Minutes

Environmental Management Commission Meeting
Alabama Department of Environmental Management Building
1400 Coliseum Boulevard
Montgomery, Alabama 36110-2400
December 12, 2014

This is to certify that the Minutes contained herein are a true and accurate account of actions taken by the Alabama Environmental Management Commission on December 12, 2014.

H. Larier Brown,

Chair

Alabama Environmental Management Commission

Certified this 20th day of February 2015.

Minutes

Environmental Management Commission Meeting Alabama Department of Environmental Management Building 1400 Coliseum Boulevard Montgomery, Alabama 36110-2400 December 12, 2014

Convened: 11:00 a.m. Adjourned: 12:22 p.m.

			December 12, 2014
	Page 1		Page 3
1	* * * * * *	1	CHAIRMAN BROWN: Good morning.
2		-	We will now call to order the
3			December 12, 2014 meeting of the Alabama
4	ALABAMA ENVIRONMENTAL MANAGEMENT	1	Environmental Management Commission. The
5	COMMISSION MEETING	40	Chair acknowledges that we have a quorum
6		1	present today. In fact, all
7		1	Commissioners are present.
8	ALABAMA DEPARTMENT OF ENVIRONMENTAL	8	The first item on the agenda is
9	MANAGEMENT Alabama Room		consideration of minutes held minutes
10	1400 Coliseum Boulevard Montgomery, Alabama 36110-2400		of the meeting held on October 17, 2014.
11		11	CHAIRMAN PHILLIPS: So moved.
12	DECEMBER 12, 2014	12	CHAIRMAN MILLER: Second.
13	11:00 a.m.		
14		13	CHAIRMAN BROWN: All in favor say
15	* * * * * * *	1	(Unanimous)
16		15	(Unanimous.)
17		16	CHAIRMAN BROWN: If any oppose.
18		17	(No response.)
19		18	CHAIRMAN BROWN: Motion passes.
	Mahara hara Maddanta M. Mitaball	19	Next item on the agenda is elections
20	Taken by: Bridgette W. Mitchell,		for the Personnel and Rulemaking
21	ACCR 231	21	1
22			nominations has been submitted for
23		23	Committee Chairs, and the Chair will
	Page 2		Page 4
1	* * * * * * *		
2	APPEARANCES		entertain a motion for Personnel
3			Committee for Jim Laier as Chair with
4	COMMISSION MEMBERS PRESENT:		Robert Carson and Sam Miller as members.
5	H. Lanier Brown, II, Esquire, Chair		And for the Rulemaking Committee for
6	W. Scott Phillips, Vice Chair		Scott Phillips' Chair with Mary Merritt
7	Samuel L. Miller, M.D.		and Terry Richardson as members.
8	James E. Laier, Ph.D., P.E.	7	DR. RICHARDSON: Move to accept
9	Mary J. Merritt	8	
10	Terry D. Richardson, Ph.D.	9	CHAIRMAN BROWN: Is there a
11	Robert L. Carson, Jr., D.V.M.		second?
12		11	DR. CARSON: Second.
13		12	CHAIRMAN BROWN: All in favor say
14	ALSO PRESENT:	1	aye.
15	Robert Tambling, EMC Legal Counsel	14	(Unanimous.) CHAIRMAN BROWN: Motion carries.
16	Lance R. LeFleur, ADEM Director	15	
17		16	Next we will have our report from
	Debi Thomas, EMC Executive		the Director of the Department.
18	Assistant	18	Good morning, sir.
19		19	MR. LeFLEUR: Good morning. Good
20			morning, Commissioners. And good morning
21		21	
22		1	second scheduled meeting of the Alabama
23		23	Environmental Management Commission for

			December	12, 201
	Page 9			Page 7
1	fiscal year 2015 and the last AEMC	1	basis for informed discussion of issues.	
	meeting of calendar year 2014.		0 1 1 11 1 1 0	
3	Today's report will update you on	3	1 0	
4	the operating budget and then focus on	4	compared to EPA goals and other states so	
1	the air dashboards and other developments		the Commission and the public can make an	
	in the air arena. I will close with a	1	informed judgment of departmental	
7	report on three personnel matters.	- 1	performance. Third, they can be used by	
8	As you're aware, we are currently in	- 1	the Department to see where adjustments	
9	the first quarter of the FY2015 budget	- 1	may be needed in the operation of the	
	cycle. At this point, the Department,		Department and thus promote corrective	
1	with our General Fund appropriation,		action if necessary. Earlier this year,	
1	Federal Grants, and other generated		we reviewed water and land dashboards.	
	revenue, is able to meet all of our		Air media dashboards have just been	
1	financial obligations.		updated in the EPA database, so we can	
15	On November 1, the Department	- 1	now look at the most current data for	
16	submitted its FY 2016 budget request to		air.	
17	the State Department of Finance. In that	17	Before I begin, there are two	
18	submittal, we requested an increase of	18	important details to point out. First,	
19	approximately \$1.3 million in General		the air pollution control program in	
20	Funds. The requested increase is	20	Alabama, the Jefferson County and the	
21	necessary to fund the Department's	21	city of excuse me. The air pollution	
22	Emergency Response program, the cost of		program in Alabama involves the Jefferson	
23	implementing the mandated State of	23	County Department of Health and the City	
	Page 6			Page 8
1	Alabama Accounting and Resource System,	1	of Huntsville, which exclusively	
2	or STAARS, new State of Alabama	2	implement the Clean Air Act in their	
3	Comptroller service charges, and	3	respective jurisdictions. The air	
4	additional fringe benefits associated	4	dashboards presented today combine the	
5	with merit raises. Although it will be	5	data from these local programs with that	
6	difficult in the current atmosphere of		of the Department. These dashboards do	
7	restricted budgets and growing statewide	7	not, therefore, solely reflect the	
8	deficits, we will continue to work	8	Department's universe of regulated	
9	closely with the Governor's office and	9	facilities or its activities.	
10	the Legislature to first maintain our	10	Second, these dashboards only	
11	FY 2015 level of funding and then to seek	11	reflect information for federally	
12	the crucial increased funding to cover	12	reportable facilities. To be federally	
13	these additional costs.	13	reportable, a regulated facility must be	
14	At three meetings per year, I	14	a major source, a synthetic minor source	
15	present to you the annually updated EPA	15	which is a facility that is capable of	
16	Interactive Visual Compliance and	16	being a major source but which has	
17	Enforcement Metrics, or dashboards,	17	elected to restrict its emissions to a	
18	individually for air, land, and water	18	level below that which would put it in	
19	media. These statistical updates are	19	the category of a major source, or any	
20	regularly presented for several reasons.	20	minor source that had a federally	
21	First, they represent data that is	21	reportable violation during the most	
22	standardized, consistent, and objective	22	recent fiscal year. The Department	
			The state of the s	
21	First, they represent data that is	21	reportable violation during the most	

			December	12, 2014
	Page	9		Page 11
1	enforcement data for approximately 1300	1	reason the bars on the graph are less	
1	of its regulated facilities, but all of		than the 100-percent goal is that the	
1	these activities are not classified as	1	local programs in Jefferson County and	
4	federally reportable and, therefore, are	- 1	the City of Huntsville do not seek to	
1	not reflected in these dashboards.	- 1	operate with the same self-imposed goal	
6	So with those caveats in mind,	- 1	to conduct compliance evaluations for 100	
7	please turn your attention to the screen		percent of federally reportable	
1	where I will walk you through a few of	8	facilities each year.	
9	the more than 50 air dashboards available	9	111	
10	for the analysis of the air pollution	10	has consistently exceeded EPA's	
1	control program in Alabama. As is done	- 1	requirement, which is at most every two	
	in each dashboard presentation, we will	- 1	years, or 50 percent, as well as the FCE	
	look at the size of the universe of	- 1	national average across all states shown	
14	regulated facilities, the rate of	- 1	as the dashed line in blue on the graph.	
15	inspections, the findings from those	15		
	inspections, and then the enforcement	16		
17	actions taken where violations are found.	17	clicked, the underlying detail data that	
18	This first slide is EPA's	18		
19	representation of Alabama's total	19	displayed. For example, if the	
20	universe of federally reportable	20	individual bar for 2014 is clicked on	
21	facilities under the Clean Air Act.	21	this graph, a complete list of the 612	
22	Those facilities are classified as major	22	full compliance evaluations done by ADEM	
23	sources shown in dark blue, 356, a	23	will be displayed.	
	Page 1	0		Page 12
1	decrease of five in the last year;	1	The dashboard graph shown on this	
2	synthetic minor sources shown in yellow,	2	third slide reflects the percentage of	
3	366; and minor or other sources shown in	3	federally reportable facilities that were	
4	light blue, 15. These numbers do not	4	found to have violated an applicable	
5	include facilities exclusively regulated	5	federal requirement and received either a	
6	by EPA.	6	notice of violation and/or an	
7	In this second slide, you will see	7	administrative order with monetary	
8	an analysis of the percentage of full	8	penalty. There are expected year-to-year	
9	compliance evaluations, or FCEs,	9	fluctuations in violation rates that	
10	conducted on federally reportable		relate to the effective dates of new air	
11	facilities in Alabama for the period from	11	regulations. The data indicates that the	
12	2010 through 2014. Full compliance	12	violation rate in Alabama is lower than	
13				1
123	evaluations are analogous to inspections	13	the national average across all states,	
14	evaluations are analogous to inspections for the land and water media. Please		the national average across all states, which is the dashed green line at the top	
14	for the land and water media. Please note that EPA does not require that	14	which is the dashed green line at the top of the graph that ranges from about 14	
14	for the land and water media. Please	14	which is the dashed green line at the top of the graph that ranges from about 14 percent down to about 11 percent. As you	
14	for the land and water media. Please note that EPA does not require that federally reportable facilities receive	14	which is the dashed green line at the top of the graph that ranges from about 14 percent down to about 11 percent. As you see, Alabama ranges over time from about	
14 15 16 17 18	for the land and water media. Please note that EPA does not require that federally reportable facilities receive an FCE each year. EPA requires an FCE for major sources once every two fiscal	14 15 16	which is the dashed green line at the top of the graph that ranges from about 14 percent down to about 11 percent. As you see, Alabama ranges over time from about eight percent down to five percent.	
14 15 16 17 18 19	for the land and water media. Please note that EPA does not require that federally reportable facilities receive an FCE each year. EPA requires an FCE for major sources once every two fiscal years and an FCE for synthetic minor	14 15 16	which is the dashed green line at the top of the graph that ranges from about 14 percent down to about 11 percent. 23 her predecessor, she will be in charge of

23 move on to the report from the Rulemaking

_				December 12	, 2014
		Page 29		Pa	ge 31
1	Committee which met this morning prior to		1	one thing at a time.	
	this meeting. And I'll call on		2	So with that, I will answer any	
	Rulemaking Committee Chair Phillips for a		3	questions of the Commissioners.	
1	report.		4	CHAIRMAN BROWN: Any questions at	
5	VICE CHAIRMAN PHILLIPS: Thank		5	this time?	
6	you, Mr. Chairman. The Rulemaking		6	(No response.)	
7	Committee did meet this morning at		7	CHAIRMAN BROWN: The next item is	
8	10 a.m. in the chamber here. It was a		8	that following up on what Commissioner	
9	very short but productive meeting. We		9	Phillips said, we have a proposal or the	
10	really wanted to move forward from our		10	Chair will entertain a motion to refer	
11	review that we had reported at the last		11	environmental justice policy to the	
12	Commission meeting to attaining solutions		12	Rulemaking Committee as an item for	
13	to some of the concerns that have been		13	discussion.	
14	expressed about the rule. The way we		14	VICE CHAIRMAN PHILLIPS: And I	
15	intended, or intend, to do that is by		15	would like to make that motion from the	
16	putting out a notice that we will meet at		16	Rulemaking Committee as the Chair in	
17	1 p.m. after the Commission meeting in		17	response to the members of that	
18	February, February the 20th, 2015, at		18	Rulemaking Committee's desire to really	
19	1 p.m., where we will have a session, a		19	discuss that topic and decide what to, if	
20	working session, with the public where we		20	anything, bring back to the	
21	will go through those concerns. In the		21	Commissioners. So I'll make that motion.	
22	announcement, we will make those concerns		22	CHAIRMAN BROWN: Second?	
23	known so that people can prepare their		23	DR. LAIER: Second.	
_		D 00			
		Page 30		Pa	ge 32
	comments. We will be very proactive in		1	CHAIRMAN BROWN: All in favor say	
1	asking for comments even from those that		2	aye.	
1	can't attend in providing those comments		3	(Unanimous.)	
	between now and the time of that meeting		4	CHAIRMAN BROWN: Motion carries.	
5	which we will put on the record.		5	Next item on the agenda is any other	
6	Our intent, as the Commission has			business. Is there any other business	
1	asked us, is to look at this rule, see if			that any Commissioner thinks needs to be	
	any changes are necessary or any			raised?	
1	improvements can be made to enhance the		9	(No response.)	
10			10	CHAIRMAN BROWN: There being	
11	the state of the s		1	none, Chair notes that we have proposed	
	considering that the comments we got in			meetings for 11 a.m. in this room for	
13	1		1	February 20, 2015; April 17, 2015;	
14	8			June 19, 2015; August 21, 2015;	
	public comment period. So we will we		15	October 16, 2015; and December 18, 2015.	
16			16	And the Chair will entertain a motion to	
17	8		17	adopt those proposed meeting dates and	
18	, 81			times.	
19	you have next on your agenda relative to		19	DR. RICHARDSON: So moved.	
			-		
20	3 1 3		20	DR. LAIER: Second.	
21	the state and desire to discuss that, but		21	CHAIRMAN BROWN: All in favor?	
21	the state and desire to discuss that, but really to do that sequentially after we		21 22	CHAIRMAN BROWN: All in favor? (Unanimous.)	
21	the state and desire to discuss that, but		21	CHAIRMAN BROWN: All in favor?	

Ala	bama Environmental Management Commission	Meeting		D	- 12 2014
		D 00		Decembe	er 12, 2014
		Page 33			Page 35
1	move on to the public comment period. We		1	in the future we can all be talking from	
2	have a recommendation excuse me a		2	the same page.	
3	request by Stacie Propst on behalf of		3	In this case, Director LeFleur said	
4	GASP to address the addition of the or		4	that the EPA and the ATSDR, which is the	
5	proposed addition of the 35th Avenue site		5	Agency for Toxic excuse me for	
6	to EPA's National Priority List. Chair		6	Toxic Substances and Diseases Registry	
7	recommends that the Commission grant the		7	claim that there was no health hazard.	
8	request and will entertain a motion.		8	That is absolutely not the case. There	
9	DR. MILLER: I move that we grant		9	is a short- and long-term health hazard	
10	the request.		10	for people in sensitive populations; and	
11	DR. LAIER: Second.		11	in this case many, many of the residents	
12	CHAIRMAN BROWN: All in favor?		12	of those communities are sensitive	
13	(Unanimous.)		13	populations. And we'll get to that in a	
14	CHAIRMAN BROWN: Ms. Propst.		14	minute.	
15	DR. PROPST: Thank you very much.		15	And I do want to draw your attention	
16	I appreciate the opportunity, obviously,		16	to the fact that there is soot on these	
17	to be here today and appreciate your		17	homes and cars and businesses every	
18	attention. This is my first interaction		18	single day, this black soot, and the	
19	with you, and I hope it will be a good		19	people in those communities do know that	
20	one in the future.		20	they're breathing it in.	
21	So I want to talk to you a little		21	And then it was stated that there	
22	bit about the importance of putting the		22	was no scientific basis for north	
23	Birmingham Superfund Site, which is the		23	Birmingham to be put on the list, and	
		Page 34			Page 36
1	35th Avenue Superfund Site, onto the		1	that is also categorically not accurate.	
2	national priorities list. The EPA has		2	And we'll talk about that in just a	
3	recommended that it be put on the		3	moment.	
4	national priorities list. That is		4	So as I said, ATSDR's report shows	
5	exactly what it says. It prioritized		1	that people who are sensitive populations	
6	prioritizes the site for cleanup. It		6	are vulnerable. Now, that includes the	

- 7 allows the federal government to invest
- 8 more in how much they're cleaning up.
- 9 And we're at the point where that's
- 10 critical for the continuing cleanup of
- 11 the area and to work on the air-pollution
- 12 problems that are still in existence
- 13 there.
- So the most important thing to
- 15 address here is that we -- the state
- 16 recently came out against the EPA's
- 17 recommendation to put the Superfund Site
- 18 on the national priorities list. That
- 19 was deeply concerning to us, obviously.
- 20 And there were some statements made
- 21 specifically by ADEM that were
- 22 inaccurate, and we want to be sure that
- 23 we address those with you and hope that

- 7 elderly, that includes children, that
- 8 includes pregnant women, that includes
- 9 anyone with heart disease, that includes
- 10 anyone with respiratory illness, that
- 11 includes anyone who has an immune
- 12 disorder, which is a large span of
- 13 disorders. And in particular, UAB
- actually just published a report, a study
- done by Dr. Gohlke and her team and the
- school of public health there, that they
- looked at the data, the public health --
- the data provided by the Alabama Public
- Health Department, showing actually that
- infant preterm and low birth weight in
- children living within five kilometers of
- 22 that industrial area, which is just three
- 23 miles north of downtown Birmingham, that

	David City i Olimentai Wanagement Commission Meeting		December 12, 20
	Page 37		Page 3
1	they do have a higher rate of congenital	1	in the absence of the state having any
2	issues. And we know from spending the	1	role whatsoever, it's absolutely critical
3	last four years working in the		that EPA is allowed to do the cleanup.
	communities that the children who go to	4	So on the face of remediation in
5	those schools do have a very high rate of	5	support of Dr. Gohlke's study, there's
	respiratory illnesses.	1	another recent study from the National
7	****		Bureau of Economic Research demonstrating
8	more health data and for Jefferson County	1	that in superfund sites after cleanup
	to do a full health assessment. That has	1	that the infant congenital abnormalities
10	not occurred yet, but Dr. Wilson is on		actually do drop after cleanup. So there
	the record for saying that we do not know		is now evidence, and economically based,
	because we have insufficient information		that cleanup does improve public health
	right now. The data is not there	1	and actually improves economic viability
	available to us to know if asthma rates		in those communities.
	are higher in these communities than they	15	So the bottom line here is that
	are in other communities, so that's	16	remediation is going to be limited unless
	something that we're continuing to push	1	the 35th Avenue site is put on the
	on and work on, to get that information.		national priorities list. More funding
19	G 11G 1 1 D1 1 1 1 1 1	1	will be made available to remediate that
	difficult. First, just a little		community and help the people who live
	historical perspective. Last century,	1	and are stuck there at this point. In
	the people who live in those communities,	1	other words, remediation via superfund is
	the families generationally were actually		essential to the cleanup and the
	Page 38		Page 4
1	legally segregated into those	1	revitalization of these communities.
	communities, so industrial and black	2	So obviously what we're asking is
	people were segregated together in the		that you support EPA's role in cleaning
	north Birmingham area. And that's a	1	up and continuing to clean up. They
	critical point here. So the property	1	already are working in the communities
	values of those in the industrial regions	1	and have been for a little while. But
	have been dropping for many, many	1	also to support them to continue to do
	decades, and they're at the point now	1	that and to bring more funds to bear to
	where it's hard to imagine them going	1	rescue, to a certain extent, the people
	lower. So the people who are left are		who live in these communities.
	really the people who cannot afford to	11	And I'm happy to answer any
	get out. These are your most vulnerable	100000	questions. Thank you very much for your
	populations. Churches, leadership, I		time. I appreciate it.
	mean, people are moving as quickly as	14	CHAIRMAN BROWN: Anyone have any
	they can to get out because the risk of		questions or comments at this time?
	disease there is incredibly present.	16	DR. RICHARDSON: Mr. Chairman. I
17	37 11 1		have a couple of questions regarding
	Mr. Strange, just recently quoted in	1	as to the priorities list.
	AL.com's article about this issue, and he	19	DR. PROPST: Yes, sir.
- 2	1 Con CALL 1 1 1	13	DR. TROIST. Tes, sil.

20 says the State of Alabama has been

21 unmistakably clear that there will be no

22 state money available to help clean up.

23 That also is very concerning to us. And

20

22

21 or soil?

DR. RICHARDSON: Based upon air

DR. PROPST: It's actually all

23 three. It's air, soil, and water -- can

						,,
		P	age 41			Page 43
	1 be	e ultimately air, soil, and water. In		1	conflicting in and of itself. That is	
		nis case, the only data available right			fairly typical sometimes in a government	
		ow to base the remediation on is soil,			scientific report. We have experienced	
		lthough there has been a plume out from			that any number of times. The problem	
		nder Walter Coke, a benzene plume, that			here is that lead, arsenic, cadmium	
		as permeated the surface and the	1		there are heavy metals in the soil. That	
		roundwater. In addition, this region			is what they are removing in an	
	_	as the highest cancer rates. I mean,			emergency using emergency funding,	
		's an interesting point because there's			they are removing those soils out of	
-		nly 14 coke plants left in the nation.			from 500 homes. Okay? There were 50	
- 1		wo of them are within a mile of each	- 1		that were so toxic they had to do it	
		ther; Walter Coke and ABC Coke are right	- 1		immediately. There's another 400 or so	
- 1		here together. And they are the source			that they're working on to get rid of	
- 1		f the major amounts of particle			those toxic metals. Those are poisonous	
- 1		ollution. We were just actually,	- 1		to children. So bottom line is that the	
- 10	-	eard Director LeFleur talking about that	- 1		soil came first in what they needed to	
- 1		ust just now. That particle			attack and attempt.	
	-	ollution gets down into the lungs and we		18	We are working very closely with the	
- 1		an't get it back out, so that is that			EPA and Jefferson County Department of	
		s a major problem. So, actually, all			Health pushing hard, and the companies	
- 1		hree areas are engaged in this.			pushing hard, to try to do something	
	21 u 22	DR. RICHARDSON: But in this			about the ongoing air pollution that even	
100		ase, the NPL decision is based on soil?			though it is not part of the original	
1	23 C	ase, the IVI L decision is based on son?		43	though it is not part of the original	
		Р	age 42			Page 44
	1	DR. PROPST: Because yes,		1	score to put the superfund site on the	
	2 b	ecause they had a score so high for the			NPL, the score was so high 50 is a	
	3 S(oil that they didn't need to include air		3	very high number in this case. It is so	
	4 a1	nd water, although in their report it is		4	high that they didn't need the air and	
		ery detailed the air and water			the water data to include. But they are	
		nvolvement.			going to try to address air and water at	
	7	DR. RICHARDSON: You state that,			the same time.	
	8 0	on page 17, that the ATSDR concluded that		8	So the idea that air and water is	
		ast and current exposure to contaminants		9	not involved the soil contamination is

MILLER: Would you mind providing those? DR. PROPST: Happy to.	Page 48
	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	money, so EPA will most likely refuse to do it without that match. DR. PROPST: Actually, no. The I agree with what your point is, that it says 10 percent matched by the state. However, in practice, what actually happens is just like the EPA has been unable to, up to this point, get the companies to do their part, they often waive the state's part as well. And the EPA official number of EPA officials have said that point-blank. So the reality is that and this is our biggest concern. We do not	Page 46	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	those are in our comments to all to the ABC Coke and the Walter Coke permit. They were recently Title V the Title V permits DR. MILLER: I understand they're in your comment, but where do you purport DR. PROPST: They're national data on census tracts. National health data on census tracts, risk data. DR. MILLER: Would you mind providing those? DR. PROPST: Happy to. Absolutely.	Page 48
	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	money, so EPA will most likely refuse to do it without that match. DR. PROPST: Actually, no. The I agree with what your point is, that it says 10 percent matched by the state. However, in practice, what actually happens is just like the EPA has been unable to, up to this point, get the companies to do their part, they often waive the state's part as well. And the EPA official number of EPA officials have said that point-blank. So the reality is that and this is our biggest concern. We do not believe that this community will be	Page 46	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	those are in our comments to all to the ABC Coke and the Walter Coke permit. They were recently Title V the Title V permits DR. MILLER: I understand they're in your comment, but where do you purport DR. PROPST: They're national data on census tracts. National health data on census tracts, risk data. DR. MILLER: Would you mind providing those? DR. PROPST: Happy to. Absolutely. DR. RICHARDSON: Based on what you were just saying about the	Page 48
	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	money, so EPA will most likely refuse to do it without that match. DR. PROPST: Actually, no. The I agree with what your point is, that it says 10 percent matched by the state. However, in practice, what actually happens is just like the EPA has been unable to, up to this point, get the companies to do their part, they often waive the state's part as well. And the EPA official number of EPA officials have said that point-blank. So the reality is that and this is our biggest concern. We do not believe that this community will be remediated without the EPA doing it. I	Page 46	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	those are in our comments to all to the ABC Coke and the Walter Coke permit. They were recently Title V the Title V permits DR. MILLER: I understand they're in your comment, but where do you purport DR. PROPST: They're national data on census tracts. National health data on census tracts, risk data. DR. MILLER: Would you mind providing those? DR. PROPST: Happy to. Absolutely. DR. RICHARDSON: Based on what you were just saying about the nonattainment issue. I find it	Page 48
	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	money, so EPA will most likely refuse to do it without that match. DR. PROPST: Actually, no. The I agree with what your point is, that it says 10 percent matched by the state. However, in practice, what actually happens is just like the EPA has been unable to, up to this point, get the companies to do their part, they often waive the state's part as well. And the EPA official number of EPA officials have said that point-blank. So the reality is that and this is our biggest concern. We do not believe that this community will be remediated without the EPA doing it. I mean, that's just plain that's just as	Page 46	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	those are in our comments to all to the ABC Coke and the Walter Coke permit. They were recently Title V the Title V permits DR. MILLER: I understand they're in your comment, but where do you purport DR. PROPST: They're national data on census tracts. National health data on census tracts, risk data. DR. MILLER: Would you mind providing those? DR. PROPST: Happy to. Absolutely. DR. RICHARDSON: Based on what you were just saying about the nonattainment issue. I find it interesting that Jefferson County	Page 48

21 that this specific area -- Collegeville,

22 Fairmont, Harriman -- doesn't have a

23 statistically different occurrence of

21 on for a very long time and a lot of

23 a problem for the air quality of all of

22 people have suffered. And it actually is

MILLER: Well, I guess if you don't have the data, how are you asking the state to step in if you don't have the data to prove it one way or the other? DR. PROPST: Well, we need the data to prove it one way or the other. Asthma rates, this is a different problem than knowing that the soil was toxic. We do know for a fact that the risk is very high and that the soil is toxic and that	Page 50	2 3 4 5 6 7 8 9 10 11 12 13 14	comment that I simply want to make, and that is my albeit limited but my exposure with EPA and superfund sites is that I won't disagree that it might get the process started, but I'm really concerned at how long it's going to take it to happen. EPA does not have a great track record in moving forward and expediting cleanup and getting these things done in a very timely fashion whatsoever. Would the state do any better with the local stakeholders in the area, Walter Coke, et cetera, be able to do something? I don't	Page 52
2 3 4 5 6 7 8 9 10 11 12 13 14	huge problem. We'd like to address it. We'd work with anyone to address that problem. DR. MILLER: Well, I guess if you don't have the data, how are you asking the state to step in if you don't have the data to prove it one way or the other? DR. PROPST: Well, we need the data to prove it one way or the other. Asthma rates, this is a different problem than knowing that the soil was toxic. We do know for a fact that the risk is very high and that the soil is toxic and that what the companies are reporting they're	Page 50	2 3 4 5 6 7 8 9 10 11 12 13 14 15	comment that I simply want to make, and that is my albeit limited but my exposure with EPA and superfund sites is that I won't disagree that it might get the process started, but I'm really concerned at how long it's going to take it to happen. EPA does not have a great track record in moving forward and expediting cleanup and getting these things done in a very timely fashion whatsoever. Would the state do any better with the local stakeholders in the area, Walter Coke, et cetera, be able to do something? I don't know. I don't know the answer to that.	Page 52
2 3 4 5 6 7 8 9 10 11 12 13 14	huge problem. We'd like to address it. We'd work with anyone to address that problem. DR. MILLER: Well, I guess if you don't have the data, how are you asking the state to step in if you don't have the data to prove it one way or the other? DR. PROPST: Well, we need the data to prove it one way or the other. Asthma rates, this is a different problem than knowing that the soil was toxic. We do know for a fact that the risk is very high and that the soil is toxic and that what the companies are reporting they're emitting from their plants exceeds what	Page 50	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	comment that I simply want to make, and that is my albeit limited but my exposure with EPA and superfund sites is that I won't disagree that it might get the process started, but I'm really concerned at how long it's going to take it to happen. EPA does not have a great track record in moving forward and expediting cleanup and getting these things done in a very timely fashion whatsoever. Would the state do any better with the local stakeholders in the area, Walter Coke, et cetera, be able to do something? I don't know. I don't know the answer to that. But I know that if history is a good	Page 52
2 3 4 5 6 7 8 9 10 11 12 13 14 15	huge problem. We'd like to address it. We'd work with anyone to address that problem. DR. MILLER: Well, I guess if you don't have the data, how are you asking the state to step in if you don't have the data to prove it one way or the other? DR. PROPST: Well, we need the data to prove it one way or the other. Asthma rates, this is a different problem than knowing that the soil was toxic. We do know for a fact that the risk is very high and that the soil is toxic and that what the companies are reporting they're emitting from their plants exceeds what Jefferson County allows for cancer risk.	Page 50	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	comment that I simply want to make, and that is my albeit limited but my exposure with EPA and superfund sites is that I won't disagree that it might get the process started, but I'm really concerned at how long it's going to take it to happen. EPA does not have a great track record in moving forward and expediting cleanup and getting these things done in a very timely fashion whatsoever. Would the state do any better with the local stakeholders in the area, Walter Coke, et cetera, be able to do something? I don't know. I don't know the answer to that. But I know that if history is a good teacher for us that it's probably going	Page 52
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	huge problem. We'd like to address it. We'd work with anyone to address that problem. DR. MILLER: Well, I guess if you don't have the data, how are you asking the state to step in if you don't have the data to prove it one way or the other? DR. PROPST: Well, we need the data to prove it one way or the other. Asthma rates, this is a different problem than knowing that the soil was toxic. We do know for a fact that the risk is very high and that the soil is toxic and that what the companies are reporting they're emitting from their plants exceeds what Jefferson County allows for cancer risk. So we know those things. It would be	Page 50	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	comment that I simply want to make, and that is my albeit limited but my exposure with EPA and superfund sites is that I won't disagree that it might get the process started, but I'm really concerned at how long it's going to take it to happen. EPA does not have a great track record in moving forward and expediting cleanup and getting these things done in a very timely fashion whatsoever. Would the state do any better with the local stakeholders in the area, Walter Coke, et cetera, be able to do something? I don't know. I don't know the answer to that. But I know that if history is a good teacher for us that it's probably going to be a very long, drawn-out process.	Page 52
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	huge problem. We'd like to address it. We'd work with anyone to address that problem. DR. MILLER: Well, I guess if you don't have the data, how are you asking the state to step in if you don't have the data to prove it one way or the other? DR. PROPST: Well, we need the data to prove it one way or the other. Asthma rates, this is a different problem than knowing that the soil was toxic. We do know for a fact that the risk is very high and that the soil is toxic and that what the companies are reporting they're emitting from their plants exceeds what Jefferson County allows for cancer risk. So we know those things. It would be VICE CHAIRMAN PHILLIPS: Say that	Page 50	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	comment that I simply want to make, and that is my albeit limited but my exposure with EPA and superfund sites is that I won't disagree that it might get the process started, but I'm really concerned at how long it's going to take it to happen. EPA does not have a great track record in moving forward and expediting cleanup and getting these things done in a very timely fashion whatsoever. Would the state do any better with the local stakeholders in the area, Walter Coke, et cetera, be able to do something? I don't know. I don't know the answer to that. But I know that if history is a good teacher for us that it's probably going to be a very long, drawn-out process. DR. PROPST: Well, the good news,	Page 52
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	huge problem. We'd like to address it. We'd work with anyone to address that problem. DR. MILLER: Well, I guess if you don't have the data, how are you asking the state to step in if you don't have the data to prove it one way or the other? DR. PROPST: Well, we need the data to prove it one way or the other. Asthma rates, this is a different problem than knowing that the soil was toxic. We do know for a fact that the risk is very high and that the soil is toxic and that what the companies are reporting they're emitting from their plants exceeds what Jefferson County allows for cancer risk. So we know those things. It would be VICE CHAIRMAN PHILLIPS: Say that last part again that you just say you	Page 50	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	comment that I simply want to make, and that is my albeit limited but my exposure with EPA and superfund sites is that I won't disagree that it might get the process started, but I'm really concerned at how long it's going to take it to happen. EPA does not have a great track record in moving forward and expediting cleanup and getting these things done in a very timely fashion whatsoever. Would the state do any better with the local stakeholders in the area, Walter Coke, et cetera, be able to do something? I don't know. I don't know the answer to that. But I know that if history is a good teacher for us that it's probably going to be a very long, drawn-out process. DR. PROPST: Well, the good news, Dr. Richardson, on that front is that	Page 52
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	huge problem. We'd like to address it. We'd work with anyone to address that problem. DR. MILLER: Well, I guess if you don't have the data, how are you asking the state to step in if you don't have the data to prove it one way or the other? DR. PROPST: Well, we need the data to prove it one way or the other. Asthma rates, this is a different problem than knowing that the soil was toxic. We do know for a fact that the risk is very high and that the soil is toxic and that what the companies are reporting they're emitting from their plants exceeds what Jefferson County allows for cancer risk. So we know those things. It would be VICE CHAIRMAN PHILLIPS: Say that last part again that you just say you know.	Page 50	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	comment that I simply want to make, and that is my albeit limited but my exposure with EPA and superfund sites is that I won't disagree that it might get the process started, but I'm really concerned at how long it's going to take it to happen. EPA does not have a great track record in moving forward and expediting cleanup and getting these things done in a very timely fashion whatsoever. But I know that if history is a good teacher for us that it's probably going to be a very long, drawn-out process. DR. PROPST: Well, the good news, Dr. Richardson, on that front is that	Page 52

Ala	bama Environmental Management Commission	Meeting		Decembe	r 12, 2014
		Page 53			Page 55
1	the soil remediation. This is an		1	What I'm trying to understand,	
2	escalation to provide more money,		2	though, is and Commissioner Richardson	
3	literally to provide more		3	alluded to this this NPL is about soil	
4	DR. MILLER: How long have they		4	contamination, and you provided us with	
5	been there?		5	the ATSDR when you report	
6	DR. PROPST: About a year and a		6	DR. PROPST: Correct.	
7	half.		7	CHAIRMAN BROWN: And as you can	1
8	DR. MILLER: How many yards have		8	tell, we actually read it.	
9	they done?		9	DR. PROPST: That's great.	
10	DR. PROPST: They're still on the		10	That's fantastic.	
11	first 50, but they were studying it prior		11	CHAIRMAN BROWN: And the one	
12	to obviously they come in to study		12	thing I noted in there is that with	
13	prior to that. And the reason I mean,		13	regard to soil, which this NPL is based	
14	you know, ultimately I'm not going to		14	on, is it said that it doesn't provide	
15	disagree about the length of time. You		15	present a public health risk except to	
16	know, nobody's happy/is perfectly pleased		16	people who have disorders that would	
17	with how long it takes those kinds of			cause them to eat large amounts of the	
18	things to happen, especially when		18	dirt. And, I mean, that's what you sent	
19	people's health is at risk, when people		19	us. And so I'm really looking at where	
20	are in danger. You know, a lot of the		20	is it that you say the Director's	
21	toxic metals that we're talking about are		21	comments were wrong?	
22	neurodegenerative type of things and so		22	DR. PROPST: Well, saying that	
23	for pregnant women and infants, you know,		23	there's no public health threat is not	
-		Page 54			Page 56
1	it is damaging lifelong. So what we're		1	what the ATSDR report says. It says that	
1	asking is try to not restrict the help		2	there is a public health threat for	
	that is being offered, because it is		3	sensitive populations. Now, you know,	
1	critical to get this accomplished one way			it's really important, again, to note	
1	or the other. And what matters is that			that the soil can't be contaminated if	
6	they have the money to invest in it, and		6	the air and the water are not	
	they've recommended to use that money to		7	contaminated. That's not possible. So	
8	1 11 11 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1		8	here we have legacy problems that have	
9	we desperately ask that you support them		9	been going on for a very long time and we	
1	in doing that or not block, not try to		10	have ongoing problems. And I encourage	
	block the effort.		11	you to visit the community. I think you	
12	DR. RICHARDSON: No further			would know in five seconds the problem.	

- 13 comments, Mr. Chairman.
- CHAIRMAN BROWN: Well, I do. I 15 guess when the -- when I got your
- 16 proposal to speak, I felt it was
- 17 something that the Commission needed to
- 18 address because you were taking the
- 19 position that the Department, through the
- 20 Director, had advocated a position that
- 21 was contrary to the public health, and I
- 22 think that's something this Commission
- 23 should address.

- CHAIRMAN BROWN: I've been all 13
- 14 through there from childhood up.
- DR. PROPST: Okay. So there's a 15
- 16 desperate need to address what is a real
- 17 problem, and here we have for the first
- 18 time EPA willing -- and the federal
- government -- willing to spend money to
- 20 help this community clean up historic and
- 21 ongoing contamination.
- CHAIRMAN BROWN: And I guess what 22
- 23 I understand you to say, though, is most

			Detellibe	r 12, 2014
	Page 57			Page 59
1	of the data and the comments that you	1	both. I mean, that's what we would very	1
1	have made pertain to air as opposed to	1	much like to see happen. We would love	
1	soil, but what I hear you saying is that	1	for everybody to come together and work	
1	while the soil might not be a problem	1	in the same direction to try to create,	
1	per se, the air is, and if we clean the	1	you know, a solution for this. I mean,	
1	soil, nothing changes.	1	it hurts obviously the health of the	
7	DR. PROPST: Right. The soil is	1	whole city ultimately. The other piece	
8	a problem, because it's contaminated	1	is, economically, it's highly damaging.	
1	right now. It's contaminated with toxic	1	I mean, even I'll throw this out	
	metals. And there's a plume of water	1	there, but even the Department of	
1	from underneath contaminated with	11		
	benzene, and that is seeping up through		in there because they said it was too	
1	into those people's yards and	1	contaminated. And that's our own	
1	contaminating their soil. So, yes, from		Department of Transportation.	
1	the air from both directions the soil	15	So I understand the conflicting	
	is being contaminated, by the air and the			
	water. And that is coming from those	17	way; but without a doubt, this is a major	
	industrial facilities.	18		
19	DR. CARSON: Can you excuse	19	desperately need to address not just for	
	me. Those heavy metals that you're		those communities, although that's the	
	making reference to, those have probably			
	been deposited in that soil over a very,		Birmingham region.	
	very long period of time, and they don't	23	DR. RICHARDSON: Well, not to try	
	Page 58			Page 60
1	deteriorate with time either. But I	1	to put words in or anything else into	
	41.4		to put words in or any aning else into	
2	think my concern is we know that soil is	1	the mouth of the Director, but the way I	
	think my concern is we know that soil is contaminated, but is it continuing to be	2	-	
3	-	3	the mouth of the Director, but the way I	
3	contaminated, but is it continuing to be	2 3 4	the mouth of the Director, but the way I read this, if he was referring	
3 4 5	contaminated, but is it continuing to be contaminated? Is the air and the water	2 3 4 5	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities	
3 4 5 6	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination	2 3 4 5 6	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils,	
3 4 5 6 7	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's	2 3 4 5 6 7	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public	
3 4 5 6 7	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years	2 3 4 5 6 7 8	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of	
3 4 5 6 7 8 9	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago?	2 3 4 5 6 7 8 9	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't	
3 4 5 6 7 8 9	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago? DR. PROPST: Both. I believe	2 3 4 5 6 7 8 9	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't find his comments in error as you suggest they are.	
3 4 5 6 7 8 9 10	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago? DR. PROPST: Both. I believe that both are the case.	2 3 4 5 6 7 8 9 10	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't find his comments in error as you suggest they are.	
3 4 5 6 7 8 9 10	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago? DR. PROPST: Both. I believe that both are the case. DR. CARSON: Do you have evidence	2 3 4 5 6 7 8 9 10 11	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't find his comments in error as you suggest they are. DR. PROPST: Well, it may be that	
3 4 5 6 7 8 9 10 11 12	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago? DR. PROPST: Both. I believe that both are the case. DR. CARSON: Do you have evidence that there's ongoing contamination	2 3 4 5 6 7 8 9 10 11 12 13	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't find his comments in error as you suggest they are. DR. PROPST: Well, it may be that we're talking past each other. And I	
3 4 5 6 7 8 9 10 11 12 13 14	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago? DR. PROPST: Both. I believe that both are the case. DR. CARSON: Do you have evidence that there's ongoing contamination happening today, right now? DR. PROPST: Yes. I mean, from	2 3 4 5 6 7 8 9 10 11 12 13 14	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't find his comments in error as you suggest they are. DR. PROPST: Well, it may be that we're talking past each other. And I hope that we can that's part of the	
3 4 5 6 7 8 9 10 11 12 13 14 15	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago? DR. PROPST: Both. I believe that both are the case. DR. CARSON: Do you have evidence that there's ongoing contamination happening today, right now? DR. PROPST: Yes. I mean, from the point of view of the surface of that	2 3 4 5 6 7 8 9 10 11 12 13 14 15	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't find his comments in error as you suggest they are. DR. PROPST: Well, it may be that we're talking past each other. And I hope that we can that's part of the reason to come here, is to find out if	
3 4 5 6 7 8 9 10 11 12 13 14 15 16	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago? DR. PROPST: Both. I believe that both are the case. DR. CARSON: Do you have evidence that there's ongoing contamination happening today, right now? DR. PROPST: Yes. I mean, from the point of view of the surface of that	2 3 4 5 6 7 8 9 10 11 12 13 14 15	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't find his comments in error as you suggest they are. DR. PROPST: Well, it may be that we're talking past each other. And I hope that we can that's part of the reason to come here, is to find out if we're getting on the same page means exactly that, getting on the same page.	
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago? DR. PROPST: Both. I believe that both are the case. DR. CARSON: Do you have evidence that there's ongoing contamination happening today, right now? DR. PROPST: Yes. I mean, from the point of view of the surface of that soot and what's in it, yes, there is	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't find his comments in error as you suggest they are. DR. PROPST: Well, it may be that we're talking past each other. And I hope that we can that's part of the reason to come here, is to find out if we're getting on the same page means exactly that, getting on the same page.	
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago? DR. PROPST: Both. I believe that both are the case. DR. CARSON: Do you have evidence that there's ongoing contamination happening today, right now? DR. PROPST: Yes. I mean, from the point of view of the surface of that soot and what's in it, yes, there is contamination going on. It is not	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't find his comments in error as you suggest they are. DR. PROPST: Well, it may be that we're talking past each other. And I hope that we can that's part of the reason to come here, is to find out if we're getting on the same page means exactly that, getting on the same page. So I would never throw aspersions at	
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago? DR. PROPST: Both. I believe that both are the case. DR. CARSON: Do you have evidence that there's ongoing contamination happening today, right now? DR. PROPST: Yes. I mean, from the point of view of the surface of that soot and what's in it, yes, there is contamination going on. It is not possible that those toxins are not coming	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't find his comments in error as you suggest they are. DR. PROPST: Well, it may be that we're talking past each other. And I hope that we can that's part of the reason to come here, is to find out if we're getting on the same page means exactly that, getting on the same page. So I would never throw aspersions at anyone. There were quotes in and I	
3 4 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago? DR. PROPST: Both. I believe that both are the case. DR. CARSON: Do you have evidence that there's ongoing contamination happening today, right now? DR. PROPST: Yes. I mean, from the point of view of the surface of that soot and what's in it, yes, there is contamination going on. It is not possible that those toxins are not coming out still. The benzene plume has still	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't find his comments in error as you suggest they are. DR. PROPST: Well, it may be that we're talking past each other. And I hope that we can that's part of the reason to come here, is to find out if we're getting on the same page means exactly that, getting on the same page. So I would never throw aspersions at anyone. There were quotes in and I had never met Director LeFleur. There	
3 4 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago? DR. PROPST: Both. I mean, from the point of view of the surface of that soot and what's in it, yes, there is contamination going on. It is not possible that those toxins are not coming out still. The benzene plume has still not been addressed, and that is an	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't find his comments in error as you suggest they are. DR. PROPST: Well, it may be that we're talking past each other. And I hope that we can that's part of the reason to come here, is to find out if we're getting on the same page means exactly that, getting on the same page. So I would never throw aspersions at anyone. There were quotes in and I had never met Director LeFleur. There were quotes in the paper, and we just	
3 4 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	contaminated, but is it continuing to be contaminated? Is the air and the water continuing to provide that contamination or did this soil contamination that's been documented, did this occur 20 years ago, 30 years ago? DR. PROPST: Both. I believe that both are the case. DR. CARSON: Do you have evidence that there's ongoing contamination happening today, right now? DR. PROPST: Yes. I mean, from the point of view of the surface of that soot and what's in it, yes, there is contamination going on. It is not possible that those toxins are not coming out still. The benzene plume has still not been addressed, and that is an ongoing problem. So there are historical	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the mouth of the Director, but the way I read this, if he was referring specifically to the National Priorities List listing and that was based on soils, his comment that there is no public health risk is based upon the contents of the ATSDR report and, therefore, I don't find his comments in error as you suggest they are. DR. PROPST: Well, it may be that we're talking past each other. And I hope that we can that's part of the reason to come here, is to find out if we're getting on the same page means exactly that, getting on the same page. So I would never throw aspersions at anyone. There were quotes in and I had never met Director LeFleur. There were quotes in the paper, and we just you know, we were deeply concerned and	

Ala	abama Environmental Management Commission	Meeting		Decembe	er 12, 2014
		Page 61		2000	Page 63
1	DR. RICHARDSON: And I think		1	MR. LeFLEUR: Well, I would like	
2	you're I think you're absolutely		2	1 011	
1	correct. I think that's probably what's		3	Jason, do you have that?	
1	happened. I think he's talking about one		4	In looking over the presentation a	
	thing specifically. And, again, I'm not		5	bit, I did want to bring up a few points	
1	trying to put words in his mouth, but I			just for information for those present.	
7	think he's talking about one thing			I think we're all in agreement that	
8	'C' 11 1 1 1 1 1			there's contamination on this site as	
9	bigger, broader issue.		9	there are on virtually any site that	
10	CHAIRMAN BROWN: That's yes.		10	human beings have come in contact with.	
11	DR. RICHARDSON: And I do think	is the second	1	As far as the Department's concerned, we	
12	that had you come to the Director in a		12	have to rely on others to tell us whether	
13	sit-down face-to-face, as I would like to		13	there is a human impact. We are not	
14	see more people do, I think you could		14	epidemiology certified, so we have to	
15	have come to this conclusion without		15	rely on those who are experts in the	
16	having to bring it before the Commission.		16	field.	
17	DR. PROPST: Well okay.		17	And a number of the references were	
18	DR. RICHARDSON: It's not bad		18	to a correspondence that has been made	
19	that the Commission hears this. I		19	available to the public, my e-mail to	
20	understand that. And that's fine.		20	Gina McCarthy, the administrator of EPA.	
21	DR. PROPST: This all happened in		21	And it's almost impossible to read on	
22	a very short time frame for sure, and we		22	this screen, but this is the actual	
23	wanted to be sure that it was of public		23	e-mail that went to Gina McCarthy. And	
		Page 62			Page 64
1	record, which is very important to us.		1	in that e-mail, I indicated several	
2	It's also important ultimately to have		2	things, but in particular I mentioned	
3	the state collectively hear this message,		3	that EPA has not provided any support for	
4	not just one person. And so it was		4	their rationale of proposing this for an	
5	really important to us to do this.		5	NPL site. They have been on the site	
6	DR. RICHARDSON: And I agree. I		6	since 1989 and have been collecting data,	
7	think having it part of the public record		7	but they have we have requested the	
8	and all that is good. And I think that		8	data, but they have not provided it as of	
9	you would find that Director LeFleur's		9	the time of this e-mail. They have	
10	I won't say his office is always onen		10	subsequently provided it after it was	

10 I won't say his office is always open, 11 but his door is open and he's amenable to 12 speaking to anyone that has concerns of 13 this nature, especially on comments he 14 may or may not have made. But I thank 15 you for your time and your presentation. DR. PROPST: Thank you very much. 16 17 CHAIRMAN BROWN: We do appreciate 18 it. Thank you. DR. PROPST: Thank you. Can I 19 20 sit?

> CHAIRMAN BROWN: Yes, you may. CHAIRMAN BROWN: May we please

23 hear from the Director on these issues?

10 subsequently provided it after it was 11 proposed to go on the NPL. So at the 12 time, we had no scientific basis on which 13 to concur or not concur with EPA from a 14 scientific basis. DR. MILLER: You're telling us 15 16 they have been collecting data for 25 17 years? MR. LeFLEUR: Well, I don't know 18 19 that -- how much data they've collected 20 in all of that time and when they did or

21 did not collect it, but they have been on

22 the site since 1989, and my presumption

23 is that they have been collecting data

21

	1 that entire time. I don't know. Some of		1	indicate that it's not likely to result	
	2 our Land Division folks may have a better			in harmful noncancer health effects.	
	3 idea.			Item No. 4 says it is, as Dr. Richardson	
	4 MR. DAVIS: Potentially so. They			mentioned, is within the target range,	
	5 have been working with the industry, one			EPA's target risk range, and so on. And	
	6 in particular there, since, as you said,			I think it's important to look at all of	
	7 the late '80s.			the conclusions that are in the air study	
	8 MR. LeFLEUR: So the bottom line			even though as has been mentioned, the	
	9 on that particular point is that we have			soil was the basis for EPA putting it on	
1	o not been privy to the data that they are			the NPL. The soil study, which is here	
1	1 supposed to be basing their			and unreadable, also	
1	2 recommendation to put it on the NPL. And		12	CHAIRMAN BROWN: What page is	
1	3 we would be remiss if we were to concur			that?	
	4 without having a basis for concurrence.		14	MR. LeFLEUR: That would be	
	5 We also in this e-mail reference			page 19 out of their study. The prior	
	6 these ATSDR studies that have been talked			one was page 77 out of their study.	
	7 about a bit here and some other studies		t	Page 77. And the as far as the soil's	
	.8 and several other matters, and this			portion, which is relevant to the NPL	
1	9 e-mail is available to anybody who would			listing, identifies arsenic and	
1	o like to have it. But I would like to at			benzo(a)pyrene, which is a product of a	
	1 least present a copy of the conclusions		l	coking operation, that the samples	
	2 that have been referred to by a number of		22	CHAIRMAN BROWN: Hold on one	
1	3 the Commissioners, the conclusions that		23	second.	
		Page 66			Page 68
	1 are in both the air study and the soil		1	VICE CHAIRMAN PHILLIPS: I'm not	
	2 study that was done by ATSDR. Now, once		2	C 1' '	
1	3 again, ATSDR is arguably the most		3	MR. LeFLEUR: I'm not sure. You	
1	4 qualified epidemiological organization in		4	may just have the air study if you pulled	
	5 the world. They are part of the Centers		1	it from	
	6 for Disease Control.		6	CHAIRMAN BROWN: I think we do;	
	7 VICE CHAIRMAN PHILLIPS: You're		7	we just have the air study.	
	8 going to read this to us; right?		8	MR. LeFLEUR: You just have the	
	9 MR. LeFLEUR: Well, let me put my		9	air study.	
1	.o glasses on and I'll read a hard copy that		10	CHAIRMAN BROWN: We just have the	ne
1	1 I've got or at least some portions of the		11	air study.	
1	.2 hard copy.		12	MR. LeFLEUR: Right. I did not	
1	3 But the air study, as was mentioned		13	provide I certainly would have and	
1	4 earlier, does indicate that there is a		14	will provide you, if you're interested,	
1	.5 possible impact to certain sensitive		15	the soil study. But on page 19 of the	
1	6 individuals, but the rest of the quote		16	soil study, they address the two high-	
1	.7 says, but not to the general public. And		1	concentration materials that potentially	
1	8 they have five conclusions in this. The		18	provide a health impact, and the	

18 they have five conclusions in this. The 19 conclusions go on. (2) says that -- that

20 the fine-particle prevalence is not --21 does not have harmful effects to general

22 public although in certain sensitive

23 individuals it may. Likewise, they

19 highlighted portions say "do not present 20 a public health hazard." That's the part

And so these are the two studies

23 that we referenced in the e-mail to the

21 that's been highlighted in there.

1	administrator. And like I say, we have		1	But there are obviously problems	
	to rely on those who are experts in the			here. The question is what is the cause	
	area and their published studies. We are			of those problems and how can they best	
	not equipped to second-guess what ATSDR			be addressed. The this is also I	
	comes up with.			wanted to use this, if I may, as a	
6	There was a third study that was			teaching moment to help people understand	
	referenced in the correspondence with			this process for NPL listing. EPA does	
	Administrator McCarthy, and it was a			not need concurrence of the state to list	
	study that was done by the Jefferson		9	a site on the National Priority List. It	
1	County Department of Health. And this			is not required that the state concur in	
	one is a little more readable. But it			order for it to be put on the list.	
	did an analysis of this area that was			There are three methods that it can be	
	being proposed for the NPL and they		13	put on the National Priority List. One	
	determined that the death rates for			is EPA can perform an arithmetic analysis	
	various types of cancer, all of the			which is called a hazardous ranking	
	cancers that they looked at, were			system study and that can be done	
	statistically the same for this area as		17	completely independent of the state.	
1	they were for the rest of Jefferson		18	They do not require state concurrence to	
	County. Now, obviously we want the		19	put it on the NPL.	
1	cancer rate to be as low as possible in		20	Second, the state can request that a	
1	all circumstances; but in this case, it		21	site be put on NPL. And, third, ATSDR	
22	is not material it is not		22	can determine that there is a human	
23	statistically any different than the rest		23	health hazard and that it should be	
		Page 70			Page 72
1	of the county. The same goes for asthma		1	listed on the NPL to be remediated.	
	and chronic obstructive pulmonary		2	Now, there are two ways that EPA can	
3	disease, COPD; they were statistically		3	obtain remediation once it's on the NPL.	
4	the same. And infant mortality,		4	The first way that they can do it is they	
5	stillbirths, and birth defects were		5	can find a responsible party or	
6	statistically the same. So in every		6	responsible parties plural. To date, EPA	
	case, they were statistically the same.		7	has not been able to identify a party	
8	We were aware of no studies that			that is determined to be a responsible	
9	indicated this site proposed human health		1	party. If a responsible party is found,	
10	hazards that would bring it to a level		1	that responsible party will pay the cost	
	where we could, with justification,		1	of the cleanup. That's in the	
	concur that it should be listed on the		1	regulations. That's the way it's	
1	NPL as a result of a human health hazard.		13	written.	
	There's a UAB study that was referenced		14	A second method that a site can be	
	also and that study clearly indicates		1	cleaned up is if it is what's called a	
	that there are increased incidents of			fund lead, which means the funds to clean	
	some ailments in the area. It did			up the site are available through the	
	indicate, though, that other factors			superfund that was created. Now, this is	
	needed to be studied, things that are		1	where a responsible party cannot be	
	normally associated with impoverished			identified. The first priority is to	
	communities, such as this is, things such			find a responsible party and get them to	
1	as alcohol, tobacco, drug use, prenatal			pay for the cleanup. Second, if they	
23	a care, things such as that.		23	can't find that, is to use superfund

Re: Request to Speak at December 12, 2014 Commission Meeting

Dear Chairman Brown,

I respectfully request permission to address the Commission at its December 12, 2014, meeting on behalf of GASP on the following topic:

ADDITION OF THE 35TH AVENUE SITE TO EPA'S NATIONAL PRIORITY LIST (NPL)

Intent: remediation of the 35th Avenue Site in North Birmingham Reality: little to no remediation without Superfund Fix: support addition of the 35th Avenue Site to the NPL

GASP is concerned that the Director's correspondence with the EPA, which erroneously asserts there is "no public health hazard at the 35th Avenue Site and therefore studies do not support listing on the NPL," could limit remediation at the 35th Avenue Site. The Commission should advise the Director to support the NPL designation as it will make additional federal funding available and better ensure a timely cleanup process of toxic pollutants found at the 35th Avenue Site. I intend to include a visual presentation and will provide it to the Commission seven days in advance of the meeting.

Sincerely,

Stacie M. Propst, PhD Executive Director
