:**

335-1-7-.02 Definitions.

The words or phrases used in this Chapter shall have the meanings provided in the rules and regulations applicable to the particular application involved unless the word or phrase is defined in this Rule for the purposes of this Chapter, the following words or phrases shall have the following meanings:

(a) "actual emissions" means the actual rate of emissions in tons per year of any regulated air pollutant emitted by a stationary source. Actual emissions shall be calculated using the stationary source's actual operating hours, production rates, and in-place control equipment, types of materials processed, stored, or combusted during the calendar year which precedes the year the fees are due by one year.

(b) "affected pollutant" means any of the following pollutants: nitrogen oxides, sulfur oxides measured as sulfur dioxide, volatile organic compounds, or particulate matter.

(c) "consumer price index or CPI" means the average of the Consumer Price Index for all-urban consumers published by the Department of Labor, as of the close of the 12-month period ending on August 31 of each year.

(d) "fugitive emissions" are the emissions which could not reasonably pass through a stack, chimney, vent, or other functionally-equivalent opening.

(e) "major source" means any stationary source (or any group of stationary sources that are located on one or more contiguous or adjacent properties, and are under common control of the same person or persons under common control belonging to a single major industrial grouping) that is characterized by one of the following categories:

1. emits or has the potential to emit 10 tons per year or more of any hazardous air pollutant which has been listed in section 112(b) in the Clean Air Act (except radionuclides) or 25 tons per year or more of any combination of such hazardous air pollutants. Emissions from any oil or gas exploration or production well (with its associated equipment) and emissions from any pipeline compressor or pump station shall not be aggregated with other similar units, whether or not such units are in a contiguous area or under common control, to determine whether such units or stations are major sources for hazardous air pollutants.

2. emits or has the potential to emit 100 tons per year or more of any regulated pollutant. The fugitive emissions of a stationary source shall not be considered in determining whether it is a major stationary source unless the source belongs to one of the following categories of stationary source:

(i) Coal cleaning plants (with thermal dryers)

(ii) Kraft pulp mills

(iii) Portland cement plants

(iv) Primary zinc smelters

(v) Iron and steel mills

(vi) Primary aluminum ore reduction plants

(vii) Primary copper smelters

(viii) Municipal incinerators capable of charging more than 250 tons of refuse per day.

- (ix) Hydrofluoric, sulfuric, or nitric acid plants
- (x) Petroleum refineries
- (xi) Lime plants
- (xii) Phosphate rock processing plants
- (xiii) Coke oven batteries
- (xiv) Sulfur recovery plants
- (xv) Carbon black plants
- (xvi) Primary lead smelters
- (xvii) Fuel conversion plants
- (xviii) Sintering plants
- (xix) Secondary metal production plants
- (xx) Chemical process plants
- (xxi) Fossil-fuel boilers (or combination thereof) totaling more than 250 million British thermal units per hour heat input
- (xxii) Petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels.
- (xxiii) Taconite ore processing plants.
- (xxiv) Glass fiber processing plants.
- (xxv) Charcoal production plants
- (xxvi) Fossil-fuel fired steam electric plants of more than 250 million British thermal units per hour of heat input
- (xxvii) All other stationary source categories regulated under sections 111 or 112 in the Clean Air Act.

(f) "potential to emit" means the maximum capacity of a stationary source to emit a pollutant under its physical and operational design. Any physical or operational limitation on the capacity of a source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design if the limitation is federally-enforceable.

335-1-7-.03

(g) "regulated pollutant", means the following:

1. nitrogen oxides or any volatile organic compound
2. any pollutant for which a national ambient air quality standard has been promulgated.
3. any pollutant that is subject to any standard promulgated under sections 111 of the Clean Air Act.
4. any pollutant subject to a standard promulgated under 112 or the requirements established under section 112 of the Act including sections 112(g), and (j) of the Act, including the following:

(i) any pollutant subject to requirements under section 112(j) of the Act. If the Administrator fails to promulgate a standard by the date established pursuant to section 112(e) of the Act, any pollutant for which a subject source would be major shall be considered to be regulated on the date 18 months after the applicable date established pursuant to section 112(e) of the Act; and

(ii) any pollutant for which the requirements of section 112(g) (2) of the Act have been met, but only with respect to the individual source subject to section 112(g) (2) requirement.

(h) "stationary source" means any activity or piece of equipment at a building, structure, facility, or installation that emits or may emit any air pollutant.
