

Alabama Department of Environmental Management
Solid Waste Profile Sheet
Form 300

General Information

Profile Type (check one): New Certification Recertification Modification to Active Profile
Generator Name: _____
Generator Physical Address (location waste is generated): _____ City/State _____
Generator County: _____ EPA ID: _____
Generator Contact: _____ Title: _____
Phone: _____ Email: _____

Submitted by (if different from above):

Company Name: _____ Contact: _____
Phone: _____ Email: _____

Waste Information

Process Generating Waste: _____

Waste Name: _____

If this waste is subject to Corrective Action regulations 40 CFR Part 280 (UST) provide the following information:

UST Facility ID # _____ UST Incident # _____
Source of Petroleum Contamination (Gas, Diesel, Used Oil, Hydraulic Oil, etc.): _____
Does the waste contain any of the following: PCBs Cyanides Sulfides Asbestos
Concentration: _____ Units: mg/L mg/Kg PPM PPB
Waste Type: Remediation Process CERCLA Cleanup Other
Waste Volume: _____ Units: _____ Frequency: Annual Quarterly Monthly

Waste Properties

Physical State: Solid Liquid Bladeable Sludge Solid/Liquid Combination Other
% Free Liquids _____ pH (if liquid) _____ Flash Point (if liquid) _____
Will liquids be solidified prior to disposal (see instructions)? YES NO
Will liquids be solidified at landfill? YES NO

Waste Disposition

Is this Foundry Waste handled in accordance to ADEM Code 335-13-4-.26(3)? YES NO
Is this Wood Ash handled in accordance to ADEM Code 335-13-4-.26(6)? YES NO
Landfill Name #1: _____ Permit #: _____
Landfill Name #2: _____ Permit #: _____
Landfill Name #3: _____ Permit #: _____
Landfill Name #4: _____ Permit #: _____

Current Profile No. (if applicable) _____

Certification

I certify under penalty of law that this waste material does not contain regulated medical waste, regulated PCB waste, or hazardous waste which is not exempt from Division 14 Regulations. I further certify that, at the point of disposal, this waste material will not contain any free liquids. This document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Date

SOLID WASTE PROFILE SHEET INSTRUCTIONS

GENERAL INFORMATION

Indicate if the submittal is a new certification, recertification, or a modification to a current certification. A modification is a request for a change to a current certification when information relative to the waste stream has changed or additional information is added.

Enter the generating facility's name, 12-digit USEPA Identification Number (if a number has been assigned to this location), physical address **where the waste is generated**, to include the county name and where the waste is generated. Enter the name of the facility's contact person along with their official title, telephone number and e-mail address. This should be a person whom the Department can contact with questions regarding this certification or waste stream. Enter the name of the company and person making the profile submission, if it is different from the generator information. Include the contact person's telephone number and e-mail address.

WASTE INFORMATION

Enter a description of the process generating this waste stream along with the name of the waste. The description should be clear and include background or historical information that will enable the Department to determine whether the waste is a hazardous or non-hazardous waste. General processes (i.e. spill cleanup, plant cleanup, decontamination, accidental release, wastewater treatment sludge, contaminated debris) will require additional clarifications to ensure that the waste is properly classified. For example, wastewater treatment sludge is too generic since this sludge could be hazardous depending on how the wastewater was generated (i.e. sludge from the treatment of wastewaters from electroplating operations could be a F006 listed hazardous waste). If the waste is subject to the corrective action regulations of 40 CFR Part 280 (Underground Storage Tank Program), include the UST Facility Identification Number and the UST Incident Number (if applicable). If the waste is contaminated with a petroleum product, indicate the type of petroleum. Also, indicate if the waste contains PCBs, cyanides, sulfides, or asbestos by checking the appropriate box, and supply the concentration and units as well. If necessary, attach Material Safety Data Sheets or other documents (i.e. laboratory analysis results) that describe the composition of the waste. Please indicate the annual volume for disposal. Place an "X" in the box indicating if the waste is a Remediation, CERCLA, or Process waste.

WASTE PROPERTIES

Place an "X" in the box indicating the correct physical state of the waste. If the waste is a liquid or contains free liquid, include values for percent free liquids, pH, and flash point. Plus indicate whether or not the waste will be solidified prior to disposal.

If the waste is to be solidified, please identify where the solidification process will occur and the product used for solidification. Please attach a Material Safety Data Sheet for the product, if necessary.

WASTE DISPOSITION

If the waste is Foundry Waste or Wood Ash, indicate whether or not it is being used as fill material in accordance with the requirements of ADEM Admin. Code r. 335-13-4-.26(3) and/or (6). Supply the name(s) and permit number(s) of the intended landfill(s).

CERTIFICATION

The certification for submitted information must be signed and dated by an authorized representative of the company.

PROFILE/CERTIFICATION NUMBER

If this is a recertification or a modification to an existing certification, enter the six-digit profile number assigned to the profile by the Department.

E-mail or mail completed form, pertinent analyses, and applicable fees (specified in Division 1, Chapter 6 (335-1-6) of the ADEM Administrative Code) to:

wasteapprovals@adem.alabama.gov
