

Keeping Alabama's Waterways Trash Free

“Our mission at ADEM is to assure for all citizens of the State a safe, healthful, and productive environment.”

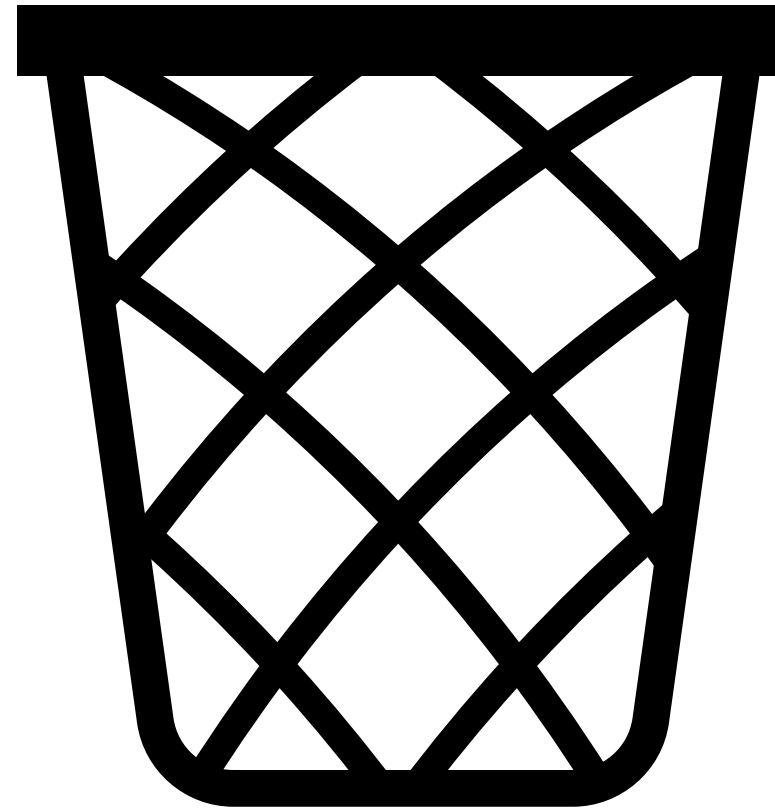

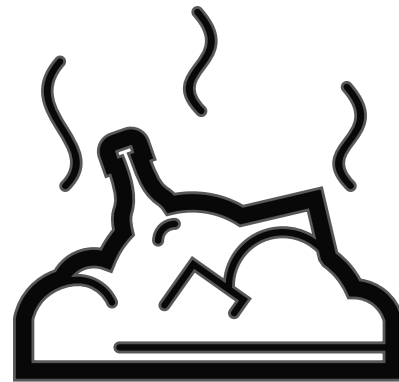

-ADEM

Did you know that throwing trash out the car window ends up in rivers and the oceans? Trash like this can wash down storm drains that connect from the road to the river and ends up polluting the oceans. This can harm animals in the water.

Always throw away your trash and never leave it on the ground

Trash Can

Always remember to put your trash in a trash can so that litter does not harm wildlife, and does not end up in waterways harming fish and turtles.
