<p>4. Emission Monitoring</p> <p>(a) Emission testing shall be conducted annually to determine compliance with the applicable 40 CFR Part 60, Subpart KKKK emission standard for NO_x. Testing shall be conducted once per calendar year, with no more than fourteen (14) calendar months elapsing between tests. In accordance with 40 CFR §60.4340(a):</p> <p>(i) If the NO_x emission results from the above referenced performance test are less than or equal to 75% of the NO_x emission limit, then the frequency of subsequent performance tests may be reduced to once every two (2) years, with no more than 26 calendar months following the previous performance test.</p> <p>(ii) If the results of any subsequent performance test exceed 75% of the NO_x emission limit, then annual performance testing must be resumed until the unit demonstrates compliance for two (2) consecutive testing events demonstrating emissions are less than or equal to 75% of the NO_x emission limit, at which time two (2) year testing may resume.</p> <p>(b) The permittee shall perform subsequent emission testing once per calendar year to satisfy the Title V periodic monitoring requirement for the applicable 40 CFR Part 60, Subpart KKKK emission standard for NO_x, with no more than fourteen (14) calendar months elapsing between tests. The subsequent annual emission testing may be conducted using either an approved EPA Reference Method or with a portable analyzer. Periodic monitoring may be conducted concurrently with the annual or biennial EPA Reference Method test that is required by 40 CFR Part 60, Subpart KKKK. No periodic monitoring will be required if the unit does not operate for production purposes during the annual testing period.</p> <p>(c) Emission testing shall be conducted semiannually to determine compliance with the applicable PSD synthetic minor source emission standard for NO_x. Testing shall be conducted twice per calendar year at a frequency of once per semiannual period (January 1st - June 30th and July 1st - December 31st), with a minimum of three (3) calendar months elapsing between tests. The first emission testing conducted following the effective date of this permit shall be conducted in accordance with an approved EPA Reference Method for NO_x. All subsequent emission testing during the permit term may be conducted using either an approved EPA Reference Method for NO_x or utilizing a portable analyzer in accordance with a protocol/method approved in advance by the Air Division.</p>	<p>ADEM Admin.
