

APPROVAL AND REGISTRATION PROCEDURES FOR INCINERATORS:

Before an incinerator may be constructed and operated in the State of Alabama, it must first be approved by this Department. A unit can be approved by one of the following methods:

1. The incinerator model can be on the Department's approved list. By being on this list, it has been proven that a particular model can comply with the applicable regulations while burning a specific type of waste.
2. If the unit is not on the Department's approved list, the manufacturer may provide the Department with previously conducted Method 5 and 9 test results that indicate that the unit is capable of complying with applicable regulations while burning a specific type of waste. That unit can then be placed on the approved list and, therefore, can be approved for installation.
3. If no Method 5 and 9 have been performed on a specific model, the unit can be conditionally approved to be installed and operated with the understanding that Method 5 and 9 tests will be conducted at the expense of either the manufacturer or the facility installing the unit. If the results submitted are acceptable (indicating compliance), the unit's construction and operation will be approved and that model will be placed on the Department's approved list. If the test does not prove compliance, the unit must either be modified in some way in order to comply with the emission limit and retested or it must not be operated.

Attached is the necessary registration form for incinerators required by this Department. This form must be completed and submitted for approval to construct and operate an incinerator.

Registration Form for the *Construction, Installation, or Modification* of an Incinerator

FACILITY INFORMATION

Please Type or Print in Ink

(1) Name of Facility: _____

(2) Establishment Type (check one): Agriculture Industry Medical
 Restaurant Store Other (specify) _____

(3) Name of Incinerator Owner: _____

(4) Mailing Address to which Environmental Correspondence is to be Sent:

Name of Contact: _____

Street Address or P.O. Box: _____

City: _____ State: _____ Zip Code: _____

Telephone Number: (____) _____ Email Address: _____

(5) Physical Address of Incinerator:

Street Address: _____

City: _____ State: _____ Zip Code: _____

County: _____

(6) Name of Person Submitting Registration Form: _____

Title: _____ Telephone Number: (____) _____

Signature: _____ Date: _____

(7) Check one:

Existing Incinerator Date Installed: _____

New Incinerator Date to be Installed: _____

(8) Incinerator Manufacturer Information:

Name of Incinerator Manufacturer: _____

Incinerator Model/Number: _____

Name of Local Representative: _____

Street Address or P.O. Box: _____

City: _____ State: _____ Zip Code: _____

Telephone Number: (____) _____ Website/Email: _____

WASTE INFORMATION

(Please refer to the attached classification for type of waste.)

- (9) Type of waste to be incinerated: Circle 0 1 2 3 4 5 6 Other: _____
- (10) Describe, in detail, the composition of the waste to be incinerated: _____

- (11) Give a general description as to where the waste is generated: _____

- (12) Will any of the waste come from off premises? (check one) _____ Yes _____ No
If "Yes" is checked, please complete the following in detail:
 - (a) Origin of waste: _____
 - (b) Constituents of waste: _____
 - (c) Quantity to be incinerated: _____
- (13) Describe, in detail, how the remaining waste material from process will be disposed of?

- (14) By what means is the waste charged? (check one) _____ Batch _____ Periodically
_____ Continuous

OPERATING SCHEDULE INFORMATION

- (15) Average Operating Schedule:

Hours per day	Time	Days per Week	Circle Days	Weeks per year
	From: _____ To: _____		S M T W T F S	

- (16) Incinerator Capacity Information

- (a) Design Charging Rate: _____ pounds per hour
- (b) Maximum Charging Rate: _____ pounds per hour

INCINERATOR INFORMATION

- (17) **Stack height above grade:** _____ feet
Stack diameter: _____ feet
- (18) **Chamber Type** (*check one*): _____ Single Chamber _____ Multiple Chamber
_____ Other (*specify*) _____
- (19) **Burner controls** (*check one*): _____ Automatic _____ Manual
- (20) **Air Pollution Controls** (*check one*):
_____ Wet scrubber; _____ water flow rate in gal/hr.
_____ Precipitator
_____ Afterburner; _____ BTU/hr
_____ None
_____ Other (*specify*): _____
- (21) **Fuel Information**
- (a) **Type of Fuel** (*check one*): _____ Natural Gas _____ Propane _____ Fuel Oil
_____ Other (*specify*) _____
- (b) **Typical Heat Content of Fuel** (*BTU/lb, BTU/gal, BTU/SCF – specify units below*):

- (22) **Please include a detailed sketch of the incinerator and/or attach incinerator model information provided by the manufacturer. (EXAMPLE: brochures, illustrations)**

CLASSIFICATION OF WASTES

- Type 0** Trash, a mixture of highly combustible waste such as paper, cardboard, cartons, wood boxes, and combustible floor sweepings, from commercial and industrial activities. The mixtures contain up to 10% by weight of plastic bags, coated paper, laminated paper, treated corrugated cardboard, oily rags and plastic or rubber scraps.
- This type of waste contains 10% moisture, 5% incombustible solids and has a heating value of 8500 B.T.U. per pound as fired.
- Type 1** Rubbish, a mixture of combustible waste such as paper, cardboard, cartons, wood scraps, foliage and combustible floor sweepings, from domestic, commercial and industrial activities. The mixture contains up to 20% by weight of restaurant or cafeteria waste, but contains little or no treated papers, plastic or rubber wastes.
- This type of waste contains 25% moisture, 10% incombustible solids, and has a heating value of 6500 B.T.U. per pound as Fired.
- Type 2** Refuse, consisting of an approximately even mixture of rubbish and garbage by weight.
- This type of waste is common to apartment and residential occupancy consisting of up to 50% moisture, 7% incombustible solids, and has a heating value of 4300 B.T.U. per pound as fired.
- Type 3** Garbage consisting of animal and vegetable wastes from restaurants, cafeterias, hotels, hospitals, markets, and like installations.
- This type of waste contains up to 70% moisture, up to 5% incombustible solids, and has a heating value of 2500 B.T.U. per pound as fired.
- Type 4** Human and animal remains, consisting of carcasses, organs and solid organic wastes from hospitals, laboratories, abattoirs, animal pounds, and similar sources, consisting of up to 85% moisture, 5% incombustible solids, and having a heating value of 1000 B.T.U. per pound as fired.
- Type 5** By-product waste, gaseous, liquid or semi-liquid, such as tar, paints, solvents, sludge, fumes, etc., from industrial operations. B.T.U. values must be determined by the individual materials to be destroyed.
- Type 6** Solid by-product waste, such as rubber, plastics, wood waste, etc. from industrial operations. B.T.U. values must be determined by the individual materials to be destroyed.

**ALABAMA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT
APPROVED INCINERATOR LIST**

(Updated 09/13/2023)

This list is composed of incinerators capable of complying while burning the waste type indicated and while utilizing a specific type of fuel. Prior to purchasing an incinerator, you should confirm that it has been tested and approved while burning the correct waste type and while utilizing the type of fuel that will meet your needs. Upon installation of an incinerator, a completed registration form should be submitted to the Department.
