

A photograph of a rocky cave entrance. The cave is dark and cavernous, with rough, grey rock walls. A stream of water flows through the center of the cave, creating a small waterfall. The water is clear and appears to be flowing over rocks. The lighting is dramatic, with the cave walls being dark and the water being illuminated. The overall scene is natural and serene.

WATER DOWN UNDER

Alabama's Ground Water Resources

This publication was developed as a
cooperative effort between the
Alabama Department of Environmental Management
and the
Geological Survey of Alabama
Printing was funded by
Legacy, Inc. Partners in Environmental Education

CONTENTS

	Page
Introduction	1
What is Ground Water?	2
What Is Ground Water Made of?	9
The Hydrologic Cycle	11
What are Aquifers?	14
Kinds of Aquifers	19
Sand or Sandstone	19
Limestone	21
Fractured Rock	23
Alabama's Aquifers	24
Coastal Plain	28
Piedmont	33
Valley and Ridge	34
Cumberland Plateau	36
Highland Rim	37
Ground Water Myths	39
Water Witching	39
Underground Streams and Lakes	40
Ground Water Contamination	41
Potential Contaminant Sources	43
Underground Storage Tanks	46
Septic Systems	48
Pesticides	51
Nitrates	52
Land Disposal	54
Trashing the Landscape	55
Underground Injection	56
Abandoned Wells and Boreholes	60
Ground Water Protection in Alabama	62
Perdido Ground Water Contamination	72
Glossary	78
Further Reading	84

TABLES

Table 1.	Potential sources of ground water contamination	45
2.	State and federal regulations affecting ground water protection	65
3.	Agencies with ground water programs	70
4.	Common household products and some of their hazardous components	74
