Subject: **Voluntary Property Assessment Report
Smiles for Keeps Dentistry
5500 1st Avenue South
Birmingham, Jefferson County, Alabama
Bullock Environmental, LLC Project #: 26-SFKP01**

Dear Ms. Collins,

On behalf of M&D Dental Properties, LLC, a non-responsible party Applicant, Bullock Environmental, LLC (Bullock) submits the attached Voluntary Property Assessment Report for the above-referenced Site. As detailed in the attached document, the Site currently houses a family dental practice known as Smiles for Keeps, which M&D Dental Properties, LLC has leased since approximately March 2026.

The enclosed Voluntary Property Assessment Report details the activities completed to date and provides analytical results from the soil and groundwater assessment work conducted in January 2026 and demonstrates that the chemicals of concern detected in onsite soil, groundwater, and soil vapor do not pose a viable exposure risk to current or future occupants of the Site. As such, the recommendations set forth herein include the use of an environmental covenant as an appropriate remedy to achieve closure through the Alabama Voluntary Cleanup Program. The proposed environmental covenant would prohibit use of onsite groundwater for potable or irrigation purposes and limit the future use of the Site to commercial operations (i.e., prohibit the future use of the Site for residential purposes, including, but not limited to, schools, dwellings, homes, hospitals, child-care centers, nursing homes, playgrounds, recreation centers, or other areas/structures with sensitive human activity).

If you have any questions or comments regarding the attached Voluntary Property Assessment Report, please contact us at your convenience using the sources provided above. Alternatively, you may reach us via email at doug.bullock@bullockenvironmental.com. 🐼

Sincerely,
BULLOCK ENVIRONMENTAL, LLC

1.0 INTRODUCTION

1.1 SITE DESCRIPTION

The Site, located at 5500 1st Avenue South in Birmingham, Jefferson County, Alabama, comprises one parcel of land (approximately 0.51-acre) and is occupied by Smiles for Keeps Dentistry.

The Site is identified on the United States Geological Survey (USGS) 7.5-minute Topographic Quadrangle Birmingham North, Alabama, dated 2023 (included as **Figure 1**), and is located in the southwest quarter of the southwest quarter of Section 3, Township 20 South, Range 9 East in Birmingham, Jefferson County, Alabama (north latitude 33° 32' 20.17" and west longitude 86° 45' 7.11").

A Site Plan illustrating the onsite improvements is included as **Figure 2**. Properties surrounding the Site include light industrial development to the west, commercial development to the north, east, and south, followed by railroad rights-of-way to the southwest and west. 55th Street forms the western Site boundary while 1st Avenue South is located along the southern boundary. An area land use map is included as **Figure 3**.

1.2 SITE HISTORY AND PURPOSE

Based on a review of historical sources, the Site contained residential housing from at least 1902 and into the 1950s. In addition to the residential use, several gas station/auto repair occupants were identified during this time, including: Fifty Fifth Street Service Station (1930), Freeman Service Station (1935, 1940), Parker Service Station (1946), Wright Edw C Auto Repair (1946, 1952, 1961), and Wadsworth Service Station (1952, 1956). From the 1960s until the 1980s, commercial office/retail tenants occupied the site, including dry cleaning operations under the names American Peerless Laundries & Cleaners (1961) and Nifty One Hour Cleaners (1967, 1971). From the 1990s through the 2010s, the subject property appears to have been used as a parking lot for other adjoining businesses before being redeveloped with the existing subject structure in 2012. Since that time, Smiles For Keeps Dentistry has operated on the Site.

Bullock Environmental, LLC (Bullock) prepared this document on behalf of M&D Dental Properties, LLC to achieve the following objectives:

1. Demonstrate adequate assessment of Chemicals of Concern (COCs) in soil and groundwater on the Site to develop an appropriate remedial plan;
2. Evaluate onsite vapor intrusion risks on the Site;
3. Present the rationale for the use of an environmental covenant as appropriate remedy to protect human health and the environment;
4. Obtain Alabama Department of Environmental Management (ADEM) approval of this Voluntary Property Assessment Report; and
5. Following ADEM's approval of the Voluntary Property Assessment Report, establish appropriate institutional controls (through an environmental covenant) to mitigate potential exposure to COCs (if any) potentially remaining in onsite groundwater.

The following sections present the required elements of a Voluntary Property Assessment Report (as outlined in ADEM Administrative Code 335-15-4-.03) and detail the basis for recommending certain use *"restrictions such as land use controls, if appropriate to, satisfy the cleanup requirements for the qualifying property (ADEM Administrative Code 335-4-.04(1))."*

2.0 SUMMARY OF PREVIOUS ASSESSMENTS

Site investigations completed to date included the following:

- **Phase I Environmental Site Assessment (December 19, 2025):** This ESA identified the following *recognized environmental conditions* on the Site:
 - Historical use of the Site as a gasoline filling station with three gasoline underground storage tanks (USTs) and automotive repair operations (1930s to 1950s); and
 - Former use of the Site as a dry cleaning facility from the 1960s through the 1980s.

With these findings, further investigation was recommended on the Site (Phase I ESA included in **Appendix A**).

- **Phase II ESA (February 25, 2026):** Based on the findings from the Phase I ESA, a Phase II ESA was completed on the Site in January 2026, which included the following tasks:
 - Installation of five soil borings (MW-1 through MW-5) on the Site (see **Figure 2**) and the collection of soil samples from each location for analysis of volatile organic compounds (VOCs) according to Environmental Protection Agency (EPA) Method 8260;
 - Conversion of each soil boring into a temporary monitoring well (MW-1 through MW-5) and the collection of groundwater samples from each location for analysis of VOCs according to EPA Method 8260B;
 - Measurement of Site-wide groundwater flow; and
 - Collection of two sub-slab vapor samples beneath the building (see **Figure 2**) for analysis of VOCs according to EPA Method TO-15 and sub-slab and ambient air samples within the structure for radon analysis (in order to establish a site-specific attenuation factor [AF] for sub-slab vapor to indoor air).

The following sections detail the tasks completed in connection with each item listed above.

3.0 SCOPE OF WORK AND REPORT ORGANIZATION

3.1 SCOPE OF WORK

In accordance with ADEM Administrative Code 335-15-4-.03 and 335-15-4-04, this Voluntary Property Assessment Report includes the following:

335-15-4-.03 (2) (Voluntary Property Assessment Plan/Report Content)

A Voluntary Property Assessment Plan (and Report) submitted by an applicant shall describe in sufficient detail those actions planned to develop the information necessary to perform a risk assessment or identify applicable cleanup standards for the qualifying property utilizing requirements found in the Alabama Risk-based Corrective Action Guidance (ARBCA) Manual or other appropriate risk-based corrective action principles through the appropriate implementation of applicable response actions or land use controls. The (Report) should describe the methods to be used to determine the type(s) and the amount(s) of any contamination including the delineation of all soil and groundwater contamination discovered or known to exist within the qualifying property boundaries or portions thereof. Information submitted in the Voluntary Property Assessment (Report) shall be submitted in a format consistent with the Alabama Environmental Investigation and Remediation Guidance (AEIRG).

3.2 REPORT ORGANIZATION

Section 4.0 summarizes the Site characterization information and includes the general geology, hydrogeology, and lithology of the Site area while providing Site-specific information regarding COCs detected in onsite soil and groundwater. Section 5.0 describes the potential exposure mechanisms potentially affecting current and future occupants as a result of the COCs detected in onsite groundwater and demonstrates no viable exposure risks to be present. Section 6.0 presents conclusions and recommendations while Section 7.0 lists the reference sources cited throughout this Voluntary Property Assessment Report.

4.0 SITE CHARACTERIZATION AND FIELD INVESTIGATION RESULTS

4.1 SURROUNDING POPULATION

Properties surrounding the Site include light industrial development to the southwest, commercial development to the northwest, northeast, and southeast, followed by railroad rights-of-way to the south and southeast. 55th Street forms the southwestern Site boundary while 1st Avenue South is located along the southeastern boundary. An area land use map is included as **Figure 3**.

4.2 GEOLOGY AND HYDROGEOLOGY

According to the Geological Survey of Alabama (GSA) *Geologic Map of Alabama*, dated 1988, the Site is underlain by the Middle to Upper Cambrian-aged Conasauga Formation. This formation consists of interbedded dark gray shale and micritic limestone in the lowest exposed part. The middle and upper parts include dark gray, stylonodular, bioclastic, and oolitic limestone; the upper part is dolomitic.

Based on the interpretation of the *Birmingham North*, Alabama topographic quadrangle, shallow groundwater beneath the site is inferred to generally flow northwest toward Village Creek; however, water table elevation maps from investigation activities completed at the Site indicate groundwater flows east-northeast. **Table 1** summarizes the water table elevations measured on the Site.

A search of public and private water wells within one mile of the Site revealed one water well to be present within a one-mile radius (**Figure 4**); however, Bullock did not observe this well during reconnaissance. Details regarding the singular water well located within one mile of the Site are summarized below with well construction and installation dates for each well included in **Appendix B**.

- **Well W 13 (Connor Steel Corporation)**, formerly located approximately 1/2-mile southwest of the Site, was reportedly installed on September 14, 1934, to a depth of 335 feet below land surface (BLS) and has reportedly been used by the USGS as an observation well. No additional information was available regarding the length of use or date of abandonment (or whether it was abandoned).

Public water is supplied to the Site by Central Alabama Water (CAW) which obtains its water from various surface water intakes located on the Cahaba River, Lake Purdy, and Inland Lake. Likewise, the City of Birmingham maintains ordinances prohibiting the installation of a potable well on properties located within 100 feet of a water main (noting the Site's location adjacent to a water main and its use of municipal water supplied by CAW).

4.3 SITE SOILS

According to the United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Web Soil Survey, the Site is underlain by Tupelo-Urban land complex, 0 to 4 percent slopes. The Tupelo series consists of somewhat poorly drained silt loam and clay found on the foot slopes of flats and originating from clayey alluvium parent material derived from sedimentary rock. Urban land is a combination of soils that are so intermingled that they cannot be separately mapped. The original soils have been altered by grading, cutting, filling, and shaping the ground surface so that the natural soils cannot be determined. Soil strata encountered during previous investigations revealed underlying stratigraphy to comprise moderately dense to stiff, brown silty clay to a depth of approximately eight to nine feet BLS followed by orange silty clay (very stiff with increasing moisture at approximately 20 feet BLS) to a depth of approximately 30 feet BLS. Boring logs documenting the lithology encountered in each boring location are included in **Appendix A**.

4.4 UNDERGROUND UTILITY SURVEY

Known underground utilities at the Site include water, power, communication, storm sewer, gas, and sanitary sewer. Bullock personnel observed no evidence that underground utilities are functioning as conduits for potential contaminant transfer. Bullock personnel estimated the depths of onsite, subsurface utility lines to range from one foot to five feet BLS. **Figure 2** illustrates known subsurface utilities surrounding the Site. Likewise, during onsite drilling operations, Bullock observed no evidence of underground storage tanks (USTs) or petroleum-affected media on the southern side of the structure (in the area surrounding the former UST locations as illustrated on **Figure 2**).

4.5 RELEASE CHARACTERIZATION AND DISTRIBUTION OF COCS

Site Investigation activities completed in January 2026 revealed the following COCs to be present above applicable Regional Screening Levels (RSLs) or Maximum Contaminant Levels (MCLs) established by EPA.

4.5.1 Chemicals of Concern

The primary COC considered in this Voluntary Property Assessment Report included tetrachloroethylene (PCE) in groundwater and sub-slab vapor, which was the only compound detected above its applicable MCL or Vapor Intrusion Screening Level (VISL) established by EPA.

4.5.2 Distribution of COCs

Surficial Soil: Site investigations revealed no COCs to be present in surficial soil at concentrations exceeding applicable EPA RSLs (See **Table 2** and **Appendix C**).

Subsurface Soil: Analytical data for the soil samples collected to date revealed no COCs to be present in subsurface soil at concentrations exceeding applicable EPA RSLs (See **Table 2** and **Appendix C**).

Groundwater: The analytical results obtained from the groundwater samples collected to date reveal that PCE was present in monitoring wells MW-2, MW-3, and MW-4 at concentrations exceeding the MCL of 0.005 mg/L with concentrations of 0.008 mg/L (MW-2), 0.03 mg/L (MW-3), and 0.006 mg/L (MW-4).

No other VOCs were detected in groundwater at concentrations exceeding their respective laboratory reporting limits. COCs in groundwater are summarized in **Table 3** and illustrated on **Figure 5**.

Sub-slab Vapor: 11 VOCs were detected above laboratory reporting limits in the two sub-slab vapor samples (SS-1 and SS-2) collected beneath the building slab. Of those 11 compounds, chloroform and PCE were present in one sub-slab vapor sample (SS-1) at concentrations representing a potential vapor intrusion risk to current and/or future occupants of the Site. COCs in sub-slab vapor are summarized in **Table 4** and illustrated on **Figure 6**.

Copies of the laboratory analytical reports for the soil and groundwater samples collected during the January 26, 2026, monitoring event are included in **Appendix C**. Laboratory analytical results for the sub-slab vapor evaluation are included in **Appendix D**.

5.0 SOIL BORING & MONITORING WELL INSTALLATION & GROUNDWATER SAMPLING TASKS

The Site investigation followed ADEM's Alabama Environmental Investigation & Remediation Guidance (AEIRG) document, revised February 2017 and included the following tasks.

Bullock personnel oversaw its drilling subcontractor (Associated Topography, LLC) in the installation of five soil borings on January 23, 2026, each of which was subsequently converted into a temporary monitoring well (MW-1 through MW-5). Soil boring depths ranged from 24 to 30 below land surface (BLS). **Figure 2** illustrates the location of each soil boring and monitoring well installed during this investigation.

During drilling operations, field personnel used five-foot long stainless steel core samplers with five foot acetate liners and advanced each soil boring in five-foot increments to collect continuous soil samples from the ground surface until reaching the desired depth, decontaminating drilling rods and sampling equipment between each boring to prevent cross-contamination.

Following sample collection, Bullock personnel split a representative portion of each soil sample for chemical analysis, headspace screening, and lithologic classification. Each soil sample collected for chemical analysis was immediately placed in a pre-cleaned sample container supplied by the laboratory, labeled, and packed in a cooler with ice. Bullock delivered one soil sample from each boring location under proper chain-of-custody to Sutherland Environmental Laboratory in Birmingham, Alabama for analysis for VOCs according to EPA Method 8260B. Soil samples collected for headspace screening were placed in re-sealable plastic bags and allowed to equilibrate for a minimum of ten to 15 minutes, permitting sufficient vapors in the sample containers to accumulate. The containers were then screened with a photoionization detector (PID) and the headspace reading recorded. PID readings for each sample interval are included on the boring logs in **Appendix A**.

Bullock converted each soil boring into a temporary monitoring well for subsequent groundwater sampling. Temporary monitoring depths ranged from 24 feet BLS (MW-3) to 30 feet (MW-1). Each temporary monitoring well was constructed with 15 feet of threaded Schedule 40 PVC 0.010-inch slotted well screen, a compatible length of threaded Schedule 40 PVC riser, and a threaded PVC plug installed at the base of each well screen. The annular space around each well screen was then backfilled with a sand filter pack to two feet above the top of the screened interval and topped with up to two feet of bentonite, which was then hydrated to form a competent seal within the annular space surrounding the well casing material. Boring logs with soil descriptions and monitoring well construction details are included in **Appendix A**.

Following installation, field personnel returned to the Site on January 26, 2026, and collected groundwater samples from each location for analysis of VOCs according to EPA Method 8260B.

5.1 ANALYTICAL RESULTS OF SOIL SAMPLING ACTIVITIES

The analytical results for the soil samples collected during this assessment were compared to the EPA-established RSLs for commercial and residential soil established by the EPA (November 2024). The results indicated no VOCs to be present in soil at concentrations exceeding laboratory reporting limits. COCs in soil are summarized in **Table 2**. A copy of the laboratory analytical report for the soil samples is included in **Appendix C**.

5.2 ANALYTICAL RESULTS OF GROUNDWATER SAMPLING ACTIVITIES

The analytical data for the groundwater samples collected during this assessment were compared to the EPA MCLs or to EPA RSLs for tap water, November 2024 (in the absence of a published MCL). The results indicated PCE to be present in three monitoring wells (MW-2, MW-3, and MW-4) at concentrations exceeding the EPA-established MCL of 0.005 milligrams per liter (mg/L). PCE was measured at a concentration of 0.006 mg/L in monitoring well MW-4, 0.008 mg/L in monitoring well MW-2, 0.03 mg/L in monitoring well MW-3. No other VOCs were detected in onsite groundwater at concentrations above laboratory reporting limits. While PCE was present above the EPA-established MCL in onsite groundwater, these concentrations do not represent a viable risk based on the Site's use of potable water supplied by the City of Birmingham (CAW). Likewise, City of Birmingham ordinances prohibit the installation of potable water well on a property if that property is located within 100 feet of a water main. Given the Site's location relative to the adjacent water main (maintained by the City of Birmingham), groundwater underlying the Site cannot be used for potable purposes.

COCs in groundwater are summarized in **Table 3** and depicted on **Figure 5**. A copy of the laboratory analytical report for the groundwater samples is included in **Appendix C**.

6.0 EVALUATION OF VAPOR INTRUSION RISKS

While ingestion of groundwater beneath the Site is prohibited (eliminating the exposure pathway for ingestion), this Phase II ESA also included an evaluation of soil vapor beneath the structure to better understand potential vapor intrusion risks related to former gasoline station and dry cleaner operations). To that end, Bullock personnel installed two sub-slab vapor points beneath the floor of the structure and collected vapor samples for analysis of VOCs according to EPA Method TO-15. Bullock also collected sub-slab and ambient air samples at each location for analysis of radon in an effort to establish a site-specific attenuation factor (AF) for future exposure modeling purposes, if needed. Sub-slab vapor sampling locations are illustrated on **Figure 2**.

The sub-slab vapor samples, combined with the differential between radon concentrations beneath the slab relative to those detected in ambient air within the building, were then used to evaluate the attenuation of VOC vapors from the subsurface into the structure and develop an estimate regarding the potential vapor intrusion risks to current and future occupants of the Site.

6.1 ANALYTICAL RESULTS OF SUB-SLAB VAPOR SAMPLING ACTIVITIES

Review of the data summarized in **Table 4** (and detailed in the analytical results contained in **Appendix D**) reveals 11 VOCs were detected above laboratory reporting limits in the two sub-slab vapor samples collected beneath the building slab. Of those 11 compounds, chloroform and PCE were present in one

sub-slab vapor sample (SS-1) at concentrations representing a potential vapor intrusion risk to current and/or future occupants of the Site. Chloroform was detected in sub-slab vapor sample SS-1 at a concentration of 20 micrograms per cubic liter ($\mu\text{g}/\text{m}^3$) while PCE was detected at a concentration of 820 $\mu\text{g}/\text{m}^3$. Subsequent sections detail the results obtained from the use of EPA's default AF values versus the use of a Site-specific AF (and the regulatory basis for its use) in the evaluation of potential vapor intrusion risks on the Site. **Figure 6** illustrates each sub-slab vapor sample point installed on the Site and includes the concentrations measured in each location.

6.2 USE OF SITE-SPECIFIC AF VERSUS EPA DEFAULT AF

EPA's Office of Solid Waste and Emergency Response (OSWER) *Technical Guide for Assessing and Mitigating the Vapor Intrusion Pathway from Subsurface Vapor Sources to Indoor Air* (June 2015) distinguishes between two distinct levels of vapor intrusion assessments:

1. A preliminary analysis, which utilizes available and readily ascertainable information to develop an initial understanding of the potential for human health risks to be posed by vapor intrusion, would typically be performed as part of an initial site assessment; and
2. A detailed investigation, which is generally recommended when the preliminary analysis indicates that subsurface contamination with vapor-forming chemicals may be present underlying or near buildings. A detailed investigation of the vapor intrusion pathway is typically performed as part of the site investigation stage.

The approach for assessing vapor intrusion will vary from site to site, because each site will differ in the available data when vapor intrusion is being evaluated. Therefore, EPA's June 2015 Guidance recommends a framework for planning and conducting vapor intrusion investigations, rather than a prescriptive step-by-step approach to be applied at every site.

When deriving a Site-specific AF for Sub-slab to Indoor Air, identifying the rate of attenuation of soil gas to indoor air is a critical step in estimating indoor air concentrations from levels detected in sub-slab soil gas. The AF is computed as the VOC indoor air concentration divided by the corresponding concentration in sub-slab soil gas:

$$\text{AF} = \frac{C_{\text{Indoor}}}{C_{\text{sub-slab}}}$$

Where:

AF = attenuation factor (unitless)

C_{Indoor} = indoor air concentration ($\mu\text{g}/\text{m}^3$)

$C_{\text{sub-slab}}$ = sub-slab soil gas concentration ($\mu\text{g}/\text{m}^3$)

The smaller the AF, the more attenuation is occurring. In a practical sense, the AF is the measure of how soil and building properties limit the intrusion of organic vapors as they migrate into a structure. The objective in estimating an empirical AF for VI is to minimize bias resulting from aboveground background sources of VOCs and low-source strengths. An estimate can be developed by applying appropriate VOC data filters, using tracer compounds (e.g., radon), or both (*Use of Radon to Determine Attenuation between Subslab and Indoor Air for Vapor Intrusion Evaluation at Military Housing Units at Fort Wainwright, Alaska, 2009*).

Using the EPA default AF of 0.03, the predicted concentration of each compound in indoor air within the structure on the Site is as follows:

$$C_{ia} = \frac{C_{\text{sub-slab}}}{AF}$$

Chloroform:

$C_{ia}(\text{Chloroform}) = 0.6 \mu\text{g}/\text{m}^3$ ($20 \mu\text{g}/\text{m}^3 / 0.03$). *EPA Commercial RSL for Chloroform in indoor air: **0.53 $\mu\text{g}/\text{m}^3$** .*

PCE:

$C_{ia}(\text{PCE}) = 24.6 \mu\text{g}/\text{m}^3$ ($820 \mu\text{g}/\text{m}^3 / 0.03$). *EPA Commercial RSL for PCE in indoor air: **18 $\mu\text{g}/\text{m}^3$** .*

As indicated above, the sub-slab concentration measured beneath the building slab indicates a predicted indoor air concentration for chloroform and PCE exceeding the EPA-established RSL.

6.3 PREDICTED INDOOR AIR CONCENTRATIONS USING SITE-SPECIFIC AF

EPA has established a default AF equal to 0.03 (Section 6.5.3 of the OSWER Publication 9200.2-154, *Technical Guide for Assessing and Mitigating the Vapor Intrusion Pathway from Subsurface Vapor Sources to Indoor Air*, June 2015). However, this default value, characterized by EPA as “a conservative generic value,” is intended for initial screening purposes. With regard to the VISL Calculator (2015a), Section 1.4.2 of the same guidance document states that EPA developed this tool to facilitate the “calculation of site-specific screening levels and/or candidate cleanup levels based on user-defined target risk levels, exposure scenarios, and **semi-site-specific or site-specific attenuation factors**.” As such, the collection of site-specific data is encouraged to develop a more accurate Site Conceptual Exposure Model (SCEM).

Using the Site-specific AF derived from the comparison of radon in ambient air to that of radon in sub-slab vapor yielded a value of 0.0089, approximately one-third of the default value assigned by EPA (See **Table 4**). Incorporation of the Site-specific AF into the same equation shown above yielded the following predicted indoor air concentrations:

Chloroform:

$C_{ia}(\text{Chloroform}) = 0.178 \mu\text{g}/\text{m}^3$ ($20 \mu\text{g}/\text{m}^3 / 0.0089$)-EPA Commercial RSL: $0.53 \mu\text{g}/\text{m}^3$.

PCE:

$C_{ia}(\text{PCE}) = 7.298 \mu\text{g}/\text{m}^3$ ($820 \mu\text{g}/\text{m}^3 / 0.0089$)-EPA Commercial RSL: $18 \mu\text{g}/\text{m}^3$.

As demonstrated above, use of the Site-specific AF results in predicted indoor air concentrations for chloroform and PCE which are below their respective EPA-established RSLs for ambient air in a commercial setting. **Appendix D** includes the results for each ambient air and sub-slab vapor sample analyzed for radon as well as the basis for calculating the Site-specific AF.

6.4 CALCULATION OF CUMULATIVE RISK FROM ALL DETECTED VOCs IN SUB-SLAB VAPOR

In addition to the calculation of predicted indoor air concentrations using the Site-specific AF (detailed above), Bullock also used EPA’s VISL Calculator to predict the cumulative risk related to all VOCs detected in sub-slab vapor using EPA’s default AF of 0.03 and the Site-specific AF derived from the sub-slab/ambient air radon couplet samples (0.0089). As summarized below and detailed further in **Appendix**

E, the predicted cumulative risk associated with all detected compounds using the EPA default value of 0.03 indicates the following:

EPA Default AF of 0.03:

Cumulative Excess Lifetime Cancer Risk (ELCR) for all VOCs measured in sub-slab vapor: 1.97 E-6
Cumulative Hazard Quotient (HQ) for all VOCs measured in sub-slab vapor: 0.279

Incorporation of the Site-specific AF (0.0089) into the VISL Calculator, however, indicates the following predicted cumulative ELCR and HQ risks:

Cumulative ELCR for all VOCs measured in sub-slab vapor: 5.85 E-7
Cumulative HQ for all VOCs measured in sub-slab vapor: 0.0829

As indicated above, use of the Site-specific AF results in a reduction of overall cumulative risk by a factor of approximately 3.4X.

7.0 CONCLUSIONS AND RECOMMENDATIONS

Based on the information presented in this Voluntary Property Assessment Report, investigations completed to date revealed low levels of certain chlorinated VOCs in onsite groundwater (PCE) and sub-slab vapor (chloroform and PCE), likely associated with former dry cleaning operations, which reportedly occurred in the 1960s and 1970s. The concentrations detected in these media do not appear to represent a risk to current or future occupants of the Site (given its continued use for commercial purposes). PCE, while present in onsite groundwater at concentrations exceeding the EPA-established MCL, does not represent a viable exposure risk to current or future occupants via ingestion. Likewise, while chloroform and PCE were detected in sub-slab vapor at concentrations suggestive of a potential risk to current or future commercial occupants, the Site-specific AF (derived from the collection of sub-slab and ambient radon samples) documented no viable risk to commercial receptors to be present. These results were further validated by the cumulative risk output from the VISL Calculator, which accounted for all regulated VOCs detected in sub-slab vapor.

With these conclusions, further investigation does not appear warranted on the Site. As such, M&D Dental Properties, LLC will submit a draft environmental covenant for review and approval by ADEM. The environmental covenant will include the following land use restrictions (to be incorporated onto the deed):

1. The use of groundwater for potable or irrigation purposes from or on the Site is prohibited; and
2. Use of the Site shall be limited to commercial/industrial activities (i.e., residential housing, schools, daycares, hospitals, etc. shall be prohibited).

Following ADEM's approval of the draft environmental covenant, the approved Voluntary Property Assessment Report and draft environmental covenant will be placed on public notice for a period of 30 days before final approval of the conclusions and recommendations set forth herein. Upon execution of the environmental covenant by ADEM and M&D Dental Properties, LLC, Bullock will deliver a *Certification of Compliance* to ADEM on behalf of M&D Dental Properties, LLC and request a *Letter of Concurrence* to formalize the conclusion of the Alabama VCP process.

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental professional* as defined in §312.10 of 40 C.F.R. 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Notes / Recommendations: To understand the property and report, you must read the Executive Summary and complete report.

We have performed a Phase I Environmental Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the commercial property located at Smiles for Keeps, LLC in Birmingham, Jefferson County, Alabama 35212. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property, except for the following:

Recognized Environmental Conditions

- (1) Based on a review of historical sources, the subject property consisted of residential occupants from at least 1902 and into the 1950s. Along with the residential use, several gas station/ auto repair occupants were identified during this timeframe, including: Fifty Fifth Street Service Station (1930), Freeman Service Station (1935, 1940), Parker Service Station (1946), Wright Edw C Auto Repair (1946, 1952, and 1961), and Wadsworth Service Station (1952, 1956). From the 1960s to the 1980s, commercial office/ retail tenants occupied the subject property, including dry cleaning operations under the names American Peerless Laundries & Cleaners (1961) and Nifty One Hour Cleaners (1967, 1971). From the 1990s through the 2010s, the subject property appears to have been used as a parking lot for other adjoining businesses before being redeveloped with the existing subject building in 2012 for use as a dental office that has been occupied by Smiles for Keeps since construction.

Furthermore, fire insurance maps from 1930 and 1950 depict the subject property as consisting of a gasoline filling station with three "G.T.s" - gasoline underground storage tanks (USTs), in the south corner. No repair operations were indicated in 1930; however, an extension to the northwest of the filling station building was constructed by 1950, which was potentially a repair shop. In addition, a second structure with a canopied roof was depicted in 1950 along the west side at 5504 ½ South 55th Street and was labelled as auto repair. Additionally, the EDR environmental database identified the subject property address as a historic auto facility in 1935, 1940, 1946, 1952, and 1956. No information is known about the tanks depicted.

As no documentation investigating the above-mentioned former operations and potential features associated with the former operations (e.g., gas tanks), the historical use of the subject property as a gasoline filling station with three gasoline USTs, automotive repair, and dry cleaning is a potential environmental concern. Property Solutions recommends further investigation.

1.0 INTRODUCTION

Property Solutions Inc. (Property Solutions) conducted a Phase I Environmental Assessment of the commercial property located at 5500 1st Avenue South in Birmingham, Jefferson County, Alabama 35212 (subject property) at the request of Bank of America. Bank of America is considered the User, as defined in ASTM E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The subject property is identified as Parcel 23 00 21 4 008 007.000, according to the Jefferson County Tax Assessor.

A property location map is included in Appendix A.

This Phase I Environmental Assessment was conducted in general accordance with Bank of America, NA's General Services Agreement Number CW481009, dated November 12, 2013. The work was authorized by the Standard Engagement Letter (SEL), dated November 21, 2025, for BOA Project Number – 25-004974-ENV-004.

Per the ASTM practice and throughout this report, the Client will be considered the same as the User in the ASTM E1527-21 practice.

1.1 Purpose

The purpose of a Phase I Environmental Assessment is to evaluate issues that may have an impact on the subject property and to meet the purpose of Bank of America, NA's General Services Agreement Number CW481009, dated November 12, 2013, and the ASTM E1527-21 practice. The purpose is further described in Section 8.4. This report is for the purpose of determining whether to make a loan evidenced by a note secured by the property.

1.2 Scope of Work

This Phase I Environmental Assessment was conducted in accordance with Bank of America, NA's General Services Agreement Number CW481009, dated November 12, 2013, and the Bank of America, Standard Scope of Work, Phase I Environmental Assessment, dated February 2023 REV 1.

1.3 Significant Assumptions

The significant assumptions made by Property Solutions in this report are per Bank of America, NA's General Services Agreement Number CW481009, dated November 12, 2013, ASTM E1527-21 practice, and as described further in Section 8.5.

1.4 Special Terms and Conditions

This Phase I Environmental Assessment was prepared in accordance with the stated and agreed upon Scope of Work. This Phase I Environmental Assessment was prepared in accordance with Bank of America, NA's General Services Agreement Number CW481009, dated November 12, 2013. Special terms and conditions are described in Section 8.6.

1.5 Reliance

Bank of America, N.A., its employees, agents, successors, and assigns may rely upon this report in evaluating a request for an extension of credit to be secured by the subject property. This report may also be used and relied upon by (a) any additional lender extending credit to be secured by the subject property (the credit to be extended by Bank of America, N.A. and such additional lender is referred to as the (Mortgage Loan”) and (b) any actual or prospective purchaser, transferee, assignee, or servicer of the Mortgage Loan (or any portion thereof), any actual or prospective investor (including agent or advisor) in any securities evidencing a beneficial interest in or backed by the Mortgage Loan (or any portion thereof), any rating agency actually or prospectively rating any such securities, any indenture trustee, and any institutional provider(s) from time to time of any liquidity facility or credit support for such financing. In addition, this report or a reference to this report may be included or quoted in any offering circular, private placement memorandum, registration statement or prospectus and Property Solutions agrees to cooperate in answering questions by any of the above parties in connection with a securitization or transaction involving the Mortgage Loan (or any portion thereof) and/or such securities. This report has no other purpose and should not be relied upon by any other person or entity.

1.6 Data Gaps

The following data gaps were identified during this Phase I Environmental Assessment:

- User provided information and responsibilities
- Historical property information
- Environmental record search and governmental records

Specific information concerning data gaps is presented in each applicable section of this report.

None of the above data gaps are considered significant.

2.0 GENERAL PROPERTY CHARACTERISTICS

2.1 Property Location

Property Location	
Property Name	Smiles for Keeps, LLC
Property Address	5500 1st Avenue South
Property Town, County, State, Zip	Birmingham, Jefferson County, Alabama 35212
Property Tax Identification	23 00 21 4 008 007.000 (Jefferson County Tax Assessor)
Property Topographic Quadrangle	<u>Birmingham North, Alabama</u>
Nearest Intersection	1 st Avenue South and 55 th Street North
Area Description	Highly developed, residential, commercial, and industrial

An excerpt from the USGS 7.5-minute series topographic quadrangle map of Birmingham North, Alabama, locating the subject property, is included in Appendix A.

2.2 Adjacent Properties

Review of neighboring properties from the subject property and from public thoroughfares, and research of available information regarding the neighboring properties, were performed to identify evidence of environmental concerns that could adversely impact the subject property. The subject property is located in a residential, commercial, and industrial area of Birmingham, Alabama.

Direction	Property	Address	Operations
North	James Rushton Early Learning and Family Success Center	5512 1 st Avenue South / 5512 55 th Street South	Preschool
South	1 st Avenue South	N/A	Public thoroughfare
	55 th Street South	N/A	Public thoroughfare
East-southeast	1 st Avenue South	N/A	Public thoroughfare
	B&B Auto Sales	5501-5507 1 st Avenue South / 99 55 th Street South	Used car dealer
West	55 th Street North	N/A	Public thoroughfare
	Family Dollar	5401 1 st Avenue North	Dollar store
Southwest	55 th Street North	N/A	Public thoroughfare
	Help 2 Others Foundation	10 55 th Street South	Non-profit organization

Based on a review of neighboring properties from the subject property and from public thoroughfares, the neighboring properties do not appear to be of the type likely to pose a significant threat to the environmental condition of the subject property. The neighboring properties were not listed in the environmental database reviewed or Envirofacts, with the exception of the following:

- 5512 1st Avenue South – ICIS-NPDES;
- 5501-5507 1st Avenue South – UST, UST Finder, Financial Assurance, and EDR Hist Auto
- 5401 1st Avenue North – EDR Hist Auto
- 10 55th Street South – RCRA Non-Generator

Based upon a review of the environmental database, the neighboring properties are not listed as having a known, suspected, or documented release; therefore, no further action is recommended at this time. These properties are further discussed in Section 4.3.

A property diagram including neighboring properties is included in Appendix B. Photographs including the neighboring properties are included in Appendix C.

2.3 Property Description

Property Information	
Property Ownership Name	SFK Properties LLC (Jefferson County Tax Assessor)
Date of Acquisition	July 1, 2011 (Jefferson County Tax Assessor)
Property Acreage	0.51-acres (Jefferson County Tax Assessor)
Property Shape	Irregular
Property Use	Dental office
Number of Buildings	One
Number of Stories	One
Construction Date	2012 (Jefferson County Tax Assessor)
Building Square Footage	3,088 square feet (Jefferson County Tax Assessor)
Basement/Slab-on-grade	Slab-on-grade
Number of Units	One
Ceiling Finishes	Ceiling tile, drywall
Floor Finishes	Concrete
Wall Finishes	Drywall
HVAC (Energy Source & Type of System)	Electricity
Renovation Date	N/A
Renovation Description	N/A
Vehicular Access	Via driveways along the northeast and northwest sides of the subject property
Other Improvements	None
Property Coverage	Footprint of the subject building, associated parking areas, lawn areas, and landscaping

No vacant units were reported by the property escort or identified during the property visit.

A property diagram of the subject property is included in Appendix B.

2.4 Property Operations

SFK Properties LLC utilizes the subject property as a dental office for adults and children under the name Smiles for Keeps (SFK). Basic services include dental cleaning, digital X-rays, and light organ surgery. SFK has operated as a dental office onsite since construction of the subject building in 2012.

No industrial or manufacturing operations were observed at the subject property at the time of the property visit.

No environmental concerns were identified at the subject property based on the operations observed during the property visit.

2.5 Utilities

Property Solutions was informed by Ms. Mary McSpadden, President of Smiles for Keeps, that the following companies and municipality or authorities currently provide utility services to the subject property:

Utility	Provider
Electricity	Alabama Power
Natural Gas	Not provided to subject property
Sanitary Sewerage	Birmingham Water Works Board
Potable Water	Birmingham Water Works Board
Solid Waste Removal	Moore Coal Co, Inc.
Fuel Oil	Not provided to subject property
Steam	Not provided to subject property

3.0 ENVIRONMENTAL SETTING

3.1 Regional Physiographic Conditions

Topographic Quadrangle Name	<u>Birmingham North, Alabama</u>
Property Elevation	Approximately 644 feet above mean sea level
Surface Gradient	Northwest
Property Drainage	Storm drains and overland flow
Regional Drainage	Coosa River approximately 26 miles east
Closest Perennial Water body	Lake Purdy approximately seven miles southeast

A copy of the USGS 7.5-minute series topographic quadrangle map of Birmingham North, Alabama is included in Appendix A.

3.2 Soil Conditions

USDA County Soil Survey	
Information Source	USDA Natural Resources Conservation Service's Web Soil Survey
Date of Information Source	December 1, 2025
Soil Name	Tupelo-Urban land complex, 0 to 4 percent slopes (43)
Description: The Tupelo series consists of somewhat poorly drained silt loam and clay found on the foot slopes of flats and originating from clayey alluvium parent material derived from sedimentary rock. Urban land is a combination of soils that are so intermingled that they cannot be separately mapped. The original soils have been altered by grading, cutting, filling, and shaping the ground surface so that the natural soils cannot be determined.	
Expected depth to bedrock	Greater than 80 inches

3.3 Geologic Conditions

Information Source	Geological Survey of Alabama
Title of Publication	<u>Geology of the Birmingham North 7.5-Minute Quadrangle, Jefferson County, Alabama</u>
Date of Publication	2006
Name of Unit	Ketona Dolomite (Ck)
Description of Unit: Light- to medium-gray, thick-bedded, finely to coarsely crystalline dolomite.	

3.4 Groundwater Conditions

Information Source	United States Geological Survey
Title of Publication	<u>Ground Water Atlas of the United States – Segment 6</u>
Date of Publication	1990
Underlying Aquifer	Valley and Ridge carbonate rock aquifers
Description: Aquifers in the Valley and Ridge physiographic province consist of permeable geologic formations within folded and faulted Paleozoic sedimentary rocks. Carbonate-rock units that are productive aquifers in Segment 6 include the Chickamauga, Knox, and Conasauga Groups, which yield 10 to 50 gallons per minute and are the source of numerous springs. The carbonate rocks are productive aquifers primarily because of the ease with which solution openings develop in the easily dissolved limestone and dolomite. These openings, which originate as bedding planes and joints in the carbonate rocks, are enlarged by percolating, slightly acidic ground water, and become linked as a series of conduits that transmit large volumes of ground water rapidly through the carbonate rocks.	

Expected Depth to Shallow Groundwater	Approximately 30 feet bgs
Information Source	EDR GeoCheck
Expected Direction of Shallow Groundwater Flow	Northwest
Information Source	7.5-minute series topographic quadrangle map of <u>Birmingham North, Alabama</u>

4.0 RESULTS OF INVESTIGATION

4.1 Property Visit Observations

Property Visit Date	December 4, 2025
Property Solutions Personnel and Title	Mr. Nicholas Daigle, Environmental Scientist
Property Escort Name	Ms. Mary McSpadden
Property Escort Title	President/Co-Founder
Property Escort Company	Smiles for Keeps
Property Escort Affiliation	Owner/operator
Property Escort Years of Association with Subject Property: Approximately 14 years	
The presurvey questionnaire (PQ) was completed.	
Person Completing PQ Name	Ms. McSpadden
Person Completing PQ Company	Smiles for Keeps

Property Visit Date	December 4, 2025
Person Completing PQ Affiliation	Owner/operator
Inaccessible Areas and Reason: None	
Weather Conditions: Overcast	Approximate Temperature: 50 degrees F
No weather conditions limiting observations were noted.	
Describe Limiting Conditions Present: None	

Property Solutions observed the following areas during the property visit:

- Building observed – 5500 1st Avenue South subject building
- Areas observed – Common areas, lobbies, hallways, patient rooms, mechanical and utility areas
- Down units observed – None
- Unoccupied units observed – None
- Occupied units observed – Smiles for Keeps
- Exterior grounds including the periphery of the subject property and subject building
- Adjoining properties from public rights-of-way

Property Solutions did not make observations under floors, above ceilings, or behind walls.

Photographs taken during the property visit are included in Appendix C.

4.1.1 ASTM Scope Considerations

4.1.1.1 Underground Storage Tanks

No evidence of underground storage tanks (USTs) was observed on the subject property during the property visit. Ms. Mary McSpadden was not aware of USTs on the subject property.

Review of historic fire insurance maps depicts the subject property as previously consisting of a gas station with three gas tanks in 1930 and 1950. Property Solutions also notes that the EDR environmental database identified the subject property address as a historic auto facility in 1935, 1940, 1946, 1952, and 1956. No information about the tanks is known. See Section 4.4.2 for additional discussion.

4.1.1.2 Oil and Gas Wells and Pipelines

No evidence of existing or historic high-pressure natural gas or liquid petroleum transmission pipelines or wells was observed on the subject property. Review of available property maps and other research materials did not reveal the presence of existing or historic easements for high-pressure natural gas or liquid petroleum transmission pipelines or wells on the subject property.

No further action is recommended.

4.1.1.3 Aboveground Storage Tanks

No aboveground storage tanks (ASTs) were observed on the subject property during the property visit. Ms. Mary McSpadden was not aware of ASTs on the subject property.

Based upon the above information, no further action is recommended.

4.1.1.4 Polychlorinated Biphenyl-Containing Electrical Equipment

A visual review was conducted for the presence of electrical equipment that could contain polychlorinated biphenyls (PCBs); an environmentally regulated material used in dielectric fluid in some electrical equipment. Alabama Power provides electrical service to the subject property.

No transformers, capacitors, or large switch gear equipment were observed on the subject property during the property visit.

Based upon the above information, no further action is recommended.

4.1.1.5 Hydraulic Equipment

No evidence of hydraulic equipment was observed on the subject property during the property visit. Ms. Mary McSpadden was not aware of hydraulic equipment on the subject property.

Based upon the above information, no further action is recommended.

4.1.1.6 Chemical, Hazardous Materials, and Raw Materials Storage and Usage

Chemicals stored on the subject property include minimal quantities of domestic cleaning chemicals, paints, and other maintenance supplies in quantities of five gallons or less. Property Solutions also observed ten gas cylinders containing oxygen and nitrous oxide. Containers found on the subject property during the property visit were observed to have no leaks or spills and appeared to be properly stored.

Based upon the above information, no further action is recommended at this time.

4.1.1.7 Waste Generation, Storage, and Disposal

Solid waste generated at the subject property consisted of domestic municipal waste and recyclable materials. Solid waste at the subject property is stored in trash cans and a dumpster located on the subject property. Municipal solid waste generated at the subject property is removed by Moore Coal Co, Inc. Sanitary waste generated at the subject property is discharged to the City of Birmingham sanitary sewerage system.

No evidence of hazardous waste generation, storage, or disposal was observed during the property visit. Ms. Mary McSpadden was not aware of hazardous waste generation on the subject property.

Based upon the above information, no further action is recommended.

4.1.1.8 Wells, Sumps, Pits, and Floor Drains

No wells, sumps, or pits were observed on the property during the property visit. Ms. Mary McSpadden was not aware of wells, sumps, or pits on the subject property.

One floor drain was observed in a utility closet within the subject building. No staining was observed around or near the drain. Chemical storage was not observed in the proximity of the floor drain. According to Ms. Mary McSpadden, the floor drain discharges to the municipal sanitary sewerage system. No concerns were identified with regard to the floor drain located in the subject building.

There is an Amalgam separator connected to the drain. The vacuum system filters mercury used in dental fillings from water and stores it into a container. Once full, the container is removed by Solmetex. There was no evidence of a leak from the amalgam separator and the filter did not appear to be full. The filtered water discharged to the drain is non-hazardous.

Based upon the above information, no further action is recommended.

4.1.1.9 Stormwater Runoff and Surface Water

The subject property is improved with the footprint of the subject building and associated paved parking areas. The remainder of the subject property consists of limited landscaped areas. Stormwater runoff is expected to exit the subject property via overland flow and enter the City of Birmingham stormwater collection system via storm drains located within the subject property's parking areas and along local roadways. Stormwater is also expected to percolate through the landscaped areas.

The 1972 Amendments to the Federal Water Pollution Control Act (commonly known as the Clean Water Act [CWA]) prohibit the discharge of any pollutant to waters of the United States from a point source unless the discharge is authorized by a National Pollutant Discharge Elimination System (NPDES) permit. In 1987, the CWA was again amended by Congress to require implementation of a comprehensive national program for addressing problematic non-agricultural, non-point sources of stormwater discharge. The rules and regulations of the NPDES program are included in 40 CFR 122.26.

Stormwater permitting for a property is based on the property's Standard Industrial Classification (SIC) Code (category of industrial activity). However, the NPDES program includes a "no exposure" exemption for facilities within an applicable category of industrial activity. Based on 40 CFR 122.26 B(14), the subject property must obtain an NPDES Stormwater Discharge Permit only if material handling equipment or activities, raw materials, intermediate products, final products, waste materials, by-products, or industrial machinery is exposed to stormwater. As materials and activities described above are not associated with the subject property, stormwater permitting is not expected to be applicable at this time.

No surface water bodies (i.e., springs or swamps) were observed on the subject property.

Based upon the above information, stormwater runoff and surface water are not expected to be environmental concerns at this time. No further action is recommended at this time.

4.1.1.10 Lagoons, Ponds, Septic Systems, and Separators

No evidence of lagoons, ponds, septic systems, or separators was observed on the subject property during the property visit.

Based upon the above information, no further action is recommended.

4.1.1.11 Stressed Vegetation, Staining, and Odors

No evidence of stressed vegetation, staining, or odors was noted on the subject property during the property visit.

Based upon the above information, no further action is recommended.

4.1.1.12 Surficial Disturbance

No evidence of surficial disturbances was observed on the subject property during the property visit.

Based upon the above information, no further action is recommended.

4.1.1.13 On-Property Dry Cleaners

No dry-cleaning operations were observed at the subject property at the time of the property visit. Ms. Mary McSpadden was not aware of dry-cleaning operations at the subject property.

Ms. McSpadden was unaware of historical dry-cleaning operations at the subject property. However, review of historic fire insurance maps indicates the presence of a dry-cleaning facility at the subject property in 1967. Property Solutions also notes that the EDR environmental database identified the subject property address as a historic dry-cleaning facility in 1967 and 1971 under the name of Nifty One Hour Cleaners. See Section 4.4.2 for additional discussion.

4.1.14 Perfluorooctanoic Acid (PFOA) / Perfluorooctanesulfonic Acid (PFOS)

On April 10, 2024, USEPA announced the final National Primary Drinking Water Regulation (NPDWR) for six per- and polyfluoroalkyl substances (PFAS) compounds. On May 8, 2024, the USEPA published 40 CFR Part 302, Designation of Perfluorooctanoic Acid (PFOA) and Perfluorooctanesulfonic Acid (PFOS) as CERCLA Hazardous Substances; therefore, the rule is effective on July 8, 2024. The USEPA designated PFOA, PFOS, including their salts and structural isomers, as hazardous substances.

PFAS are a group of man-made chemicals that includes PFOA, PFOS, GenX, and many other chemicals. PFAS have been manufactured and used in a variety of industries around the globe, including in the United States since the 1940s. PFOA and PFOS have been the most extensively produced and studied of these chemicals. PFAS, including PFOA and PFOAS, are sometimes referred to as "forever" chemicals because of their strong carbon-fluoride bond in the "tail group" that causes them to be extremely resistant to degradation and to remain in the environment for long periods of time. PFOA and PFOS are highly mobile in the environment.

PFAS can be found in:

- Food packaged in PFAS-containing materials, processed with equipment that used PFAS, or grown in PFAS-contaminated soil or water.
- Commercial household products, including stain- and water-repellent fabrics, nonstick products (e.g., Teflon), polishes, waxes, paints, cleaning products, and fire-fighting foams (a major source of groundwater contamination at airports and military bases where firefighting training occurs).
- Workplace, including production facilities or industries (e.g., chrome plating, electronics manufacturing or oil recovery) that use PFAS.
- Drinking water, typically localized and associated with a specific facility (e.g., manufacturer, landfill, wastewater treatment plant, firefighter training facility).
- Living organisms, including fish, animals, and humans, where PFAS have the ability to build up and persist over time.

Property Solutions is not aware of the use, manufacture, or generation of PFAS at the subject property. No further evaluation is warranted at this time.

4.1.2 ASTM Non-Scope Considerations

4.1.2.1 Radon

The subject property is located in Zone 2 (Moderate Potential), per the USEPA's Map of Radon Zones. According to data compiled from Air Chek, Inc. (last updated December 7, 2025), 75 percent of samples measured radon levels under 2.0 pCi/L, 17 percent between 2.0 and 3.9 pCi/L, and 9 percent above 4.0 pCi/L. The average indoor radon level of Jefferson County is 1.5 pCi/L. The USEPA action level is 4.0 pCi/L.

Based on the non-residential use of the subject building, no further action regarding radon is recommended at this time.

4.1.2.2 Lead-Based Paint

Based on the date of construction of the subject building (2012), it is unlikely that lead-based paints (LBPs) were used during building construction. Painted surfaces within the subject building were generally observed to be in an undamaged condition.

Based upon the above information, LBP is not expected to be an environmental concern at this time. No further action is recommended.

4.1.2.3 Lead in Drinking Water

Drinking water for the subject property is provided by the City of Birmingham. The City of Birmingham was required to perform system-wide lead screening of their water system starting in 1992, under the USEPA "Lead and Copper Regulations" (Federal Register Volume 56, No. 26460). These regulations, promulgated in June 1991, require public water systems to perform screening and provide for public notification and corrective action to reduce the lead hazards present in the water system.

Review of the Birmingham Water Works 2025 Annual Water Quality Report revealed that the City of Birmingham's public water supply has met the 90th percentile for the lead action level of 15 parts per billion (ppb) and is currently in compliance with the USEPA's Lead and Copper Regulations.

A copy of the water quality report is included in Appendix I.

4.1.2.4 Potential Wetlands

No evidence of wetland areas was observed on the subject property during the property visit. Review of the United States Department of the Interior, National Wetland Inventory map of Birmingham North, Alabama, revealed that no delineated wetlands are located on the subject property.

Based upon the above information, wetland areas are not expected to be an environmental concern at this time. No further action is recommended.

A copy of the wetland map is included in Appendix A.

4.1.2.5 Air Emissions

No major air emissions sources were identified at the subject property during the property visit.

Based upon the above information, no further action is recommended.

4.2 Adjacent Property and Vicinity Observation

Review of neighboring properties from the subject property and from public thoroughfares, and research of available information regarding the neighboring properties, were performed to identify evidence of environmental concerns that could adversely impact the subject property. The subject property is located in a residential, commercial, and industrial area of Birmingham, Alabama.

Based on a review of neighboring properties from the subject property and from public thoroughfares, the neighboring properties do not appear to be of the type likely to pose a significant threat to the environmental condition of the subject property. The neighboring properties were not listed in the environmental database reviewed or Envirofacts, except for the following:

- 5512 1st Avenue South – ICIS-NPDES
- 5501-5507 1st Avenue South – UST, UST Finder, Financial Assurance, and EDR Hist Auto
- 5401 1st Avenue North – EDR Hist Auto
- 10 55th Street South – RCRA Non-Generator

The adjacent properties are further discussed in Section 2.2.

4.3 Results of Regulatory Agency List Review and File Research

4.3.1 USEPA Envirofacts

Property Solutions contacted the United States Environmental Protection Agency (USEPA) through an on-line search via the Internet to obtain information concerning the subject property. Property Solutions performed a search of Envirofacts, a USEPA-generated website that integrates data extracted from five major USEPA program systems: Aerometric Information Retrieval System (AIRS)/AIRS Facility Subsystem (AFS), Superfund Enterprise Management System (SEMS), Permit Compliance System (PCS), Resource Conservation and Recovery Information System (RCRIS) and Toxic Chemical Release Inventory System (TRIS), using two integrating databases: Facility Index System (FINDS) and Envirofacts Master Chemical Integrator (EMCI).

Property Solutions generated a printout of all facilities under the programs identified above that are located within the subject property's zip code (35212). The subject property was not listed among the sites identified during the query search. The adjoining properties were listed among the sites identified during the query search. The query was executed on December 1, 2025. The following tables summarize the listings for the adjoining properties.

Permitted Discharges to Water

Listing Type	Facility Name	Address	NPDES No.	Permit Exp. Date	Violations	Chemicals Discharged
Adjoining Property	The James Rushton Early Learning & Family Success Center	5512 1 st Avenue South	ALR10B 777	March 31, 2021	None reported	None reported

Hazardous Waste Handler

Listing Type	Facility Name	Address	USEPA ID No.	Handler/Facility Classification
Adjoining Property	Guin Company LLC	10 55 th Street North	ALN930728001	RCRA Non-Generator

A copy of the search results is included in Appendix I.

4.3.2 Environmental Database Information

As part of the Phase I Environmental Assessment, Property Solutions utilized Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut, as an information source for regulatory agency environmental database records. The environmental database was dated November 24, 2025.

Data supplied by EDR is included in Appendix J. This database also includes the required documentation of sources checked as per Section 8.1.8 of the ASTM standard.

The following summary of the database information is divided into two columns. The first column lists sites as identified and located by EDR within the specified distance of the subject property. The second column lists orphan sites, which could not be located by EDR due to incomplete and/or inaccurate address information included in the United States Environmental Protection Agency (USEPA)/state databases, which Property Solutions identified as potentially lying within the search distance.

Although the exact locations of the orphan sites are frequently unknown, Property Solutions attempts to evaluate the potential adverse environmental impact that these sites may have on the subject property. This evaluation consists of reviewing street names in an effort to learn whether the street on which the site is located lies within the search distance of the subject property, a drive-by view of surrounding properties during the site visit, and evaluating the site type and information provided by government agencies. The orphan sites included in the following table are those Property Solutions identified as potentially located within the identified search distance. A complete list of sites is included in Appendix J.

Environmental Database Summary

Database	Search Distance	Plottable	Orphan
National Priorities List (NPL)	1 Mile	0	0
State/Tribal Hazardous Waste Sites (SHWS)	1 Mile	2	0
RCRA Corrective Action Treatment/Storage/Disposal (TSD) Facilities (CORRACTS)	1 Mile	0	0
Delisted NPL	½ Mile	0	0
Superfund Enterprise Management System (SEMS)	½ Mile	0	0
SEMS No Further Remedial Action Planned (NFRAP)/Archive	½ Mile	0	0
RCRA Non-Corrective Action TSD Facilities	½ Mile	0	0

Database	Search Distance	Plottable	Orphan
State/Tribal Voluntary Cleanup (VCP) Sites	½ Mile	0	0
State/Tribal Brownfield Sites/CERCLIS Equivalent	½ Mile	0	0
State/Tribal Leaking Registered Storage Tank Sites	½ Mile	3	0
State/Tribal Solid Waste Landfill Sites/Facilities	½ Mile	0	0
Historic Landfills	½ Mile	0	0
Federal/State/Tribal Engineering Controls Registries	½ Mile	0	0
Federal/State/Tribal Institutional Controls Registries	½ Mile	0	0
RCRA Large Quantity Generators (LQG)	Subject Property and Adjoining Properties	0	0
RCRA Small Quantity Generators (SQG)	Subject Property and Adjoining Properties	0	0
RCRA Very Small Quantity Generators (VSQG)	Subject Property and Adjoining Properties	0	0
RCRA Conditionally Exempt Small Quantity Generators (CESQG)	Subject Property and Adjoining Properties	0	0
RCRA Non-Generators (Non-Gen)	Subject Property and Adjoining Properties	1	0
State/Tribal Registered Storage Tank Sites	Subject Property and Adjoining Properties	1	0
Manifest	Subject Property	0	0
Spill/Release Sites	Subject Property	0	0
Facility Index System (FINDS)	Subject Property	0	0
Emergency Response Notification System (ERNS)	Subject Property	0	0
Enforcement and Compliance History Online (ECHO)	Subject Property	0	0

Database Summary

A complete copy of the database report is attached as an appendix to this report. Those sites noted within the search radius with a closed status from regulators, or not listed with known, documented, or suspected release sites will not be discussed below but can be referred to in the database report. The above sites are not expected to significantly impact the subject property based on the regulatory status listed. In addition, those remaining sites which are expected to be hydraulically downgradient, at a sufficient distance from the subject property, or due to the urban setting and density of the area, will not be discussed below but can be referred to in the database report. These above sites are not expected to significantly impact the subject property based on the above factors and as per ASTM E1527-21.

The following is a discussion of the database findings:

Subject and Adjoining Properties

The subject property was not listed in the environmental database. The adjacent properties were listed in the environmental database as follows:

- 5501-5507 1st Avenue South – UST, UST Finder, Financial Assurance
- 10 55th Street South – RCRA Non-Generator

Per ASTM 1527-13, if the property or any of the adjoining properties is identified on one or more of the standard environmental record sources in 8.2.1, pertinent regulatory files and/or records associated with the listing should be reviewed in accordance with 8.1.1 through 8.1.8. The purpose of the regulatory file review is to obtain sufficient information to assist the environmental professional in determining if a recognized environmental condition, historical recognized environmental condition, controlled recognized environmental condition, or a de minimis condition exists at the property in connection with the listing. If, in the environmental professional's opinion, such a review is not warranted, the environmental professional must explain within the report the justification for not conducting the regulatory file review. As an alternative, the environmental professional may review files/records from an alternative source(s).

Record information that is not publicly available, obtainable within reasonable cost and time constraints, or practically reviewable is considered as being not reasonably ascertainable and is beyond the scope of the Phase I Environmental Assessment. Record information that costs greater than \$125 to obtain or requires more than two hours of environmental scientist time to obtain and review is beyond the scope of the Phase I Environmental Assessment.

Further information regarding these listings is provided below.

State/Tribal Hazardous Waste Sites

- | | | |
|----|-----------------------|--|
| 1. | Site Name: | Fifth Avenue South Drums |
| | Address: | 5113 5 th Avenue South
Birmingham, Alabama |
| | Facility ID No.: | 9038 |
| | Distance: | 1/2 – 1 mile |
| | Direction: | South-southwest |
| | Gradient: | Lateral |
| | Status: | Not reported |
| | Potential for Impact: | Low, due to gradient and distance |

2. Site Name: King Drum
 Address: 953 47th Place North
 Birmingham, Alabama
 Facility ID No.: 9149
 Distance: 1/2 – 1 mile
 Direction: West-northwest
 Gradient: Downgradient
 Status: Not reported
 Potential for Impact: Low, due to gradient and distance

State/Tribal Leaking Registered Storage Tanks

1. Site Name: Mays Automotive Service
 Address: 5600 1st Avenue South
 Birmingham, Alabama 35212
 Facility ID No.: 003999 / AL3999
 LRST ID No.: UST12-08-11 / AL3320
 Distance: < 1/8 mile
 Direction: North-northeast
 Gradient: Lateral
 Type of Release: Not reported
 Type of Product: Not reported
 Media Impacted: Not reported
 Status: Closed – NFA issued March 13, 2019
 Potential for Impact: Low, due to gradient and regulatory status
2. Site Name: Spur Station #1149
 Address: 5936 1st Avenue North
 Birmingham, Alabama 35212
 Facility ID No.: 000137 / AL137
 LRST ID No.: UST93-02-65 / AL1600
 Distance: 1/4 – 1/2 mile
 Direction: North-northeast
 Gradient: Lateral
 Type of Release: Not reported
 Type of Product: Not reported
 Media Impacted: Not reported
 Status: Closed – NFA issued January 12, 1995
 Potential for Impact: Low, due to gradient, distance, and regulatory status

3. Site Name: Airport Mart #1 BP
 Address: 5117 10th Avenue North & 52nd Street North
 Birmingham, Alabama 35212
 Facility ID No.: 005515
 LRST ID No.: UST05-09-06
 Distance: 1/4 – 1/2 mile
 Direction: Northwest
 Gradient: Downgradient
 Type of Release: Not reported
 Type of Product: Not reported
 Media Impacted: Not reported
 Status: Closed – NFA issued December 13, 2006
 Potential for Impact: Low, due to gradient, distance, and regulatory status

RCRA Non-Generators

1. Site Name: Guin Co Inc
 Address: 10 55th Street North
 Birmingham, Alabama 35212
 Facility ID No.: ALN930728001
 Distance: Adjoining
 Direction: Southwest
 Gradient: Lateral
 Reported Waste Codes: None reported
 Violations: None reported

State/Tribal Registered Storage Tanks

1. Site Name: B & B Auto Sales Inc
 Address: 5501 1st Avenue South
 Birmingham, Alabama 35212
 Facility ID No.: AL6920
 Distance: Adjoining
 Direction: East-southeast
 Gradient: Upgradient
 No. of Tanks: Three (closed in 1978)
 Contents: Unleaded gasoline, kerosene

4.3.3 Local Lists

The below local types of records were researched or requested from third parties, the Key Site Manager or local regulatory agencies:

- Local Brownfield Lists
- Local Lists of Landfill/Solid Waste Disposal Sites

- Local Lists of Hazardous Waste/Contaminated Sites
- Local Lists of Registered Storage Tanks
- Local Land Records (For AULs)
- Records of Emergency Release Reports
- Records of Contaminated Public Wells

The above information is discussed in Section 4.3.2 and was duplicative of that section.

4.3.4 Database Proprietary Lists

The subject property and adjoining properties were listed in the EDR proprietary information searched in the EDR database. The subject property was listed as a Hist Auto and Hist Cleaner facility, and the adjoining properties of 5401 1st Avenue North and 5501-5507 1st Avenue South were listed as Hist Auto sites. Further information regarding these listings is provided below.

Hist Autos

1. Site Names: Parker Service Station Filling Station / Freeman Service Station Filling Station / Wadsworth Service Station
Address: 5500 1st Avenue South (Subject property)
Birmingham, Alabama
Years: 1935, 1940 (Freeman);
1946 (Parker);
1952, 1956 (Wadsworth)
Types: Gasoline and oil service stations, gasoline service stations

There is no information regarding the former operations as a filling station and automobile repair facility. See Section 4.4.2.6 for further discussion.

2. Site Name: 5504 06 Wright Edw C Auto Repr
Address: 5504 1st Avenue South
Birmingham, Alabama
Years: 1952, 1956
Type: Automobile repairing
3. Site Name: Adair Jas H Auto Repr
Address: 11 55th Street South
Birmingham, Alabama
Years: 1935
Type: Automobile repairing

4. Site Names: Trackside Gasoline Sta Inc No /
 Economy Distributors Filling Station /
 Cloverleaf Service Stations
 Address: 5501 1st Avenue South
 Birmingham, Alabama
 Years: 1935 (Economy);
 1940, 1946, 1956, 1961, 1971 (Trackside);
 1975-1979 (Cloverleaf)
 Types: Gasoline and oil service stations, gasoline service stations

5. Site Name: B&R Automotive Service
 Address: 5507 1st Avenue South
 Birmingham, Alabama 35212
 Year: 1976
 Type: Automobile repairing

6. Site Name: Woodlawn Service Center Filling Station
 Address: 5401 1st Avenue North
 Birmingham, Alabama
 Year: 1940
 Type: Gasoline and oil service stations

Hist Cleaners

1. Site Names: Nifty One Hour Cleaners /
 Sanitary Carpet & Oriental Rug
 Address: 5500 1st Avenue South (Subject Property)
 Birmingham, Alabama 35203
 Years: 1967, 1971 (Nifty One Hour Cleaners);
 2007-2009 (Sanitary Carpet)
 Types: Cleaners and dyers (1967, 1971);
 Single-family home remodeling, additions, and repairs
 (2007-2009)

There is no other information listed in regard to the operations of the various dry cleaner operations on the subject property. See Section 4.4.2.6 for further discussion.

4.3.5 Potential Vapor Encroachment

The potential for obvious vapor encroachment from volatile organic compounds and petroleum products on the subject property or from nearby properties listed in the above databases with known or suspected releases was evaluated.

No activity and use limitations at the subject property indicating vapor encroachment was identified during this assessment.

Based on standard sources reviewed in Section 4.3 and observations made during the property visit, there is the potential that a release of chemicals of concern could have occurred on the subject property.

Based on the absence of information pertaining to the status of the underground storage tanks at the former gasoline station, additional record information is needed to further evaluate the presence of historical tanks on the subject property. As a result, potential vapor encroachment cannot be ruled out until updated information becomes available.

4.3.6 Transfer Act

There is no applicable environmental Transfer Act for the State of Alabama.

4.4 Results of Property History and Land Use Review

4.4.1 User Provided Information and Responsibilities

This section is to describe tasks to be performed by the User. The “All Appropriate Inquiries” (AAI) Final Rule (40 C.F.R. Part 312) requires that these tasks be performed by or on behalf of a party seeking to qualify for an LLP to CERCLA liability. These tasks must also be completed by or on behalf of EPA Brownfield Assessment and Characterization grantees. While such information is not required to be provided to the environmental professional, the environmental professional shall request that the user provide the results of these tasks as such information can assist the environmental professional in identifying recognized environmental conditions.

Per the ASTM standard, the environmental professional shall note in the report whether or not the User has reported to the environmental professional information pursuant to Section 6 of the ASTM standard.

Bank of America (User) is performing the Phase I Environmental Assessment for determining whether to make a loan evidenced by a note secured by the property and not for pre-purchase due diligence.

Since Bank of America has only recently become involved with the subject property, their knowledge of the subject property and environmental conditions is limited to information provided by the mortgage broker, previous investigations provided by the borrower broker, and by the borrower. Therefore, it is not expected that data gaps created by unanswered questions of the User (Bank of America) are significant. It is expected that Bank of America has facilitated interviews and information exchange with those knowledgeable of the property as best as possible.

There is a specific exemption, the so-called “lender liability” exemption, for a person, who without participating in the management of a facility, holds indicia of ownership primarily to protect his or her security interest in the vessel or facility (42 USC 9601(20)(A)(iii)).

In September 1996, Congress passed the Asset, Conservation, Lender Liability, and Deposit Insurance Act [Title II, Subtitle E, Sections 2502-2505 of the 1996 Omnibus Appropriations bill]. Reportedly, under the act, lenders that do not exercise decision making control over the property during the term of the loan will not risk federal liability.

User Questionnaire

The User has chosen not to complete the questionnaire citing a lack of pertinent knowledge of the environmental condition of the property in their role solely as a secured creditor. As Bank of America has no specific knowledge of the property unless otherwise noted and operations, they requested the consultant pursue this information.

A Key Site Manager Questionnaire was submitted to Ms. Mary McSpadden (key site manager) to be completed prior to the property visit.

Contact Company	Smiles for Keeps
Contact Name	Ms. Mary McSpadden
Contact Title	President / Co-Founder
Phone/Fax/Email	(205) 592-2255 / (205) 592-3352 / MaryMcSpadden@bellsouth.net
Contact Date	November 26, 2025
Request Medium	Email
Questionnaire completed?	Yes
Completed by?	Ms. McSpadden
Response Date	December 3, 2025
Form of Response	Email
Was the questionnaire completed and returned prior to the property visit?	Yes

The completed Key Site Manager Questionnaire and correspondence are included in Appendix D - User Correspondence.

As Bank of America did not complete the User Questionnaire, per the ASTM standard, this is considered a data gap; however, the data gap is not considered significant.

Title and Judicial Records

Per ASTM E1527-21 Section 6.2, the User is required to provide and/or report to the environmental professional any title and judicial records for environmental liens/activity use limitations (AULs) so identified for the subject property. The environmental professional per the ASTM practice is not responsible to undertake a review of recorded land title records and judicial records for environmental liens or activity and use limitations.

No title records or information was provided to Property Solutions by the User.

No title records or information was provided to Property Solutions by the property owner, key site manager, or prospective purchaser.

The User did not request Property Solutions to coordinate with a title company or title professional to undertake a review of Recorded Land Title records and judicial records for environmental liens or AULs.

Therefore, no title records were searched and no information was provided for environmental liens and AULs which is the responsibility of the User. Per the ASTM standard this is considered a data gap.

Environmental Liens or Activity and Use Limitations

Per ASTM E1527-21 the User is required to provide and/or report to the environmental professional any environmental liens or AULs so identified for the subject property. The environmental professional per the ASTM practice is not responsible to undertake a review of information to identify environmental liens or AULs.

The User did not provide information on environmental liens and AULs. The User is not aware of environmental liens or AULs.

The User is not the owner, operator, prospective purchaser or tenant of the subject property.

No information concerning environmental liens and AULs was provided by the key site manager, owner, operator, prospective purchaser, or tenant of the subject property.

Knowledge of the User

Per the ASTM standard, the Users must take into account their specialized knowledge to identify conditions indicative of releases or threatened releases. If the user has any specialized knowledge or experience that is material to recognized environmental conditions in connection with the property, the user should communicate any information based on such specialized knowledge or experience to the environmental professional. The user should do so before the environmental professional conducts the property visit.

Since Bank of America has only recently become involved with the subject property, their knowledge of the subject property and environmental conditions is limited to information provided by the mortgage broker, previous investigations provided by the borrower or broker, and by the borrower. As Bank of America has no specific knowledge of the property and operations, they requested the consultant pursue this information.

The property owner, operator, key site manager and tenant had no specialized knowledge, actual knowledge, experience, or commonly known and reasonably ascertainable information within the local community concerning recognized environmental conditions at the subject property.

Valuation Reduction for Environmental Issues

Per the ASTM Standard, in a transaction involving the purchase of a parcel of commercial real estate, the User shall consider the relationship of the purchase price of the subject property to the fair market value of the subject property if the subject property was not affected by hazardous substances or petroleum products. The User should try to identify an explanation for a significantly lower price which does not reasonably reflect fair market value if the subject property was not contaminated, and make a written record of such explanation. Among factors to consider will be the information that becomes known to the User pursuant to the Phase I Environmental Assessment. The ASTM Standard does not require that a real estate appraisal be obtained in order to ascertain fair market value of the property. The User should inform the environmental professional if the User believes that the purchase price of the subject property is lower than the fair market value due to contamination. The User is not required to disclose the purchase price to the environmental professional.

This report was prepared for potential pre-lending purposes and not for a purchase.

Reason for Performing the Phase I Environmental Assessment

Bank of America (User) is performing the Phase I Environmental Assessment for determining whether to make a loan evidenced by a note secured by the property and not for pre-purchase due diligence.

Helpful Documents Provided Prior to Property Visit

Per the ASTM standard, prior to the property visit, the property owner, key site manager (if any is identified), and User (if different from the property owner) shall be asked if they know whether any of the documents below exist and if so, whether copies can and will be provided within reasonable time and cost constraints including partial information. This information is to be provided prior to or at the beginning of the property visit.

Documents	User		Key Site Manager		Property Owner	
	Exist	Provided	Exist	Provided	Exist	Provided
ESA reports	No response	N/A	Yes	Yes	Yes	Yes
Environmental compliance audit reports	No response	N/A	No	N/A	No	N/A

Environmental liens	No response	N/A	No	N/A	No	N/A
Other	No response	N/A	No	N/A	No	N/A

No response to our request for the above helpful documents was provided by the User. This is considered a data gap.

Proceedings Involving the Property

Per the ASTM Standard, prior to the property visit, the subject property owner, key site manager (if any is identified), and User (if different from the property owner) shall be asked whether they know of: (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, at, or from the subject property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, at, or from the subject property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

The User did not indicate whether they have no knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the subject property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

The key site manager and property owner indicated based on a response dated December 3, 2025 via response to questionnaire that they have no knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the subject property; and (3) any notices from

any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

User Identified Personnel

As per ASTM E1527-21, Property Solutions requested information for current and past property personnel. The information and contacts below were identified and/or provided by the User/Client.

Contact	Name	Company
User	Ms. Lillias Short	Bank of America, NA
Key Site Manager	Ms. Mary McSpadden	Smiles for Keeps
Current Property Owner	Ms. Mary McSpadden	SFK Properties LLC

4.4.2 Historical Property Information

The history of the subject property was researched to evaluate potential historical uses of the subject property of environmental concern.

The below standard historical sources were researched:

Standard Historical Source Summary

Historical Source	Source Checked?	Source	Earliest Date Obtained
Aerial Photos	Yes	EDR/Google Earth	1941
Fire Insurance Maps	Yes	EDR	1902
Property Tax File	Yes	Jefferson County Tax Assessor	2003
Recorded Land Title Records	No	N/A	N/A
USGS 7.5 Minute Topo Maps	Yes	USGS/EDR	1889
Local Street Directories (city directories)	Yes	EDR	1920
Building Department Records	Yes	Birmingham City Clerk	No response to information request
Zoning/Land Use Records	Yes	Birmingham City Clerk	No response to information request
Other Historical Sources	No	N/A	N/A
Miscellaneous Maps/Plans	No	N/A	N/A
Newspapers	No	N/A	N/A
Records	No	N/A	N/A
Other Directories/ Phone books	No	N/A	N/A
Prior Use Interviews	Yes	Ms. Mary McSpadden	2011
Previous Reports	Yes	VERAcheck, 2011	2011
Chain of Title	No	N/A	N/A
AULs and Environmental Liens	No	N/A	N/A

Based on the above information and sources searched above, per ASTM E1527-21 historical use information is deemed sufficient to comply with ASTM E1527-21 concerning Data Failure.

Historical Property Information

The following is a summary of the historical use of the subject property based on a review of the standard historical source information that is further described below:

Decade	Property Use	Standard Source/Source
1880	Unknown	Topographic Quadrangles/EDR
1890	Unknown	Topographic Quadrangles/EDR
1900	Residential	Topographic Quadrangles/ Fire Insurance Maps/EDR
1910	No major changes	Fire Insurance Maps/EDR
1920	No major changes	City Directories/EDR
1930	Gas station, residential	Fire Insurance Maps, City Directories/EDR
1940	Gas station, auto repair, residential	Aerial Photographs, City Directories/EDR
1950	No major changes	Aerial Photographs, Topographic Quadrangles, Fire Insurance Maps, City Directories/EDR
1960	Auto repair, dry cleaning	Aerial Photographs, Fire Insurance Maps, City Directories/EDR
1970	Dry cleaning	Aerial Photographs, Topographic Quadrangles, City Directories/EDR
1980	Commercial	Aerial Photographs, Topographic Quadrangles, City Directories/EDR
1990	Parking lot	Aerial Photographs, Topographic Quadrangles, City Directories/EDR
2000	No major changes	Aerial Photographs, City Directories/EDR
2010	Developed with the subject building in 2012 for use as a dental office	Aerial Photographs, Topographic Quadrangles, City Directories/EDR Interviews/Previous Reports
2020	No major changes	Aerial Photographs, Topographic Quadrangles/EDR Interviews

NP – Neighboring property

SP – Subject property

Review of the city directories revealed that the address of the subject property was listed starting in 1920. The city directories revealed that the subject property was listed as being occupied by various residential and commercial office/retail tenants, including pharmacies, furniture stores, and automobile sales. Property Solutions notes that several gas station, dry cleaning, and auto repair businesses were also identified, including: Fifty Fifth Street Service Station (1930), Freeman Service Station (1935, 1940), Parker Service Station (1946), Wright Edw C Auto Repair (1946, 1952, 1961), Wadsworth Service Station (1952, 1956), American Peerless Laundries & Cleaners (1961), and Nifty One Hour Cleaners (1967, 1971). From the 1990s through the 2010s, the subject property appears to have been used as a parking lot for other adjoining businesses before being listed under the name Smiles For Keeps starting in 2014.

Based on the above information, the subject property appears to have been occupied by gasoline stations and auto repair facilities from 1930 to 1961 and dry-cleaning facilities from 1961 to 1971. These historic operations are considered a REC and are further discussed in Section 4.4.2.6 below.

4.4.2.2 Aerial Photographs

Years of aerial photograph	1941, 1947, 1951

Description of Easterly Adjoining Property: Developed with a roadway and several commercial or industrial buildings.	
Description of Westerly Adjoining Property: Developed with a roadway and several small buildings.	

Years of aerial photograph	1967, 1970, 1977, 1981, 1988
Information Source	EDR
Description of Subject Property: One building is present at the southern corner of the property and the remaining portions of the property are used as a parking lot.	
Description of Northerly Adjoining Property: Redeveloped in 1967 with one large building to the northwest and vacant land to the northeast. A second large building is developed to the northeast in 1970 and expanded in 1977.	
Description of Southerly Adjoining Property: No major changes.	

Years of aerial photograph	1967, 1970, 1977, 1981, 1988
Description of Easterly Adjoining Property: No major changes.	
Description of Westerly Adjoining Property: Redeveloped with a parking lot and one large building.	

Years of aerial photograph	1992, 1997, 1998, 2006, 2011
Information Source	EDR
Description of Subject Property: Consists of a parking lot.	
Description of Northerly Adjoining Property: No major changes.	
Description of Southerly Adjoining Property: No major changes.	
Description of Easterly Adjoining Property: No major changes.	
Description of Westerly Adjoining Property: No major changes.	

Years of aerial photograph	2015, 2019, 2023
Information Source	EDR
Description of Subject Property: Redeveloped with the existing subject building at the southern corner of the property.	
Description of Northerly Adjoining Property: Redeveloped with two large buildings and a parking lot in 2019.	
Description of Southerly Adjoining Property: No major changes.	
Description of Easterly Adjoining Property: Consists of a roadway and two connected industrial buildings.	
Description of Westerly Adjoining Property: No major changes.	

Review of the aerial photographs revealed that the subject building was constructed after 2011 and prior to 2015. The aerial photographs revealed that the subject property was improved with several small buildings and a parking lot prior to the construction of the subject building.

No evidence of environmental concern on or adjacent to the subject property was revealed during a review of the aerial photographs.

Copies of the aerial photographs are included in Appendix E.

4.4.2.3 Fire Insurance Maps

Year of Fire Insurance Map	1902
Information Source	EDR
Description of Subject Property: Developed with a dwelling and stable structure on the northeast side of the property.	
Addresses of Subject Property Listed on Fire/Insurance Map: 5448 Woodlawn (graveled)	
Description of Northerly Adjoining Property: Developed with several dwellings and associated structures to the northeast and northwest.	
Description of South-Southwesterly Adjoining Property: Developed with 54th Street, beyond which lies a manufacturing facility identified as Blakeslee Manufacturing Co., a manufacturer of gas and gasoline engines and veneer cutting machinery.	
Description of East-Southeasterly Adjoining Property: Developed with Woodlawn Road, beyond which appears to be either vacant or unmapped land.	

Year of Fire Insurance Map	1902
Description of Westerly Adjoining Property: Developed with 54th Street, beyond which lies a dwellings and associated structures.	

Year of Fire Insurance Map	1911
Information Source	EDR
Description of Subject Property: Developed with an additional dwelling and associated storage structures.	
Addresses of Subject Property Listed on Fire/Insurance Map: 5406 and 5410 2nd Avenue South	
Description of Northerly Adjoining Property: No major changes.	
Description of South-Southwesterly Adjoining Property: No major changes.	
Description of East-Southeasterly Adjoining Property: The roadway is now identified as 2nd Avenue South, beyond which lies an office building and a rail spur.	
Description of Westerly Adjoining Property: No major changes.	

Year of Fire Insurance Map	1930
Information Source	EDR
Description of Subject Property: A filling station has been constructed at the southern corner of the property, south of the two dwellings. The filling station is depicted as having three gas tanks.	
Addresses of Subject Property Listed on Fire/Insurance Map: 5504 and 5508 1st Avenue South	
Description of Northerly Adjoining Property: No major changes.	
Description of South-Southwesterly Adjoining Property: No major changes.	
Description of East-Southeasterly Adjoining Property: The roadway is now identified as 1st Avenue South, beyond which lies a coal yard with a rail spur.	
Description of Westerly Adjoining Property: No major changes.	

Year of Fire Insurance Map	1950
Information Source	EDR
Description of Subject Property: A small auto repair building is constructed at the northwestern side of the property, northwest of the dwellings and filling station.	
Addresses of Subject Property Listed on Fire/Insurance Map: 5504-06 and 5508 1st Avenue South	
Description of Northerly Adjoining Property: The area to the northeast is depicted as vacant. Two of the dwellings to the northwest appear to have been converted to a clinic.	
Description of South-Southwesterly Adjoining Property: The facility is indicated to now be occupied by Jackson Industries Inc. Veneer Machine Division.	
Description of East-Southeasterly Adjoining Property: The coal yard has been redeveloped with an auto wrecking business and a filling station and car wash. A rail spur is also present.	
Description of Westerly Adjoining Property: No major changes.	

Year of Fire Insurance Map	1967
Information Source	EDR
Description of Subject Property: The dwellings and auto repair structures are no longer depicted. The filling station structure is still present, although it is now indicated to be used as a dry-cleaning facility. The northern area of the property is indicated to be used for trailer parking.	
Addresses of Subject Property Listed on Fire/Insurance Map: Not provided	
Description of Northerly Adjoining Property: The area to the northeast is depicted as a parking lot. The area to the northwest has been redeveloped with a bank building.	
Description of South-Southwesterly Adjoining Property: The facility is indicated to now be occupied by Birmingham Trailer Manufacturing Co., a manufacturer of trailer bodies.	
Description of East-Southeasterly Adjoining Property: No major changes other than the removal of the car wash.	
Description of Westerly Adjoining Property: Redeveloped with a large store and parking lot.	

Review of the fire insurance maps revealed that the subject building was constructed after 1967. Furthermore, fire insurance maps from 1930 and 1950 depict the subject property as consisting of a gasoline filling station with three “G.T.s” - gasoline underground storage tanks (USTs), in the south corner. No repair operations were indicated in 1930; however, an extension to the northwest of the filling station building was constructed by 1950, which was potentially a repair shop. In addition, a second structure with a canopied roof was depicted in 1950 along the west side at 5504 ½ South 55th Street and was labelled as auto repair.

Based on the above information, the historic operations conducted at the subject property are considered a REC and are further discussed in Section 4.4.2.6 below.

Copies of the fire insurance maps are included in Appendix F.

4.4.2.4 Topographic Quadrangle Map

Topographic Quadrangle Map Name	<u>Birmingham North, Alabama 30-Minute Series</u>
Year published	1892
Aerial photograph year map based on	N/A

Year photorevised	N/A
Aerial photograph year photorevision based on	N/A
Color of photorevisions	N/A
Description of Subject Property: Consists of a pink-shaded area of land, indicating urban development. No structures or other notable features are depicted.	
Description of Northerly Adjoining Property: Consists of a pink-shaded area of land, indicating urban development. No structures or other notable features are depicted.	
Description of Southerly Adjoining Property: Consists of roadways followed by a pink-shaded area of land, indicating urban development. Railroad tracks are also present.	
Description of Easterly Adjoining Property: Consists of a roadway followed by a pink-shaded area of land, indicating urban development. Railroad tracks are also present.	
Description of Westerly Adjoining Property: Consists of a roadway followed by a pink-shaded area of land, indicating urban development. No structures or other notable features are depicted.	

The 1975 map was an aerial photograph.

No environmental concerns were identified based upon a review of the Birmingham North, Alabama Topographic Quadrangle Maps.

A portion of the USGS 7.5-minute series topographic quadrangle map of Birmingham North, Alabama, which includes the subject property, is included in Appendix A.

4.4.2.5 Prior Use Interviews

Property Contact Name	Ms. Mary McSpadden
Property Contact Title	President/Co-Founder
Property Contact Company	Smiles for Keeps
Association with Property	Owner/operator
Years Associated with Subject Property	2011 – 2025

Ms. McSpadden informed Property Solutions that the current subject building was constructed circa 2011 and has since been used as a dental office. Ms. McSpadden stated that the subject property was used as a parking lot prior to construction of the subject building. No environmental concerns were identified during the interview with Ms. McSpadden.

4.4.2.6 Historical Use Summary

Based on a review of historical sources, the subject property consisted of residential occupants from at least 1902 and into the 1950s. Along with the residential use, several gas station/auto repair occupants were identified during this time, including: Fifty Fifth Street Service Station (1930), Freeman Service Station (1935, 1940), Parker Service Station (1946), Wright Edw C Auto Repair (1946, 1952, 1961), and Wadsworth Service Station (1952, 1956). From the 1960s-1980s, commercial office/retail tenants occupied the site, including dry cleaning operations

under the names American Peerless Laundries & Cleaners (1961) and Nifty One Hour Cleaners (1967, 1971). From the 1990s through the 2010s, the subject property appears to have been used as a parking lot for other adjoining businesses before being redeveloped with the existing subject building in 2012 for use as a dental office that has been occupied by Smiles for Keeps since construction.

Property Solutions notes that fire insurance maps from 1930 and 1950 depict the subject property as consisting of a gas station with three gas tanks. Property Solutions also notes that the EDR environmental database identified the subject property address as a historic auto facility in 1935, 1940, 1946, 1952, and 1956. No information is known about the tanks depicted.

As no documentation investigating the above-mentioned former operations and potential features associated with the former operations (e.g., gas tanks), the historical use of the subject property is considered a Recognized Environmental Condition. Further investigation is recommended.

Per E1527-21, “8.3.8 Uses of the Subject Property - All obvious uses of the subject property shall be identified from the present, back to the subject property’s first developed use, or back to 1940, whichever is earlier. The term “developed use” includes agricultural uses and placement of fill dirt, and other uses that may not involve structures. The report shall describe all identified uses, justify the earliest date identified for the subject property’s first developed use (for example, records showed no development of the subject property prior to the specific date), and explain the reason for any gaps in the history of use (for example, data failure). This task requires reviewing as many of the standard historical resources in 8.3.4.1 through 8.3.4.8 as are necessary and both reasonably ascertainable and likely to be useful. The following standard historical resources shall be reviewed if, based on the judgment of the environmental professional, they are reasonably ascertainable, likely to be useful, and applicable to the subject property: (1) aerial photographs (see 8.3.4.1), (2) fire insurance maps (see 8.3.4.2), (3) local street directories (see 8.3.4.3), and (4) historical topographic maps (see 8.3.4.4). In cases in which any of the preceding four standard historical resources are not reviewed, the environmental professional shall indicate in the report why such a review was not conducted. Additional standard historical resources in 8.3.4.5 through 8.3.4.8 shall be reviewed if, in the opinion of the environmental professional, such additional review is warranted to achieve the objective in 8.3.1. For example, if the subject property was developed in the 1700s, it might be feasible to identify uses back to the early 1900s using resources such as fire insurance maps or historical topographic maps (or equivalent). Although other resources such as land title records might go back to the 1700s, it would not be required to review these resources unless these resources were both reasonably ascertainable and likely to be useful. As another example, if the subject property was reportedly not developed until 1960, it would still be necessary to attempt to confirm that it was undeveloped back to 1940. Such confirmation may come from one or more of the standard historical resources specified in 8.3.4.1 through 8.3.4.8, or it may come from other historical resources (see 8.3.4.9). However, checking other historical resources is not required.

Per ASTM E1527-21, “8.3.9 Uses of the Adjoining Properties” - During research of the subject property, as described in 8.3.8, uses of the adjoining properties that are obvious shall be identified to evaluate the likelihood that past uses of the adjoining properties have led to

recognized environmental conditions in connection with the subject property. The report shall describe identified obvious uses of adjoining properties, and indicate the earliest dates identified. This task requires reviewing the following standard historical resources if they have been researched for the subject property (see 8.3.8), provide coverage of one or more adjoining properties, and are likely to be useful in satisfying the objective in 8.3.1: (1) aerial photographs (see 8.3.4.1), (2) fire insurance maps (see 8.3.4.2), (3) local street directories (see 8.3.4.3), and (4) historical topographic maps (see 8.3.4.4). In cases in which any of the preceding four standard historical resources are not reviewed for the adjoining properties but they were reviewed for the subject property, the environmental professional shall indicate in the report why such a review was not conducted. Additional standard historical resources should be reviewed if, in the opinion of the environmental professional, such additional review is warranted to achieve the objective in 8.3.1. Factors to consider in making this determination include, but are not limited to: known hydrogeologic/geologic conditions that may indicate a high probability of hazardous substances or petroleum products migrating to the subject property; the extent to which information is reasonably ascertainable; the extent to which information is likely to be useful; the time and cost involved in reviewing such resources (for example, reviewing building department records or property tax files for adjoining properties may be too time-consuming); and local good commercial and customary practice. Other historical resources may be used to satisfy the objective of 8.3.1 but checking other historical resources is not required to comply with this practice.

Per E1527-21, “8.3.6 Data Failure” - The historical research is complete when either: (1) the objective in 8.3.1 is achieved or (2) data failure is encountered. Data failure occurs when all of the standard historical resources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objective has not been met. Data failure is not uncommon in trying to identify historical uses at five-year intervals back to first use or 1940 (whichever is earlier). Notwithstanding a data failure, standard historical resources may be excluded if: (1) the resources are not reasonably ascertainable or (2) if past experience indicates that the resources are not likely to be accurate or complete in terms of satisfying the objective (for example, if a particular historical data source is known to have insufficient data for the particular subject area). Other historical resources specified in 8.3.4.9 may be used to satisfy the objective of 8.3.1 but are not required to comply with this practice. If data failure is encountered, the report shall document the failure and, if any of the standard historical resources in 8.3.4.1 through 8.3.4.8 were excluded, give the reasons for their exclusion. If the data failure represents a significant data gap, the report shall comment on the impact of the data gap on the ability of the environmental professional to identify recognized environmental conditions (see 12.7).

Based on the above information and sources searched above, per ASTM E1527-21 historical use information is deemed sufficient to comply with ASTM E1527-21 due to data failure. No significant historical use information data gaps were identified.

Standard historical information is included in the appendices of this report.

4.4.3 Interviews

The objective of interviews is to obtain information indicating Recognized Environmental Conditions in connection with the subject property as well as AULs. Property Solutions interviewed or made good faith efforts to interview the following:

Represents	Interviewed	Name and title	Comments
Current Property Owner	Yes	Ms. Mary McSpadden, President of SFK	No concerns identified during the interview.
Previous Property Owner	No	N/A	User did not provide name or contact information nor did they coordinate or facilitate the interview.
Current Property Owner Representative	No	N/A	User did not provide name or contact information nor did they coordinate or facilitate the interview.
Previous Property Owner Representative	No	N/A	User did not provide name or contact information nor did they coordinate or facilitate the interview.
Key Site Manager	Yes	Ms. McSpadden	No concerns identified during the interview.
Previous Key Site Manager	No	N/A	User did not provide name or contact information nor did they coordinate or facilitate the interview.
Current Property Occupants	Yes	Ms. McSpadden	No concerns identified during the interview.
Previous Property Occupants	No	N/A	User did not provide name or contact information nor did they coordinate or facilitate the interview.
Current Property Major Occupant	Yes	Ms. McSpadden	No concerns identified during the interview.
Previous Property Major Occupant	No	N/A	User did not provide name or contact information nor did they coordinate or facilitate the interview.
Current Property Operator	Yes	Ms. McSpadden	No concerns identified during the interview.
Previous Property Operator	No	N/A	User did not provide name or contact information nor did they coordinate or facilitate the interview.
Neighboring Property Owner	No	N/A	Subject property is not considered an abandoned property where there is evidence of potential unauthorized uses of the abandoned property or evidence of uncontrolled access to the abandoned property, therefore no interview with the neighboring property owners was performed.
Neighboring Property Occupants	No	N/A	Subject property is not considered an abandoned property where there is evidence of potential unauthorized uses of the abandoned property or evidence of uncontrolled access to the abandoned property, therefore no interview with the neighboring property occupants was performed.

4.4.4 Property Specific Records

During the course of the assessment of the subject property, Property Solutions contacted the following local, county, and state agencies and companies via phone, letter, or in person.

Department of Health

Agency name	Jefferson County Department of Health
Contact name	Not provided
Contact title	Freedom of Information Officer
City	Birmingham
State	Alabama
Contact date	December 1, 2025
Request medium	Online submission
Response date	Pending
Form of response	Pending

A response has not been received at the time of this report.

Fire Department

Agency name	Birmingham City Clerk's Office
Contact name	Not provided
Contact title	Freedom of Information Officer
City	Birmingham
State	Alabama
Contact date	December 1, 2025
Request medium	Online submission
Response date	Pending
Form of response	Pending

A response has not been received at the time of this report.

Planning/Zoning Department

A response has not been received at the time of this report.

Tax Assessor/Tax Department

Agency name	Jefferson County Tax Assessor
Agency webpage	www.jccal.org/Default.asp?ID=358&pg=Tax+Assessor
City	Birmingham
State	Alabama
Contact date	November 24, 2025
Request medium	Online submission
Response date	November 24, 2025
Form of response	Online

Response: Property Solutions visited the Jefferson County Tax Assessor webpage on November 24, 2025. The Jefferson County Tax Assessor webpage provided Property Solutions with a copy of a tax map for the subject property and the surrounding area and a copy of the tax information card for the subject property.

Based on Property Solutions review of the tax map and tax information card: the subject property is identified as Parcel 23 00 21 4 008 007.000; the subject property consists of an irregular-shaped, 0.51-acre parcel of land improved with one commercial building constructed in 2012; the gross area of the subject building is approximately 3,088 square feet; and the subject property was acquired by SFK Properties LLC on July 1, 2011. Southtrust Corporate Realty was identified as the previous owner dating back to at least 2003.

A copy of the tax map is included in Appendix A.

Electrical Utility

Agency name	Alabama Power – Environmental Department
Contact name	Not provided
Contact title	Freedom of Information Officer
City	Birmingham
State	Alabama
Contact date	December 1, 2025

Others

No other agencies were contacted.

State Environmental Agency

Agency name	Alabama Department of Environmental Management (ADEM)
Contact name	Azure Rogers
Contact title	Freedom of Information Officer
City	Montgomery
State	Alabama
Contact date	December 1, 2025
Request medium	Email
Response date	December 5, 2025
Form of response	Email

Response: Property Solutions was informed that no responsive records were identified in connection with the subject property.

State Online Database Information/GIS

Agency name	Alabama Department of Environmental Management (ADEM)
Agency webpage	adem.alabama.gov
State	Alabama
Contact date	December 4, 2025
Request medium	Online
Response date	December 4, 2025
Form of response	Online

Response: Property Solutions reviewed information publicly available through the ADEM e-Maps and e-File portal to evaluate the potential for environmental concerns regarding the subject property. The subject property was not identified as a brownfield site, underground storage tank site, hazardous waste site, voluntary remediation site, or other site of potential environmental concern.

At the time this report was prepared, some of the above local, county, and state agencies and companies had not responded to our information request as indicated.

According to ASTM E1527-21, Section 8.1.5, information that has been requested must be reasonably ascertainable as part of performing the Phase I Environmental Assessment. Information that is reasonably ascertainable per ASTM means that information will be provided by the source within 20 calendar days of receiving a written, telephone, or in-person request.

Copies of the letters and records of communication are included in Appendix I.

4.4.5 Emerging Contaminants of Concern

As defined in Section 3.2.36 of ASTM E1527-21, hazardous substance means “those substances defined as a hazardous substance pursuant to CERCLA 42 U.S.C. § 9601(14), as interpreted by USEPA regulations and the courts.” There are some substances that non-environmental professionals and others may assume to be hazardous substances that are not defined (or not yet defined) as hazardous substances under CERCLA through interpretation by USEPA regulations and the courts. These substances may include: (1) some substances that occur naturally or through biological digestion (for example, methane), and (2) substances about which human understanding is evolving. These and any other “emerging contaminants,” where they are not identified as a hazardous substance by CERCLA, as interpreted by USEPA regulations and the courts, are not included in the scope of this practice. Some of these substances may be considered a “hazardous substance” (or equivalent) under applicable state laws. In those instances, where a Phase I Environmental Assessment is performed to satisfy both federal and state requirements, or as directed by the user of the report, it is permissible to include analysis and/or discussion of these substances in the same manner as any other Non-Scope Consideration. If and when such emerging contaminants are defined to be a hazardous substance under CERCLA, as interpreted by USEPA regulations and the courts, such substances shall be

evaluated within the scope of this practice.

1,4 Dioxane is a heterocyclic organic compound, classified as an ether. It is a colorless liquid with a faint sweet odor similar to that of diethyl ether.

Property Solutions is not aware of the use, manufacture, or generation of 1,4 dioxane at the subject property. No further evaluation is warranted at this time.

Methane is a hydrocarbon that is a primary component of natural gas. Methane is also a greenhouse gas (GHG), so its presence in the atmosphere affects the earth's temperature and climate system. Methane is emitted from a variety of anthropogenic (human-influenced) and natural sources.

Property Solutions is not aware of the use, manufacture, or generation of methane at the subject property. No further evaluation is warranted at this time.

4.5 Synopsis of Previous Environmental Investigations and Plans

Complete Report Name	<u>Secured Creditor Risk Report</u>
Report Date	August 10, 2011
Report Project Number	C86476
Report Property Name	Not reported
Report Property Address	5500 1st Avenue South, Birmingham, Alabama 35212
Prepared by	VERAcheck
Consultant City & State Location	Not provided
Prepared for	Regions Bank and US SBA
Party City & State Location	Not provided
Report Provided by	Ms. Mary McSpadden
The entire report including appendices was provided.	
The boundaries discussed in this report are identical to those of the subject property identified by Property Solutions.	
Report and Subject Property Variations: None	
Information/Portions of Report not Included with Report: None	

Scope of Services Performed Per Report: Performed an analysis of a government records search for the subject property and surrounding properties.

Findings/Conclusions as Reported by Report Preparer: Based on their review of the information provided in the government records search, VERAcheck did not identify any environmental concerns for the subject property and determined the risk rating for the subject property to be low.

Recommendations as Reported by Report Preparer: No recommendations were made by VERAcheck.

Report Historical Information and Findings: VERAcheck's report did not include historical information concerning the subject property.

No environmental concerns were identified during the review of the previous report.

A copy of the previous report is included in Appendix G.

4.6 Asbestos-Containing Material

Based on the date of construction (2012), review of available building information, and observations made during the property visit, ACMs are not expected to have been used during construction of the subject building.

Based upon the above information, no further action is recommended at this time.

4.7 Mold/Water Intrusion

During the course of the Phase I Environmental Assessment property visit, Property Solutions performed limited observations for obvious signs of moisture, water intrusion, and potential mold at the subject property. This was performed for overview purposes only and is not a mold assessment or inspection for regulatory submittal purposes. Additional areas may exist in areas not observed or in concealed locations (behind walls and above ceiling tiles, etc.). This was a limited visual review during a Phase I Environmental Assessment property visit of easily accessible areas for obvious signs of water intrusion and potential mold. An engineering assessment and property maintenance personnel should be consulted to verify water intrusion due to engineering concerns and deficiencies and addressed as appropriate.

Molds produce tiny spores to reproduce, which waft through the indoor and outdoor air continually. When mold spores land on a damp spot indoors, they may begin growing and digesting whatever they are growing on in order to survive. There are molds that can grow on wood, paper, carpet, and foods. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or unaddressed. There is no practical way to eliminate all molds and mold spores in the indoor environment; the way to control indoor mold growth is to control moisture. In addition, mold growth may be a problem after flooding.

Standards or Threshold Limit Values (TLVs) for airborne concentrations of mold, or mold spores, have not been set. Currently, there are no USEPA regulations or standards for airborne mold contaminants.

Ms. Mary McSpadden was unaware of past water damage or historic leaks.

No obvious visual evidence of mold, water intrusion, water damage, or standing water was observed in the interior portions of the subject building accessed by Property Solutions during the property visit. No musty odors indicative of a moisture problem or porous materials such as carpets and insulation in damp niches were observed during the property visit.

No botanical materials such as bark chips or potted plants in moist locations such as an atrium were observed during the property visit. No indoor water features such as fountains, indoor waterfalls, or indoor swimming pools were observed in the subject building. Ms. Mary McSpadden was unaware of reported odor complaints, allergic reactions, or other symptoms

possibly associated with mold growth. No problems evident in the building envelope or problematic conditions surrounding the air intake were observed. No operations conducive to bioaerosol generation such as animal confinement, agricultural activities, or wetlands were observed on the subject property or adjacent properties. This limited visual review was conducted for overview purposes only; mold may exist in concealed locations (behind walls, wallpaper, and ceilings, etc.). Ms. Mary McSpadden was unaware of mold, water intrusion, water damage, standing water, or historic floods at the subject property.

Based on the above information, no further investigation is recommended at this time regarding moisture and mold.

5.0 CONCLUSIONS

We have performed a Phase I Environmental Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the commercial property located at Smiles for Keeps, LLC in Birmingham, Jefferson County, Alabama 35212. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property, except for the following:

1. Based on a review of historical sources, the subject property consisted of residential occupants from at least 1902 and into the 1950s. Along with the residential use, several gas station/ auto repair occupants were identified during this timeframe, including: Fifty Fifth Street Service Station (1930), Freeman Service Station (1935, 1940), Parker Service Station (1946), Wright Edw C Auto Repair (1946, 1952, and 1961), and Wadsworth Service Station (1952, 1956). From the 1960s to the 1980s, commercial office/ retail tenants occupied the subject property, including dry cleaning operations under the names American Peerless Laundries & Cleaners (1961) and Nifty One Hour Cleaners (1967, 1971). From the 1990s through the 2010s, the subject property appears to have been used as a parking lot for other adjoining businesses before being redeveloped with the existing subject building in 2012 for use as a dental office that has been occupied by Smiles for Keeps since construction.

Furthermore, fire insurance maps from 1930 and 1950 depict the subject property as consisting of a gasoline filling station with three “G.T.s” - gasoline underground storage tanks (USTs), in the south corner. No repair operations were indicated in 1930; however, an extension to the northwest of the filling station building was constructed by 1950, which was potentially a repair shop. In addition, a second structure with a canopied roof was depicted in 1950 along the west side at 5504 ½ South 55th Street and was labelled as auto repair. Additionally, the EDR environmental database identified the subject property address as a historic auto facility in 1935, 1940, 1946, 1952, and 1956. No information is known about the tanks depicted.

As no documentation investigating the above-mentioned former operations and potential features associated with the former operations (e.g., gas tanks), the historical use of the subject property as a gasoline filling station with three gasoline USTs, automotive repair, and dry cleaning is a potential environmental concern.

6.0 RECOMMENDATIONS AND OPINIONS OF PROBABLE COST

1. Property Solutions recommends further investigation.

An opinion of probable cost to perform a limited subsurface investigation is \$35,000.

7.0 LIMITATIONS

The conclusions as presented above are based upon the agreed upon scope of work outlined in the above report. Consultant makes no guarantees as to the accuracy or completeness of information obtained from others. It is possible that information exists beyond the scope of this investigation. Additional information which was not available to Consultant at the time of writing the Report may result in a modification of the conclusions as presented. The Services performed by Consultant have been conducted in a manner consistent with the level of care ordinarily exercised by members of our profession currently practicing under similar conditions. This report is not a legal opinion, but may under certain circumstances be prepared at the direction of counsel, may be in anticipation of litigation, and may be classified as an attorney client communication or as an attorney work product.

8.2 Definitions

Abandoned property – property that can be presumed to be deserted, or an intent to relinquish possession or control can be inferred from the general disrepair or lack of activity thereon such that a reasonable person could believe that there was an intent on the part of the current owner to surrender rights to the property.

Activity and use limitations – legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

The term activity and use limitations (AULs) is taken from Guide E2091 to include both legal (that is, institutional) and physical (that is, engineering) controls within its scope. Other agencies, organizations, and jurisdictions may define or utilize these terms differently (for example, EPA and California do not include physical controls within their definitions of “institutional controls.” Department of Defense and International County/City Management Association use “Land Use Controls.” The term “land use restrictions” is used but not defined in the Brownfields Amendments).

Actual knowledge – the knowledge actually possessed by an individual who is a real person, rather than an entity. Actual knowledge is to be distinguished from constructive knowledge that is knowledge imputed to an individual or entity.

Actual Knowledge Exception – If the user or environmental professional(s) conducting an environmental site assessment has actual knowledge that the information being used from a prior environmental site assessment is not accurate or if it is obvious, based on other information obtained by means of the environmental site assessment or known to the person conducting the environmental site assessment, that the information being used is not accurate, such information from a prior environmental site assessment may not be used.

Adjoining properties – any real property or properties the border of which is contiguous or partially contiguous with that of the subject property, or that would be contiguous or partially contiguous with that of the subject property but for a street, road, or other public thoroughfare separating them.

Aerial photographs – photographs taken from an aerial platform with sufficient resolution to allow identification of development and activities.

All appropriate inquiries – that inquiry constituting all appropriate inquiries into the previous ownership and uses of the subject property consistent with good commercial and customary practice as defined in CERCLA, 42 U.S.C § 9601(35)(B) and 40 C.F.R. Part 312, that will qualify a party to a commercial real estate transaction for one of the threshold criteria for satisfying the LLPs to CERCLA liability (42 U.S.C § 9601(35)(A) & (B), § 9607(b)(3), § 9607(q); and § 9607(r)), assuming compliance with other elements of the defense. See ASTM E1527-21 Appendix X1.

Approximate minimum search distance – the area for which records must be obtained and reviewed pursuant to Section 8 subject to the limitations provided in that section. This may include areas outside the subject property and shall be measured from the nearest subject property boundary. This term is used in lieu of radius to include irregularly shaped properties.

Bona fide prospective purchaser – (42 U.S.C. § 9607(r)) a person may qualify as a bona fide prospective purchaser if, among other requirements, such person made “all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices.” Knowledge of contamination resulting from all appropriate inquiries would not generally preclude this liability protection. A person must make all appropriate inquiries on or before the date of purchase. The facility must have been purchased after January 11, 2002. See ASTM E1527-21, Appendix X1 for the other necessary requirements that are beyond the scope of this practice.

Brownfields Amendments – amendments to CERCLA pursuant to the Small Business Liability Relief and Brownfields Revitalization Act, Pub. L. No. 107-118 (2002), 42 U.S.C. § 9601 et seq.

Building department records – those records of the local government in which the subject property is located indicating permission of the local government to construct, alter, or demolish improvements on a property.

Business environmental risk (BER) – a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations, some of which are identified in ASTM E1527-21, Section 13.

Commercial real estate - any real property except a dwelling or property with no more than four dwelling units exclusively for residential use (except that a dwelling or property with no more than four dwelling units exclusively for residential use is included in this term when it has a commercial function, as in the construction of such dwellings for profit). This term includes but is not limited to undeveloped real property and real property used for industrial, retail, office, agricultural, other commercial, medical, or educational purposes; property used for residential purposes that has more than four residential dwelling units; and property with no more than four dwelling units for residential use when it has a commercial function, as in the building of such dwellings for profit.

Commercial real estate transaction – a transfer of title to or possession of real property or receipt of a security interest in real property, except that it does not include transfer of title to or possession of real property or the receipt of a security interest in real property with respect to an individual dwelling or building containing fewer than five dwelling units, nor does it include the purchase of a lot or lots to construct a dwelling for occupancy by a purchaser, but a commercial real estate transaction does include real property purchased or leased by persons or entities in the business of constructing or developing dwelling units.

Comparison with Subsequent Inquiry – It should not be concluded or assumed that an inquiry was not all appropriate inquiries merely because the inquiry did not identify recognized environmental conditions in connection with a property. Environmental site assessments must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent environmental site assessments should not be considered valid standards to judge the appropriateness of any prior assessment based on hindsight, new information, use of developing technology or analytical techniques, or other factors.

Construction debris – concrete, brick, asphalt, and other such building materials discarded in the construction of a building or other improvement to property.

Contaminated public wells – public wells used for drinking water that have been designated by a government entity as contaminated by hazardous substances (for example, chlorinated solvents) or petroleum products, or as having water unsafe to drink without treatment.

Contiguous property owner [42 U.S.C. § 9607(q)] - a person may qualify for the contiguous property owner liability protection if, among other requirements, such person owns real property that is contiguous to, and that is or may be contaminated by hazardous substances from other real property that is not owned by that person. Furthermore, such person conducted all appropriate inquiries at the time of acquisition of the subject property and did not know or have reason to know that the subject property was or could be contaminated by a release or threatened release from the contiguous property. The all appropriate inquiries must not result in knowledge of contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the contiguous property owner liability protection. See Appendix X1 for the other necessary requirements that are beyond the scope of this practice.

Controlled recognized environmental condition (CREC) - recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations). For examples of controlled recognized environmental conditions, see Appendix X4.

CREC Discussion - Identification of a CREC is a multi-step process that shall be reflected in the report’s Findings and Opinions section(s), as described in 12.5 and 12.6, including the environmental professional’s rationale for concluding that a finding is a CREC:

(1) When determining whether a recognized environmental condition has been “addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place,” the environmental professional shall review reasonably ascertainable documentation, such as no further action letters (or similar certifications or approvals) issued by the applicable regulatory authority or authorities, or, in the case of self-directed actions, documentation and relevant data that satisfy risk-based criteria established by the applicable regulatory authority or authorities.

(2) In determining whether a recognized environmental condition is “subject to implementation of required controls (for example, activity and use limitations or other property use limitations),” the environmental professional shall identify the documentation providing the control(s) that addresses the recognized environmental condition in the report’s Findings and Opinions section(s).

(3) When the environmental professional determines that a recognized environmental condition is “subject to implementation of required controls,” this determination does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the control(s).

(4) A past release that previously qualified as a CREC may no longer constitute a CREC at the time of the Phase I Environmental Site Assessment if new conditions or information have been identified such as, among other things, a change in regulatory criteria, a change of use at the subject property, or a subsequently identified migration pathway that was not previously known or evaluated.

Continued Viability of Environmental Site Assessment –

Presumed Viability - Subject to 4.8 and the user’s responsibilities set forth in Section 6, an environmental site assessment meeting or exceeding this practice is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). The dates of the components presented in 4.6.2(i), (iii), (iv), and (v) for interviews, review of government records, visual inspections, and declaration by environmental professional, shall be identified in the report. Completion of searches for recorded environmental cleanup liens (4.6.2(ii)) is a user responsibility; however, if the user has engaged the environmental professional to conduct these searches, then that date shall also be identified in the report.

Updating of Certain Components - Subject to 4.8 and the user’s responsibilities set forth in Section 6, an environmental site assessment meeting or exceeding this practice and for which the information was collected or updated within one year prior to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction) may be used provided that the following components of the inquiries were updated within 180 days prior to the date of purchase or the date of the intended transaction. All of the following components must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction:

- (i) interviews with owners, operators, and occupants;
- (ii) searches for recorded environmental cleanup liens (a user responsibility, see Section 6);
- (iii) reviews of federal, tribal, state, and local government records;
- (iv) visual inspections of the subject property and of adjoining properties; and
- (v) the declaration by the environmental professional responsible for the assessment or update.

Compliance with All Appropriate Inquiries - To qualify for one of the threshold criteria for satisfying the LLPs to CERCLA liability, the all appropriate inquiries components listed in 4.6.2 must be conducted or updated within 180 days of and prior to the date of acquisition of the subject property, and all other components of all appropriate inquiries must be conducted within one year prior to the date of acquisition of the subject property. The date of the report generally does not represent the date the individual components of all appropriate inquiries were completed and should not be used when evaluating compliance with the 180-day or 1-year all appropriate inquiries requirements.

User's Responsibilities - If, within this period, the environmental site assessment will be used by a user different than the user for whom the environmental site assessment was originally prepared, the subsequent user must also satisfy the user's responsibilities in Section 6.

Contractual Issues Regarding Prior Assessment Usage – The contractual and legal obligations between prior and subsequent users of environmental site assessments or between environmental professionals who conducted prior environmental site assessments and those who would like to use such prior environmental site assessments are beyond the scope of this practice.

Data failure – a failure to achieve the historical research objective in ASTM E1527-21, § 8.3.1 even after reviewing the standard historical resources in § 8.3.4.1 through 8.3.4.8 that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap. See ASTM E1527-21, 8.3.6.

Data gap – a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.). See ASTM E1527-21 12.6.

De minimis Condition – a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be de minimis condition is not recognized environmental condition nor controlled recognized environmental condition.

Demolition debris – concrete, brick, asphalt, and other such building materials discarded in the demolition of a building or other improvement to property.

Engineering controls (EC) – physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or groundwater on a property. Engineering controls are a type of activity and use limitation (AUL).

Environmental lien – a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon a property, including (but not limited to) liens imposed pursuant to CERCLA 42 U.S.C. §§ 9607(1) & 9607(r) and similar state or local laws.

Environmental professional – a person meeting the education, training, and experience requirements as set forth in 40 C.F.R. § 312.10(b). See ASTM E1527-21 Appendix X2. The person may be an independent contractor or an employee of the user.

Fill dirt – dirt, soil, sand, or other earth, that is obtained off-site, which is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real property. It does not include material that is used in limited quantities for normal landscaping activities.

Good faith – the absence of any intention to seek an unfair advantage or to defraud another party; an honest and sincere intention to fulfill one's obligations in the conduct or transaction concerned.

Hazardous substance – a substance defined as a hazardous substance pursuant to CERCLA 42 U.S.C. § 9601(14), as interpreted by EPA regulations and the courts: “(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, (42 U.S.C. § 6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §§ 6901 et seq.) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 U.S.C. § 7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. The term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).” (See ASTM E1527-21, Appendix X1.)

Hazardous waste – any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of RCRA, as amended, (42 U.S.C. § 6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §§ 6901-6992k) has been suspended by Act of Congress). RCRA is sometimes also identified as the Solid Waste Disposal Act. RCRA defines

a hazardous waste, at 42 U.S.C. § 6903, as: “a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may: (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness, or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”

Hazardous waste/contaminated sites – sites on which a release has occurred, or is suspected to have occurred, of any hazardous substance, hazardous waste, or petroleum products, and that release or suspected release has been reported to a government entity.

Historical recognized environmental condition (HREC) – a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition. For examples of historical recognized environmental conditions, see ASTM E1527.21 Appendix X4.

HREC Discussion - Identification of a HREC condition is a multi-step process that shall be reflected in the report’s Findings and Opinions section(s), as described in 12.5 and 12.6, including the environmental professional’s rationale for concluding that a finding is a HREC:

(1) When determining whether a REC has been “addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the regulatory authority or authorities,” the environmental professional shall review reasonably ascertainable documentation and relevant data that demonstrate that unrestricted use criteria established by the applicable regulatory authority or authorities was met.

(2) A past release that qualified as a HREC may no longer qualify as a HREC if new conditions or information have been identified such as, among other things, a change in regulatory criteria or a subsequently identified migration pathway that was not previously known or evaluated. As noted, the report’s Findings and Opinions section(s) shall include the environmental professional’s rationale for concluding that a condition at the subject property is or is not currently a REC or a HREC.

IC/EC registries – databases of institutional controls or engineering controls that may be maintained by a federal, state or local environmental agency for purposes of tracking sites that may contain residual contamination and AULs. The names for these may vary from program to program and state to state, and include terms such as, but not limited to the following: Declaration of Environmental Use Restriction database (Arizona), Land Use Restriction Sites (California Department of Toxic Substances Control), Sites with Deed Restrictions (California State Water Resources Control Board), Environmental Covenant List (Washington), Sites With Environmental Covenants and Use Restrictions (Colorado), Institutional Control Registry

(Indiana), Environmental Site Tracking and Research Tool (Missouri), and the Pennsylvania Activity and Use Limitation (PA AUL) Registry.

Innocent landowner defense – (42 U.S.C. §§ 9601(35) & 9607(b)(3)) – a person may qualify as one of three types of innocent landowners: (1) a person who “did not know and had no reason to know” that contamination existed on the property at the time the purchaser acquired the subject property; (2) a government entity which acquired the subject property by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation; and (3) a person who “acquired the facility by inheritance or bequest.” To qualify for the innocent landowner defense, such person must have made all appropriate inquiries on or before the date of purchase. Furthermore, the all appropriate inquiries must not have resulted in knowledge of the contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the innocent landowner defense. See ASTM E1527-21, Appendix X1 for the other necessary requirements that are beyond the scope of this practice.

Institutional controls (IC) – a legal or administrative mechanism (for example, “deed restrictions,” restrictive covenants, easements, or zoning) on the use of, or access to, a site or facility to (1) reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. An institutional control is a type of activity and use limitation (AUL).

Interviews – those portions of ASTM E1527-21 practice that are conducted to gather information from an individual or individuals in person, by telephone, in writing, or via other electronic media to meet the objectives of this practice.

Key site manager – the person identified by the owner or operator of a subject property as having good knowledge of the uses and physical characteristics of the property. See ASTM E1527-21 Section 10.5.1.

Land title records, – records that affect the title of real estate, which may include, among other things, deeds, mortgages, leases, land contracts, court orders, easements, liens, and AULs recorded within the recording systems or land registration systems created by state statute in every state and ordinarily administered in the local jurisdiction (usually the county) in which the subject property is located, and available by performing a title search. Such records are publicly accessible, though the process of performing a title search to find land title records often requires specialized expertise or knowledge of the local system (see ASTM E1527-21 Section 5.4 – AULs and Environmental Liens in Land Title Records). Information about the title to the subject property that is filed or stored in any place other than where land title records are, by law or custom, recorded for the local jurisdiction in which the subject property is located, are not considered land title records.

Landowner Liability Protections (LLPs) – a defense to CERCLA available to bona fide prospective purchasers, contiguous property owners, and innocent landowners. See 42 U.S.C. §§ 9601(35)(A), 9601(40), 9607(q), and 9607(r).

Level of Inquiry is Variable – Not every property will warrant the same level of assessment. Consistent with good commercial and customary practice, the appropriate level of environmental site assessment will be guided by the type of property subject to assessment, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry.

Major occupants – those tenants, subtenants, or other persons or entities each of which uses at least 40 percent of the leasable area of the subject property or any anchor tenant when the subject property is a shopping center.

Material threat – obvious threat which is likely to lead to a release and that, in the opinion of the environmental professional, would likely result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a hazardous substance and which shows evidence of damage. The damage would represent a material threat if it is deemed serious enough that it may cause or contribute to tank integrity failure with a release of contents to the environment.

Migrate/migration – for the purposes of this practice, “migrate” and “migration” refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

Vapor migration in the subsurface is described in Guide E2600; however, nothing in this practice should be construed to require application of the Guide E2600 standard to achieve compliance with all appropriate inquiries.

Not Exhaustive – All appropriate inquiries does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an environmental site assessment and the reduction of uncertainty about unknown conditions resulting from additional information.

Obvious – that which is plain or evident; a condition or fact that could not be ignored or overlooked by a reasonable observer while visually or physically observing the property.

Occupants – those tenants, subtenants, or other persons or entities using the property or a portion of the property.

Operator – the person responsible for the overall operation of a facility.

Owner – generally the fee owner of record of the property.

Petroleum exclusion – the exclusion from CERCLA liability provided in 42 U.S.C. § 9601(14), as interpreted by the courts and EPA: “The term (hazardous substance) does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).”

Petroleum products – those substances included within the meaning of the petroleum exclusion to CERCLA, 42 U.S.C. § 9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of 42 U.S.C. § 9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). (The word fraction refers to certain distillates of crude oil, including gasoline, kerosene, diesel oil, jet fuels, and fuel oil, pursuant to Standard Definitions of Petroleum Statistics.⁴)

⁴ *Standard Definitions of Petroleum Statistics*, American Petroleum Institute, Fifth Edition, 1995.

Practically reviewable – information that is practically reviewable means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the subject property without the need for extraordinary analysis of irrelevant data. The form of the information shall be such that the user can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the property or a geographic area in which the subject property is located are not generally practically reviewable. Most databases of public records are practically reviewable if they can be obtained from the source agency by the county, city, zip code, or other geographic area of the facilities listed in the record system. Records that are sorted, filed, organized, or maintained by the source agency only chronologically are not generally practically reviewable. Listings in publicly available records which do not have adequate address information to be located geographically are not generally considered practically reviewable. For large databases with numerous records (such as RCRA hazardous waste generators and registered underground storage tanks), the records are not practically reviewable unless they can be obtained from the source agency in the smaller geographic area of zip codes. Even when information is provided by zip code for some large databases, it is common for an unmanageable number of sites to be identified within a given zip code. In these cases, it is not necessary to review the impact of all of the sites that are likely to be listed in any given zip code because that information would not be practically reviewable. In other words, when so much information is generated that it cannot be feasibly reviewed regarding its impact on the subject property, it is not practically reviewable.

Prior Assessment Usage – The ASTM E1527-21 practice recognizes that environmental site assessments performed in accordance with this practice will include information that subsequent users may want to use to avoid undertaking duplicative assessment procedures. Therefore, this practice describes procedures to be followed to assist users in determining the appropriateness of using information in environmental site assessments performed more than one year prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction. The system of prior assessment usage is based on the following

principles that should be adhered to in addition to the specific procedures set forth elsewhere in the ASTM E1527-21 practice.

Property – real property, including buildings and other fixtures and improvements located on and affixed to the land.

Publicly available – information that is publicly available means that the source of the information allows access to the information by anyone upon request.

Reasonably Ascertainable – information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.

Reasonable time and cost – information that is obtainable within reasonable time and cost constraints means that the information will be provided by the source within 20 calendar days of receiving a written, telephone, or in-person request at no more than a nominal cost intended to cover the source’s cost of retrieving and duplicating the information. Information that can only be reviewed by a visit to the source is reasonably ascertainable if the visit is permitted by the source within 20 days of request.

Recognized environmental conditions – the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

Release – a release of any hazardous substance or petroleum product shall have the same meaning as the definition of “release” in CERCLA 42 U.S.C. § 9601(22)). There are a number of statutory exclusions from the definition of *release* that may impact the *environmental professional’s* opinions and conclusions, such as the normal application of fertilizer. For additional background information, see Legal Appendix (Appendix X1) to X1.1.1 “Releases and Threatened Releases.”

Relevant experience (as used in the definition of environmental professional) – participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see § 312.1(c)) to the subject property.

Rules of Engagement – The contractual and legal obligations between an environmental professional and a user (and other parties, if any) are outside the scope of this practice. No specific legal relationship between the environmental professional and the user is necessary for the user to meet the requirements of this practice.

Uncertainty Not Eliminated – No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and this practice recognizes reasonable limits of time and cost.

Use of Prior Information – Subject to the requirements set forth in ASTM E1527-21, Section 4.6, users and environmental professionals may use information in prior environmental site assessments provided such information was generated as a result of procedures that meet or exceed the requirements of this practice. However, such information shall not be used without current investigation of conditions likely to affect recognized environmental conditions in connection with the property. Additional tasks may be necessary to document conditions that may have changed materially since the prior environmental site assessment was conducted.

User – the party seeking to use Practice E1527 to complete an environmental site assessment of the subject property. A user may include, without limitation, a potential purchaser of subject property, a potential tenant of subject property, an owner of subject property, a lender, or a property manager. The user has specific obligations for completing a successful application of this practice as outlined in ASTM E1527-21, Section 6.

Visually and/or physically observed – during a site visit pursuant to this practice, this term means observations made by visual, auditory, or olfactory means while performing the property visit.

8.3 Acronyms

ACM – asbestos-containing material

AST – aboveground storage tank

ASTM – American Society for Testing and Materials

AUL – Activity and Use Limitations

bgs – below ground surface

CERCLA – Comprehensive Environmental Response, Compensation and Liability Act of 1980
(as amended, 42 USC § 9601 et seq.)

C.F.R. – Code of Federal Regulations

CORRACTS – Facilities subject to Corrective Action under RCRA

CREC – Controlled recognized environmental condition

EA – Environmental assessment

EC – Environmental control

ECRA – Environmental Cleanup Responsibility Act

EDR – Environmental Data Resources, Inc.

EPA – United States Environmental Protection Agency

EPCRA – Emergency Planning and Community Right to Know Act ((also known as SARA Title III), 42 USC § 11001 et seq.)

ERNS – Emergency Response Notification System

ESA – Environmental Site Assessment (different than an *environmental compliance audit*, 3.2.27)

FOIA – U.S. Freedom of Information Act (5 U.S.C. §552 as amended by Public Law No. 104-231, 110 Stat.)
FR – Federal Register
HREC – Historical recognized environmental condition
ICs – Institutional Controls
ISRA – Industrial Site Recovery Act
LBP – Lead-based paint
LLP – Landowner Liability Protections under the *Brownfields Amendments*
LRST – Leaking registered storage tank
LUST – Leaking underground storage tank
SDS – Safety data sheet
NCP – National Contingency Plan
NFRAP – Sites where no further remedial action is planned under CERCLA
NPDES – National Pollutant Discharge Elimination System
NPL – National Priorities List
NVLAP – National Voluntary Laboratory Accreditation Program
OSHA – Occupational Safety and Health Administration
PACM – Presumed asbestos-containing material
PCBs – Polychlorinated biphenyls
PLM – Polarized light microscopy
RCRA – Resource Conservation and Recovery Act (as amended, 42 U.S.C. § 6901 et seq.)
RCRIS – Resource Conservation and Recovery Act Information System
REC – Recognized environmental condition
ROC – Record of communication
RST – Registered storage tank
SACM – Suspect asbestos-containing material
SARA – Superfund Amendments and Reauthorization Act of 1986 (amendment to CERCLA)
SIC – Standard Industrial Classification
TEM – Transmission electron microscopy
TSDf – Hazardous waste treatment, storage or disposal facility
U.S.C. – United States Code
USEPA – United States Environmental Protection Agency
USGS – United States Geological Survey
UST – Underground storage tank

8.4 Purpose

The purpose of a Phase I Environmental Assessment is to evaluate issues that may have an impact on the subject property. The purpose of the ASTM E1527-21 practice is to define good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, the practice is intended to permit a User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the “landowner liability protections,” or “LLPs”): that is, the

practice that constitutes “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35)(B). The goal of this process is to identify the presence or likely presence of hazardous substances or petroleum products on the property and identify conditions that indicate an existing release, a past release, or a material threat of a release of hazardous substances or petroleum products into structures on the subject property or into the ground, groundwater, or surface of the subject property. The purpose of this report is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. This report is also not intended to serve as a compliance assessment of the subject property or to identify health and safety issues or procedures. The ASTM E1527-21 DOES NOT address whether requirements in addition to all appropriate inquiry have been met in order to qualify for the LLPs (for example, the duties specified in 42 U.S.C. §9601(b)(3)(a) and (b) and cited in Appendix X1 of the ASTM Standard, including the continuing obligation not to impede the integrity and effectiveness of activity and use limitations (AULs), or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations).

The ASTM E1527-21 practice DOES NOT address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provision of the LLPs. Per the ASTM Standard, Users are cautioned that federal, state, and local laws may impose environmental assessment obligations that are beyond the scope of this practice. Users should also be aware that there are likely to be other legal obligations with regard to hazardous substances or petroleum products discovered on the property that are not addressed in the ASTM practice and that may pose risks of civil and/or criminal sanctions for non-compliance.

8.5 Significant Assumptions

The following assumptions are made by Property Solutions in this report. Property Solutions relied on information derived from secondary sources including governmental agencies, the client (User), designated representatives of the client (User), property contact, property owner, property owner representatives, computer databases, and personal interviews. Except as set forth in this report, Property Solutions has made no independent investigation as to the accuracy and completeness of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews and has assumed that such information is accurate and complete. Property Solutions assumes information provided by or obtained from governmental agencies including information obtained from government websites is accurate and complete. Groundwater flow and depth to groundwater, unless otherwise specified by on-property well data, are assumed based on contours depicted on the United States Geological Survey topographic maps. Property Solutions assumes the property has been correctly and accurately identified by the client (User), designated representative of the client (User), property contact, property owner, and property owner’s representatives. Property Solutions assumes that the Client (User), Client representatives, Client Legal Counsel, designated representatives of the Client, Key Site Manager, property contact, property owner, property owner representatives, and property brokers, used good faith in answering questions and

in obtaining information for the subject property as defined in 10.8 of the ASTM E1527-21 practice. This would also include obtaining those helpful documents from previous owners, operators, tenants, brokers, financial institutions etc. Property Solutions also assumes the Client will designate appropriate and knowledgeable people for performance of the Phase I Environmental Assessment including Key Site Managers.

8.6 Special Terms and Conditions

The findings, observations, conclusions, and recommendations of this report are limited by the contract technical requirements and the methods used to perform the services outlined in the scope of work. These services have been performed in accordance with the described scope for Phase I Environmental Assessments. In order to perform a comprehensive environmental evaluation, subsurface investigation and testing would be required to definitively evaluate whether contamination has affected the subject property. Therefore, the findings, conclusions, and recommendations presented herein are based solely on the scope of work previously described and information gathered. Incomplete or outstanding information identified throughout the body of this report including data gaps is considered a limitation to the assessment. Limitations to the assessment also include weather conditions, vegetation cover, parked cars, trucks, dumpsters, and anything limiting visual observation of or physical access to the subject property and neighboring properties. This report and scope is not an environmental compliance audit.

No environmental assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of the ASTM practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and the ASTM practice recognizes reasonable limits of time and cost.

Appropriate inquiry does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an environmental site assessment and reducing uncertainty about unknown conditions resulting from additional information.

Subject to Section 4.8 of the ASTM E1527-21 Standard, an environmental site assessment meeting or exceeding this practice is presumed to be viable when it is completed within 180 days prior to the date of acquisition of the subject property or (for transactions not involving an acquisition such as a lease or refinance the date of the intended transaction). If within this period the assessment will be used by a user different than the User (client) for whom the assessment was originally prepared, the subsequent user (if authorized to rely on the report as identified in Section 1.6 Reliance of this report) must also satisfy the User's Responsibilities in Section 6 of the ASTM E1527-21 Standard. If this assessment is over 180 days old it is not valid and a new assessment should be performed per the ASTM Standard.

All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the property visit. Responses received from interviewees, the user, local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

No other person or entity, unless specifically identified in Section 1.6 of this report may rely on this report. Subsequent consultants and subsequent Users may not rely on this report or information included in this report. Property Solutions Inc. will not be held liable in any way for any and all unauthorized use of this report both currently and in the future. Consultants and subsequent Users must specifically and separately verify all information and not rely on the facts, findings, conclusions, opinions and recommendations of this report. Future use of this report by consultants or subsequent Users is strictly prohibited and not authorized to evaluate the appropriateness of using this information in environmental site assessments performed in the future by anyone other than Property Solutions Inc. Subsequent consultants and subsequent Users may not include this report or information included in this report (unless publicly available) without the written authorization of Property Solutions Inc.

No other special terms and conditions are applicable to this Phase I Environmental Assessment.

**ATTACHMENT I
PROFESSIONAL
QUALIFICATIONS**

Nicholas Daigle

ENVIRONMENTAL SCIENTIST

EDUCATION

M.S in Geology
Louisiana State University
Baton Rouge, Louisiana

B.S in Geology
Louisiana State University
Baton Rouge, Louisiana

ACCREDITATIONS

USEPA-AHERA Certified Asbestos Inspector

SUMMARY OF QUALIFICATIONS

Mr. Daigle's professional experience is focused primarily on the performance of Phase I Environmental Site Assessments, Preliminary Assessments, and File Reviews for properties throughout New Jersey and Pennsylvania, as well as less frequent assessments of properties in Virginia, Washington, D.C., Louisiana, Illinois, Florida, and other states in the continental U.S. Mr. Daigle is also experienced in the detection of asbestos fibers in building materials using polarized light microscopy (PLM), as well as the preparation and analysis of samples of various media (e.g. drinking water, soils, surfaces, paint) for lead concentrations using atomic absorption spectroscopy (AAS).

REPRESENTATIVE PROJECT EXPERIENCE

Phase I Environmental Site Assessments/Preliminary Assessments – Carteret, New Jersey

Performed environmental site assessments and preliminary assessment add-ons for three industrial buildings constructed between 1940 and 2002. All three properties were once part of a larger area known as the Carteret Ordnance Motor Reception Park (Carteret Sub-Depot), which was used for military vehicle maintenance and storage by the Raritan Arsenal during WWII. These properties were later redeveloped and used for various industrial and manufacturing operations including a lumber yard, blending of fragrances and flavors, precious metal fabrication, automobile powder-coating, and truck maintenance and repairs. Remedial investigation activities at these properties spanned decades, with documented soil and groundwater contamination from metals, CVOCs, PAHs, and other contaminants requiring the implementation of multiple engineering and institutional controls to limit exposure.

Phase I Environmental Site Assessment – Brooklyn, New York

Performed an environmental site assessment on a 195,000 square foot industrial building constructed in 1968 and historically used as a plastics manufacturing facility. Multiple groundwater sampling events have occurred at the property resulting in the discovery of LNAPL and PCE in groundwater. During remedial activities, a passive sub-slab depressurization system (SSDS) was installed at the property; however, no VOC sampling events had been performed to demonstrate the effectiveness of the SSDS. A vapor intrusion investigation is currently underway to further evaluate the potential vapor concern.

Phase I Environmental Site Assessment – Hazelton, Pennsylvania

Performed an environmental site assessment on a 50-acre parcel of undeveloped land that was historically used for surficial coal strip mining and deep underground coal mining from approximately 1938 to the early 1980s. During the assessment it was discovered that a portion of the property was also formerly part of a steam electrical station, and that a 10-acre portion of the property was used as a deposition area for fly ash. The property was subsequently entered into the Pennsylvania Land Recycling Program (a.k.a. Act 2 Program) and site characterization activities were conducted through 2002. Property Solutions conducted further characterization of the area of former fly ash deposition in 2019, noting elevated levels of arsenic and vanadium. As the property was proposed for redevelopment, Property Solutions recommended that impacted soils and materials be handled under a Soil Management Plan (SMP) during construction activities. The SMP was approved by the PADEP and is currently being implemented.

Phase I Environmental Site Assessment – Burlington, Massachusetts

Performed an environmental site assessment on a 122-acre, eight building business complex constructed between 1997 and 2008. Historically, the property was used by Radio Corporation of America (RCA), General Electric, and Martin Marietta Corporation (MMC)/Lockheed Martin Corporation (LMC) for manufacturing and testing of military electronic equipment. Contamination identified on the site from historical operations included metals, cyanide, and a still actively-monitored CVOC groundwater plume.

Phase I Environmental Site Assessment – Ontario, California

Performed an environmental site assessment on a 857,181 square foot industrial warehouse building constructed in 2002. During the assessment, an extensive area of potential visible mold growth was identified in the building. The performance of a Comprehensive Mold Survey was recommended, along with the remediation of all building materials found to be supporting fungal growth.

Carmelita D. Cavaness

SENIOR TECHNICAL REVIEWER

EDUCATION	Master of Science Tuskegee University Tuskegee, Alabama
ACCREDITATIONS	OSHA 40 Hour HAZWOPER AHERA Asbestos Inspector Georgia Erosion Control Specialist National Association of Environmental Professionals

SUMMARY OF QUALIFICATIONS

Ms. Cavaness has over 20 years experience in performing and managing Phase I Environmental Assessments for commercial, multi-family and industrial properties throughout the United States. In addition to Phase I's, Ms. Cavaness has performed moisture studies, transaction screens, NEPA Screening reports and All Appropriate Inquires. She has a solid understanding of ASTM Standards along with in-depth knowledge of federal regulations to ensure compliance and accuracy in reporting.

REPRESENTATIVE PROJECT EXPERIENCE

Phase I Environmental Site Assessments – Georgia

Ms. Cavaness performed several Phase I environmental site assessments of HUD multi-family properties including performing Noise calculations and assisting with the extended historical research of the various properties for grant purposes with a financial institution.

NEPA Compliance – Georgia, Alabama

Managed the preparation and execution of NEPA Compliance reports and associated documents ensuring adherence to federal regulation for various telecommunication corporations.

Hazardous Waste Management Compliance Audit – Georgia, Alabama, Florida

Ms. Cavaness inspected a chain on vehicle repair services for the storage and management of hazardous and universal wastes, correcting and bringing into compliance the facilities that were out of compliance.

Revision of Hazardous Waste Management Plans – Florida

Ms. Cavaness and team conducted field assessments of the operations of Naval Air Substations for the revision of the Hazardous Waste Management Plans to make specific for each station. Ms. Cavaness was charged with the identification and documentation of hazardous materials and usage.

Spills and Control Measures Plan - Georgia, South Carolina

Performed inspections and documented uses of chemicals at a large chain that includes automobile maintenance to reduce the risk of releases at the facilities and to ensure conformity between the various facilities.

Other Project Experience

In addition to the hundreds of Phase I Environmental Site Assessments performed throughout the country, Ms. Cavaness has performed UST removals, soil and groundwater testing, asbestos inspection, lead in drinking water sample collection, and radon testing. Ms. Cavaness conducted weekly inspections during the installation of a natural gas pipeline near Georgia waterways to ensure regulatory compliance of GA Erosion Control regulations.

TIM CLACKETT

REGIONAL Director

EDUCATION Bachelors of Environmental Science and Geography
State University of New York at Buffalo 1990
Buffalo, New York

ACCREDITATIONS OSHA 40-hour HAZWOPER Training
USEPA-AHERA Certified Asbestos Inspector
OSHA Confined Space Entry Training
ACOE Wetlands Delineator Training
NJDEP Subsurface Evaluator

SUMMARY OF QUALIFICATIONS

Mr. Clackett has approximately 25 years' experience performing and managing environmental assessments for commercial, residential, industrial, and institutional real estate transactions throughout the United States, Canada, and the Caribbean. Mr. Clackett is experienced in landfill assessments and closure compliance in accordance with federal and state regulations. Mr. Clackett has performed wetland delineations in accordance with the Army Corps of Engineers 1987 Manual. Mr. Clackett has conducted carbon monoxide modeling for various road improvement projects. Mr. Clackett has developed and implemented soil, groundwater, surface water, sediment, soil-gas, and air sampling and analysis plans for various hazardous waste sites along with the associated proposal development. In addition, Mr. Clackett has also provided such services as acting as a liaison between regulatory agencies and clients for remedial action cases to obtain regulatory closure in New Jersey, New York, Pennsylvania, and Texas.

REPRESENTATIVE PROJECT EXPERIENCE

Vacant Land – Kings Park, NY

Mr. Clackett performed an environmental assessment for a vacant parcel of land located in Kings Park, NY adjacent to a previously closed landfill. The assessment included an evaluation of prior use of the property, the collection of soil gas samples in areas suspected of being impacted by the adjacent landfill and review of previous reports for the landfill. Drilling events exceeded 70 feet below ground surface.

Compliance Audit – Town of North Hempstead, NY

Mr. Clackett performed a hazardous material storage compliance audit for properties owned by the Town of North Hempstead. The assessment included an evaluation of Underground Storage Tanks (UST), Aboveground Storage Tanks (AST) and hazardous material storage areas for compliance with applicable federal, state, and local regulations.

Landfill Closures, Various Locations

Mr. Clackett has performed several landfill closure investigations in Long Island and Staten Island, NY. The closure investigations included the design of sampling plans, the collection of representative air, soil and water samples and the submittal of closure documents to satisfy state regulations. Mr. Clackett has also performed quality assurance inspections for construction activities related to landfill closures.

Wetland Delineation – Putnam County, NY

Mr. Clackett performed a wetland delineation for a proposed courthouse in Putnam County, NY. The wetland delineation included the identification of wetland vegetation and soils in accordance with the Army Corp of Engineers 1987 Wetland Delineation Manual.

Carbon Monoxide Survey – Route 25, Centereach, NY

Mr. Clackett has performed a carbon monoxide survey of a section of Route 25 located in Centereach, NY for the NYS Department of Transportation. The carbon monoxide survey included modeling of carbon monoxide concentrations at critical locations using the USEPA designated Cal3QHC model. Modeling results were used in the design phase for the rehabilitation of the state owned roadway.

Other Project Experience

Mr. Clackett has overseen various groundwater monitoring well installations, geophysical surveys, plumbing video inspections, soil gas surveys, and underground soil probing projects. Based on the findings of the Phase II activities, Mr. Clackett has advised clients of remedial alternatives and provided cost estimations.

Mr. Clackett has performed and managed thousands of Phase I environmental due diligence evaluations of industrial, commercial, and residential properties for various lending institutions and private clients involving: historic research of property usage, bulk sampling for asbestos-containing materials and lead-based paint, radon and lead-in-drinking water, interpretation of environmental database reports, identification of potential contamination and liability based on research, interviews, field evaluation, and documentation through technical report writing.

Mr. Clackett has managed numerous projects for portfolio due diligence associated with acquisitions. Portfolios of residential, commercial, retail, warehouse/ distribution, petroleum filling stations, and industrial properties. Subsequent to acquisition, Mr. Clackett has assisted clients in management of environmental issues across their platform.

Key Site Manager Questionnaire

Please provide the following information, if available, before the property visit by Property Solutions. The key site manager should be a person with good knowledge of the uses and physical characteristics of the property, such as a property manager, building manager, the chief physical plant supervisor, or maintenance supervisor.

Complete pages 1 through 3. If applicable, provide information described in subsequent pages. If additional pages for response are necessary, please attach them to this form.

Please sign your name and print your name and the date below. By signing you state that the information you provided herein is accurate to the best of your knowledge.

Signature Mary K. McSpadden Date 12-3-2025 Print Name Mary K. McSpadden

Property Information				
Property Name <u>SFK Properties, LLC</u>		Property Identification (e.g. Block & Lot or Parcel ID #) <u>Parcel ID 2300214008006000</u>		
Property Street Address <u>5500 1st Avenue South</u>				
Property City <u>Birmingham</u>		Property County <u>Jefferson</u>		Property State & Zip <u>Alabama 35212</u>
Property Size (acres) <u>0.51</u>	# Buildings <u>1</u>	# Units <u>1</u>	# Stories <u>1</u>	Square footage (total) <u>2990</u>
Foundation ☒ Slab-on-grade ☐ Basement		Property Use ☐ Commercial ☐ Residential ☐ Industrial ☐ Other (specify)		
Describe renovations & provide dates: <u>None</u>				
Key Site Manager Contact Information				
Key Site Manager Name & Title <u>Mary McSpadden</u>		Company <u>Smiles for Keeps Co-Owner / President</u>		
Address <u>5500 1st Avenue S.</u>		City <u>Birmingham</u>	State & Zip <u>AL 35212</u>

1. UTILITIES			
Utility	Provider	Utility	Provider
Electricity	Alabama Power	Fuel Oil	N/A
Natural Gas	N/A	Steam	N/A
Sanitary Sewerage	Birmingham Water & Sewer	Solid Waste Removal (include medical waste)	
Potable Water	" " " "		

If a potable water well and/or septic system is located at property, please complete Sections 5.1.6 and/or 5.1.8.

2.1 CURRENT OPERATIONS				
Is the property currently used for any of the following operations? (Check all that apply.)				
☐ Manufacturing operations ☐ Photodevelopment	☐ Gasoline service station ☐ Junkyard or landfill ☐ Automobile repair ☐ Waste treatment, transfer, storage, disposal, processing, or recycling ☐ Printing facility ☐ Dry cleaning*			
*If dry cleaning operations currently occur or have occurred at property, please complete Section 5.1.9.				
Describe current operations: Smiles for Keeps is a family dental practice that performs dental services and treatment for all ages				
2.2 PAST OPERATIONS & OWNERS				
Has the property ever been used for any of the following operations? (Check all that apply.)				
☐ Manufacturing operations ☐ Photodevelopment	☐ Gasoline service station ☐ Junkyard or landfill ☐ Automobile repair ☐ Waste treatment, transfer, storage, disposal, processing, or recycling ☐ Printing facility ☐ Dry cleaning*			
*If dry cleaning operations currently occur or have occurred at property, please complete Section 5.1.9.				
Describe property use/operations prior to the construction of buildings currently at the property:				
Parking lot for bank				
Provide previous property owners, occupants, and/or operators. Attach pages as necessary.				
Company	Owner/ Occupant/ Operator	Dates of occupancy	Operations	Contact name & number
SouthTrust Bank				
2.3 NEIGHBORING OPERATIONS				
Check any operations which occur, or have occurred in the past, at adjoining properties.				
☐ Manufacturing operations ☐ Photodevelopment	☐ Gasoline service station ☐ Junkyard or landfill	☐ Automobile repair ☐ Waste treatment, transfer, storage, disposal, processing, or recycling	☐ Printing facility ☐ Dry cleaning*	

3. EXISTING DOCUMENTATION					
Does the following documentation exist? If yes, please provide copies.					
Yes	No		Yes	No	
☐	☒	ESA Reports	☐	☒	Community Right-to-know plan
☐	☒	Env. Compliance Audit Reports	☐	☒	Safety Plans
☐	☒	Environmental Permits	☐	☒	SPCC Plans
☐	☒	UST/AST registrations	☐	☒	Emergency preparedness & prevention plans
☐	☒	Underground injection permits	☐	☒	Hydrogeologic reports
☐	☒	MSDS	☐	☒	Government correspondence & violations
☐	☒	Hazardous waste generator notices	☐	☒	Recorded AULs
☐	☒	Geotechnical studies	☐	☒	Environmental Liens
☐	☒	Risk Assessments	☐	☒	Other

4. KNOWN ENVIRONMENTAL CONCERNS

Are you aware of any pending, threatened, or past litigation relevant to <i>hazardous substances</i> or <i>petroleum products</i> in, on, or from the property?	Yes ☐	No ☒
Are you aware of any pending, threatened, or past administrative proceedings relevant to <i>hazardous substances</i> or <i>petroleum products</i> in, on, or from the property?	Yes ☐	No ☒
Are you aware of any notices from governmental agencies regarding possible violation of environmental laws or possible liability relating to <i>hazardous substances</i> or <i>petroleum products</i> ?	Yes ☐	No ☒
Are you aware of any remediation activities that have occurred at the property or adjacent properties in response to contaminated soil, groundwater, and/or surface water?	Yes ☐	No ☒
Are you aware of any proposed remediations at the property?	Yes ☐	No ☒

If yes to any of the above, describe. Attach pages as necessary. _____

Are you aware of any of the following currently or previously located at the subject property? (Check all that apply. If you answer yes to any of the items, provide the additional information described on the following pages.)				If yes, provide additional information in section below:
	Yes – currently	Yes – previously	No – never	
Underground storage tanks:	☐	☐	☒	5.1.1
Aboveground storage tanks:	☐	☐	☒	5.1.2
Electrical transformers or capacitors:	☐	☐	☒	5.1.3
Hydraulic equipment, including elevators, dock levelers, lifts, compactors, & balers:	☐	☐	☒	5.1.3
Chemical storage (greater than 5 gallons):	☐	☐	☒	5.1.4
Hazardous wastes, including used oil:	☐	☐	☒	5.1.5
Wells, including potable water wells, monitoring wells, test wells:	☐	☐	☒	5.1.6
Sumps:	☐	☐	☒	5.1.6
Pits:	☐	☐	☒	5.1.6
Floor drains:	☐	☐	☒	5.1.6
Surface water bodies, stormwater discharge, and/or wetlands:	☐	☐	☒	5.1.7
Lagoons:	☐	☐	☒	5.1.8
Septic systems:	☐	☐	☒	5.1.8
Oil water separators:	☐	☐	☒	5.1.8
Dry cleaners:	☐	☐	☒	5.1.9
Asbestos:	☐	☐	☒	5.2.1
Radon studies/mitigation systems:	☐	☐	☒	5.2.2
Lead:	☐	☐	☒	5.2.3
Air emissions, including emergency generators, fume hoods, & spray paint booths:	☐	☐	☒	5.2.4
Mold growth and/or water intrusion:	☐	☐	☒	5.2.5

If you have answered No to all of the above, you are finished with the Questionnaire.

5. ADDITIONAL INFORMATION

Underground Storage Tanks (USTs)

If USTs are/were located at the property (including closed or removed USTs), complete the following tables:

UST No.	Capacity (gallons)	Contents	Material of Construction	Install Date	LD? (Y/N)	CP? (Y/N)	S/O? (Y/N)	DLIT
1								
2								
3								
4								
5								

LD: Leak detection, CP: Corrosion Protection, S/O: Spill/Overflow Protection, DLIT: Date of last integrity test

UST No.	Location/Former Location	Use/Former Use	Registered? (Y/N)	Permit No.	Status
1					
2					
3					
4					
5					

Status: ACT – Active, NIU – Not in use, REM – Removed, CIP – Closed in place

Do any underground pipelines traverse the property? Include easements. Yes ☐ No ☐

Please attach additional UST information and documentation, including tightness test reports, closure reports, registration forms, permits, correspondence (e.g. No Further Action letters), and approvals.

Aboveground Storage Tanks (ASTs)

If ASTs (include & indicate **silos**) are/were located at the property, please describe:

Capacity (gallons)	Contents	Material of Construction	Location	Install Date	Secondary Containment? (Y/N)	Permit # &/or Facility #	Status	Registered? (Y/N)

Status: ACT – Active, NIU – Not in use, REM – Removed

Please attach any additional AST documentation.

Electrical & Hydraulic Equipment

Are the transformers labeled "Non-PCB" or has the owner verified they are Non-PCB? Yes ☐ No ☒

Have any releases of dielectric fluid occurred? Yes ☐ No ☒

Are dry-type transformers located at the property? Yes ☐ No ☒

Do any high-tension electric transmission lines traverse the property? Include easements. Yes ☐ No ☒

Number of hydraulic elevators at the property: 0 Number of cable-drawn elevators at property: 0

If applicable, who services the hydraulic elevators? _____

Describe any other hydraulic equipment at the property (including trash compactors, lifts, & dock levelers):

If hydraulic elevators are located at property, have any hydraulic fluid releases occurred? Yes ☐ No ☐

Chemical Storage

Chemical	Use	Amount Stored	Type of Container	MSDS present? (Y/N)	Leaks from container?

Has a significant release of chemicals (greater than 5 gallons) occurred at the property? Yes ☐ No ☒

Are you aware of any parts cleaners or degreasers located at the property? Yes ☐ No ☒

Please attach additional chemical storage information/documentation, including information concerning any releases, if applicable.

Waste Generation

Waste type/description	Location stored on property	Quantity generated per month	Waste manifest? (Y/N)	Waste handler

Please attach additional waste information, including copies of waste manifests for each above types of waste.

Wells, Sumps, Pits, & Floor Drains

Wells: Describe wells present at the property, include quantity, type (monitoring, test, potable water supply, etc.), active/inactive, depths of wells, and locations.

If water quality tests have been performed on water provided by wells, please attach copy of analytical results.

Sumps: Describe location, whether they are equipped with pumps, and if so, to where the pumps discharge.

Pits: Describe pits' construction and whether equipped with sump. Include hydraulic elevator pits and quantity, and to where sump discharges or if it retains all it collects.

Floor drains: Indicate locations and to where they discharge.

Compressor Closet

Is/are grease trap(s) located at the property? If yes, please provide following information.

Yes ☐

No ☒

Locations: _____

Construction: _____

Who services them? _____

How often cleaned out? _____

Surface Water Bodies & Stormwater Discharge

Are stormwater retention or detention basins located at the property?

Yes ☐

No ☒

If yes, are there outflow or overflow structures?

Yes ☐

No ☒

Are there streams and/or ponds at the property?

Yes ☐

No ☒

Are wetlands located at the property?

Yes ☐

No ☒

If yes, where? _____

To where do roof drains/leaders discharge? _____

Does the property have a NPDES permit?

Yes ☐

No ☒

Lagoons, Septic Systems, & Separators

Lagoons: Describe purpose, years of existence, and location:

Septic system: If currently or previously located at property, provide following: ☐ Active

☐ Inactive

☐ Closed

Type: ☐ Tank

☐ Leach field

☐ Spray field

☐ Cesspool

☐ Other (specify) _____

Describe location: _____

Separator: If an oil/water separator is located at the property, provide following:

Location: _____

Discharges to: _____

Tank capacity: _____

Construction: _____

Permit required? _____

Used oil removed by: _____

Drycleaners

Establishment Name	
Establishment Address	
Years of Operation	
Unit Manufacturer	
Unit Model	
Model Year	
Model Type	
Installation Date	
Original or Replacement Unit	
Air Discharge	☐ Yes ☐ No
Condensate Discharge	☐ Yes ☐ No
Condensate Receptor	☐ Floor drain ☐ Collection bucket ☐ Other _____
Solvent Storage	(location and/or internal reservoir)
Solvent Supplier	
Method of Filling Solvent	☐ Via pump truck directly ☐ Poured by hand
Solvent Type	
Spent Solvent Removal	
Secondary Containment	☐ Yes Type _____ ☐ No
Solvent-resistant floor coating	☐ Yes ☐ No
Floor Drains or Sumps	☐ Yes ☐ No
Slab or basement	
Cracks or Staining	
Filters	☐ Yes ☐ No
Condensate Atomizer/Mister	☐ Yes ☐ No
RCRA Identification Number

Other Chemicals			N/A	N/A		

Dry cleaning continued on next page.

5.1.9 Drycleaning - continued

Have secondary containment structures been installed around or beneath each machine or item of equipment in which dry cleaning solvents are used?	Yes ☐	No ☐
If yes, then indicate when the containment structure(s) was installed:		
Have secondary containment structures been installed around or beneath each area where dry cleaning solvents and / or waste which contains dry cleaning solvents are stored?	Yes ☐	No ☐
If yes, indicate date when the containment structure(s) was installed:		
Have the floor surfaces of the dry cleaning facility been sealed or otherwise rendered impervious in all areas in which solvents may leak, spill, or otherwise be released?	Yes ☐	No ☐
If yes, indicate when the floors were sealed:		
Has new equipment with closed-loop technology been installed?	Yes ☐	No ☐
Has old equipment been retrofitted with closed-loop technology?	Yes ☐	No ☐
Have floor drains ever been present at the premises?	Yes ☐	No ☐
Has the facility ever been connected to a septic system?	Yes ☐	No ☐
Describe any spilling, leaking, seeping, pouring, emitting, emptying, dumping, or mis-application of dry cleaning solvents that has occurred at any time during the operation of the facility prior to this application (attach additional pages if necessary). If none, so state.		
Describe how wastes are disposed of (attach additional pages if necessary).		

Historical Dry Cleaning Operations

Dry Cleaner Name	Address	RCRA ID Number	Years of Operation

5.2.1 Asbestos-containing materials

Describe asbestos-containing materials (ACMs) at the property, amount, location, & type.

Has an asbestos survey been conducted at the property?	Yes ☐	No ☐
Has an asbestos abatement been conducted at the property?	Yes ☐	No ☐
Is an ACM Operations & Maintenance Plan in place at the property?	Yes ☐	No ☐

If yes to the above questions, please attach reports/documentation.

5.2.2 Radon

Has a radon study been conducted at the property? If yes, please provide. Yes ☐ No ☐

Describe radon mitigation systems at the property, including type (active/passive) and locations.

-------	--	--

5.2.3 Lead

Are there sources of lead (aside from lead-based paint – discussed below) at the property, such as water or soil contamination? Yes ☐ No ☒

Are lead-based paints located at the property? If yes, describe locations. Yes ☐ No ☒

If the property is residential, does HUD own the property or does the owner receive mortgage insurance under a program administered by HUD?	Yes ☐	No ☐
---	------------------------------	-----------------------------

If the property is residential, does the property (or any of its tenants) receive project-based rental assistance under a HUD program (including Section 8 housing)?	Yes ☐	No ☐
--	------------------------------	-----------------------------

If yes to the above, is the amount more than \$5,000 per year per unit?	Yes ☐	No ☒
---	------------------------------	--

Has a lead-based paint survey and/or abatement been conducted at the property?	Yes ☐	No ☐
--	------------------------------	-----------------------------

If yes to the above question, please attach lead-based paint survey and/or abatement documentation.

5.2.4 Air Emissions

Have federal, state, county, or local permits been applied for and/or received for operations conducted at the property for air emissions? If yes, please describe – include permit number, issuing authority, purpose of permit, date of approval or denial, and expiration date.

Yes ☐

No ☒

If an emergency generator is located at property, please provide the following information:

Make/model: _____ Kilowatts: _____ Fuel: _____

How often does it run? _____ Owner: _____ Tank size: _____

Permits required? _____ Location: _____ Permit No. & Exp. Date: _____

Is/are there spray paint booth(s) located at the property? If yes, indicate frequency air filters are changed, disposal method, and whether air emissions permits are required.

Yes ☐

No ☐

5.2.5 Water Intrusion

Are you aware of any current water leaks?

Yes ☐

No ☒

Are you aware of any past water leaks?

Yes ☐

No ☒

Is/are the building(s) air conditioned?

Yes ☒

No ☐

Is mold visible in the building(s)?

Yes ☐

No ☒

Is there a pool or other water features (such as a fountain) in the building(s)?

Yes ☐

No ☒

Are the bathrooms and dryers (if applicable) vented to the exterior?

Yes ☒

No ☐

Have there been reports of illness due to air quality, or any indoor air quality or ventilation problems at the property?

Yes ☐

No ☒

Does property management have a mold response plan?

Yes ☐

No ☒

Please attach water intrusion documentation, including a mold response plan, mold handling plan, or laboratory results from mold samples collected at the property.

**Re: Healthcare Office
5500 1st Avenue South
Parcel:
Birmingham, Jefferson County, Alabama 35212
Property Solutions Inc Project #: 20251207**

Dear Freedom of Information Officer:

Property Solutions Inc. is conducting a Phase I Environmental Assessment & Property Condition Assessment of the aforementioned property. As part of a property assessment, we wish to determine whether government agencies possess records on the subject property that may include potential environmental or engineering concerns. We request information on the following:

- **Permits, reports, and information for Underground or Aboveground Storage Tanks (UST/AST), oil / water separator or clarifier installation or removal any current or previous building at the property**
- **Permits for flammable materials storage**
- **Permits of asbestos removal**
- **Permits for the installation or decommissioning of drinking water wells & septic systems**
- **Demolition/renovation permits for the current building of any other prior building on this property**
- **Any known spills, releases, hazardous materials**
- **Copies of any records of outstanding or open building or fire code violations at the property.**
- **Copies of any building permits or any open building permits at the property.**
- **Copies of Certificates of Occupancy for the property.**
- **Outstanding fire code violations associated with storage / handling / use of flammable or hazardous materials**
- **Fires or spills**

REQUEST FOR PUBLIC RECORDS

The City of Birmingham, Alabama
Office of the City Clerk
3rd Floor City Hall
710 North 20th Street
Birmingham, AL 35203-2290

Please submit this form by hand delivery or by U.S. Mail.

Pursuant to the §36-12-40, *et seq.*, Code of Alabama 1975, Inspection and Copying of Records, “Every resident has a right to inspect and take a copy of any public record of this state, except as otherwise expressly provided by applicable law.” The fee schedule to obtain copies of records and/or to inspect records and the statement of Public Records Policy are incorporated herein and attached hereto. Please read carefully before submitting your records requests or making inquiries.

Your Name Brian Gallagher Date 12/01/2025

Address Property Solutions Inc, 323 New Albany Road

City/State/Zipcode Moorestown, NJ 08057

Phone Number _____ Email ecoordinator@propertyolutionsinc.com

Agency or Department that you are requesting public records from: Building, Fire

Purpose of Request: Phase I Environmental Assessment

This form may be submitted to the City Clerk’s Office, at the above address. This form may be submitted in person, or by United States Mail. If clarification of your request is required, a records representative will contact you after receipt to secure additional information. *Do not remit payment until you have been advised of the fee amount.* Allow for a sufficient and reasonable time period for records to be made available for inspection or copying. The time will include making available staff that may be limited due to performance of critical day-to-day work assignments. Please provide Photo Identification. Identification will be required to demonstrate proof of permanent residency in the State of Alabama including, but not limited to, an Alabama driver license or voter registration card.

Description of records requested. Be as specific as possible. The City is not obligated to respond to a request that is vague, ambiguous, overly broad, or unreasonable in scope, nor is the City obligated to respond to a request that seeks records that do not exist or materials that are not public records. Additionally, extensive requests for public records may increase the fees to cover the administrative cost of searching and copying the requested records. Using names, record title, function of record, record date, and any other information that you feel will expedite your request, is recommended. Only one requested item should be submitted per request form. If needed, use additional pages for description. (The City may find it necessary to redact sensitive information from the completed records request that is returned to you.):

Please see attached detailed request

Records Duplication and Access Fee Schedule
(Please Read Before Submitting Your Request).

This fee schedule covers duplicating paper copies of records when the original record is paper, microfilm or electronic.

Duplicating Fees for Routine/Standard Records Requests

The following fees shall apply to all Standard Requests for business documents of not more than 8 ½ by 14 inches which are contained within filing systems that are used in the normal business process of City departments. These records would require nominal clerical time to locate, duplicate or provide access.

- (a) For paper copies – there will be a charge of 50 cents (\$0.50) per one-sided document (page) for duplicated copies of not more than 8 inches by 14 inches. For two-sided documents (pages) of up to 8 inches by 14 inches, the charge to duplicate both sides shall be 75 cents (\$0.75) per sheet of paper. All paper copies will be produced in black and white only. Color copies will not be produced.
- (b) For documents produced in electronic format there will be a charge of eight dollars (\$8.00) per media unit (CD, Flash Drive and E-mail, etc.) plus a charge of 10 cents (\$0.10) per document (page) provided in the media unit.
- (c) Certified copies of “public records” shall be available at the additional rate of \$5.00 per certified copy.
- (d) There is no charge for a Standard Request to inspect records that are routine in nature and require nominal clerical time to locate or provide minimal supervised inspection. Extended supervision cost and time scheduling will be based on an individual basis.
- (e) Pre-payment is not accepted. Do not pre-pay. We will advise you of the total fee amount for your request, once it is prepared. The records will not be released until full payment is received.
- (g) Certified funds, Cash, or Money Orders are accepted for payment. Sorry, no credit cards.

Duplicating and Access/Research Fees for Non-Routine Records Requests or Use of Information Technology Resources

If the nature or volume of public records requested to be inspected or copied requires extensive use of Information Technology resources or extensive clerical or supervisory assistance, then the City may require payment of a surcharge in addition to the routine duplication fee. This charge shall be reasonable and based on the cost incurred for such extensive use of Information Technology resources and labor cost, including inspection supervision, of the personnel providing the service that is actually incurred by the City. This also includes using computing resources for generating records when records have been archived off-line and are not readily accessible. The City reserves the right to refuse requests to produce or provide records or reports not already being produced in the normal course of business or to provide them in a different format.

PUBLIC RECORDS POLICY

Purpose: To develop a uniform policy regarding supplying residents of the State of Alabama with copies of public records.

“Public Records” shall include written, typed or printed books, papers, letters, ordinances, resolutions, reports, records, pleadings, exhibits, documents and maps made or received by municipal public officials, employees, committees or board members in the normal course of conducting business on behalf of the City of Birmingham.

“Confidential Documents” shall include any record protected from disclosure by applicable law, including but not limited to the following; records, papers, letters and other written documents concerning the good name and character of individuals; internal personnel matters; W-2 forms; matters of a personal nature where disclosure would constitute a clearly unwarranted invasion of privacy; trade secrets, commercial and financial information obtained in confidence and/or which is privileged or which, if revealed would interfere with the efficient operations of municipal government; investigatory records of law enforcement agencies which, if revealed, could be life threatening, harmful to the public, or prevent the accused from receiving a fair trial; and also, “work product” generated by the City Attorney, any Assistant City Attorney, or any other lawyers retained to work on behalf of the City of Birmingham.

1. Members of the public may set up an appointment to view municipal “public records” during normal City of Birmingham business hours, but under no circumstances shall “public records” be removed from the custody of the custodian of the records in question.
2. Requests for access to or copies of municipal “public records” must be in writing using the City of Birmingham’s Public Records Request Form and shall describe with some degree of certainty the documents requested.
3. Receipt of a hand-delivered public records request occurs when the request is received at the City Clerk’s Office. Receipt of a mailed public records request occurs on the date of actual receipt by the City Clerk. A certified mail receipt or similar signed postage receipt shall be prima facie evidence of receipt by the City Clerk.
4. No documents shall be released until the City of Birmingham has received payment for the “public record” and/or research services requested. Costs shall be assessed in accordance with the Records Duplication and Access Fee Schedule.
5. Copies of “public records” which are not Standard Requests that are easily retrievable because the documents are not regularly maintained in the normal course of business and therefore require research and extra time of City employees to compile shall be charged at the rates listed above along with an additional administrative research surcharge.
6. If a request for “public records” necessitates the use of municipal computer time, a reasonable charge shall be assessed by the City.

7. The City will make reasonable attempts to promptly respond to lawful copying and/or research requests of “public records” within the timeframes required by applicable law. Time extensions are authorized where necessary for non-Standard Requests.

8. The City shall not be required to respond to requests that seek information or other materials that are not public records.

9. The City is not required to create a new public record if the requested record does not already exist. Creation of documents or reports upon request is not the responsibility of City personnel nor is it required that they provide more than what is present in existing documents or information systems.

10. The City is not obligated to respond to a public records request that is vague, ambiguous, overly broad, or unreasonable in scope. Requests for “public records” which are not Standard Requests and/or are overly burdensome or time-consuming shall be subject to limitation by the City, time extensions, and/or denial of the documents.

11. The Public Records Law does not authorize a resident to shift to the custodian of public documents the tasks of inspecting them and identifying the ones to be copied or the expense of copying those and does not require the custodian to undertake the burden and expense of mailing or otherwise delivering the copies. The burden and expense of copying the writings and taking the copies must be borne by the resident or his or her agent as provided by law.

12. The City shall not be obligated to respond to a public records request that is not made pursuant to the City’s written procedures.

13. Identification will be required to demonstrate proof of permanent residency in the State of Alabama including, but not limited to, an Alabama driver license or voter registration card.

Important - Payment of fees may be required before your request is fulfilled. By submitting this request, you certify that you are an Alabama resident with standing to make a request for public records pursuant to Alabama law. Your signature is required for processing and as your acknowledgement of, and agreement to, all of the terms and conditions herein:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1915 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

ANNUAL WATER QUALITY REPORT 2025

TABLE OF CONTENTS

CCR: GOVERNMENT MANDATED

Birmingham Water Works (BWW), like all water utilities across the U.S., is required by the EPA to send its customers a Consumer Confidence Report (CCR) each year.

In 1996, Congress amended the Safe Drinking Water Act (SDWA) by adding a provision requiring all community water systems to deliver to their customers an annual water quality report, which contains information on the water system's source water, levels of any detected contaminants, compliance with drinking water rules and other educational information.

In 2024, as in years past, BWW met all state and federal regulations for water quality.

BWW has open meetings monthly at its main office located at 3600 First Avenue N., Birmingham, AL 35222. Meeting dates and times are posted on our website and at our main office. The Board welcomes public input and comments during its meetings. For questions, please call 205-244-4000 or visit www.bwwb.org.

Regulatory Compliance Specialist

What is the Consumer Confidence Report?

The CCR is an annual report – on the water quality of a particular water system such as BWB – required by the Environmental Protection Agency (EPA). The report details and outlines contaminants and their levels in drinking water.

Why am I getting this report?

BWB is federally mandated by the EPA to provide this information to you. The Alabama Department of Environmental

Management (ADEM) enforces these rules for the EPA. Regulated drinking water substances that were detected during the 2024 calendar year are provided in the report.

Where can I get additional copies of this report?

You may obtain additional copies of the CCR in person at BWB's Customer Service Center, by mail (upon request), or online by visiting www.bwb.org. For questions concerning the CCR, please call the Regulatory Compliance Officer at 205-244-4206.

Why authorities regulate contaminant levels?

In order to ensure that tap water is safe to drink, the EPA and ADEM prescribe regulations that limit the amount of certain substances in water provided by public water systems.

For whom is this report produced?

The CCR is produced for all consumers of BWB's water. It provides water quality data that confirms the regulatory compliance of our water.

BWB is committed to providing reliable, equitable, cost-effective delivery of high-quality water and services while protecting public health and environmental resources for current and future generations.

WATER QUALITY AWARDS

CARSON FILTRATION PLANT

ADEM Area Wide Optimization Program (AWOP) 3-Year Optimized Plant Award
Alabama Water and Pollution Control Association (AWPCA) Award of Excellence Surface Water 20.1 to 30 MGD

EPA and AWWA Partnership for Safe Drinking Water President's Award (7 Years)
EPA and AWWA Partnership for Safe Drinking Water Director's Award (17 Years)
Center for Disease Control (CDC) Water Quality Fluoridation Award
2024 AWWA AL/MS Best Tasting Water

PUTNAM FILTRATION PLANT

ADEM Area Wide Optimization Program (AWOP) 13-Year Optimized Plant Award
Alabama Water and Pollution Control Association (AWPCA) Award of Excellence Surface Water 20.1 to 30 MGD

EPA and AWWA Partnership for Safe Drinking Water President's Award (8 Years)
EPA and AWWA Partnership for Safe Drinking Water Director's Award (19 Years)
Center for Disease Control (CDC) Water Quality Fluoridation Award

WESTERN FILTRATION PLANT

ADEM Area Wide Optimization Program (AWOP) 3-Year Optimized Plant Award
Alabama Water and Pollution Control Association (AWPCA) Best Operated Plant Award for Surface Water 50.1-60 MGD

EPA and AWWA Partnership for Safe Drinking Water Award of Excellence (11 Years)
EPA and AWWA Partnership for Safe Drinking Water Director's Award (17 Years)
Center for Disease Control (CDC) Water Quality Fluoridation Award

FOR YOUR HEALTH

All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the **Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791**.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and radioactive material, and it can pick up substances resulting from the presence of animals or from human activity. Pesticides and herbicides, which may come from a variety of sources such as

agriculture, storm water runoff, and residential uses. Some people may be more vulnerable to contaminants in drinking water than the general population. People who are immuno-compromised, such as cancer patients undergoing chemotherapy, organ transplant recipients, HIV/AIDS positive or other immune system disorders, some elderly, and infants, can be particularly at risk from infections.

People at risk should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbiological contaminants are available from the **Safe Drinking Water Hotline (1-800-426-4791)** or on EPA's website epa.gov/safewater. **Please consult with your local health department for additional information.**

WATER SOURCES AND SYSTEM INFORMATION

BWW WATER SOURCES

- Black Warrior Basin
 - Sipsey Fork
 - Mulberry Fork
 - Inland Lake/Blackburn Fork
- Cahaba Basin
 - Cahaba River
 - Little Cahaba River
 - Lake Purdy

SYSTEM INFORMATION

- Average Gallons of water delivered in 2024: 122.4 MGD
- People Served: 770,000*
- Square miles in service area: 759*
- Miles of water main (pipes) in system: 4,117*

**Approximations*

SOURCE WATER ASSESSMENT

A source water assessment has been updated for the water system. It is available for review at BWW's main office during normal business hours.

THE WATER TREATMENT PROCESS:

- 1. Intake** – Water is taken from the source. Fish, plants, and other debris are screened out and water is pumped to the treatment plant.
- 2. Chemical Addition/Coagulation** – Chemicals are added to cause particles in the water to stick together.
- 3. Mixing** – Water and chemicals are rapidly mixed.
- 4. Flocculation** – The larger particles are called floc.
- 5. Sedimentation** – The water and floc particles flow into a sedimentation basin. The floc then settles to the bottom and is removed from the water.
- 6. Filtration** – Water flows through filters. The filters are made of layers of anthracite, sand, and gravel.
- 7. Disinfection** – A small amount of chlorine is added to eliminate any pathogens and keep the water safe as it travels to your location.
- 8. Storage** – Water is placed in a closed tank or clearwell.
- 9. Distribution** – Water is transported to your location. BWB treated an average of 122.4 million gallons of water per day in 2024.

DEFINITIONS AND ABBREVIATIONS

Action Level (AL) – The concentration of a contaminant that triggers treatment or other requirement a water system shall follow.

Contaminant – Any substance other than water. Note that contaminants, as defined, include dissolved minerals, purifying and dental health promotion additives.

Hazard Index (HI) - The Hazard Index is an approach that determines the health concerns associated with mixtures of certain PFAS in finished drinking water. Low levels of multiple PFAS that individually would not likely result in adverse health effects may pose health concerns when combined in a mixture. The Hazard Index MCL represents the maximum level for mixtures of PFHxS, PFNA, HFPO-DA, and/or PFBS allowed in water delivered by a public water system. A Hazard Index greater than 1 requires a system to take action.

Locational Running Annual Average (LRAA) – The average of sample analytical results for samples taken at a particular monitoring location during the previous four calendar quarters.

Maximum Contaminant Level (MCL) – The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) – The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL) – The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG) – The level of drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Running Annual Average (RAA) – Compliance period where an average of four consecutive quarterly samples are used.

Total Haloacetic Acids (HAA) – By-product of drinking water chlorination.

Total Trihalomethanes (TTHM) – By-product of drinking water chlorination.

Treatment Technique (TT) – A required process intended to reduce the level of a contaminant in drinking water.

Turbidity (NTU) – Measure of the clarity of water as it relates to its particle content. Turbidity is measured to determine the amount of particulate matter present in water.

Variance and Exemptions – ADEM or EPA permission not to meet an MCL or treatment technique under certain conditions.

ADEM – Alabama Department of Environmental Management

AWOP – Area Wide Optimization Program

CDC – Centers for Disease Control

EPA – U.S. Environmental Protection Agency

°F – Degrees Fahrenheit

MGD – Million Gallons per Day

mg/L – Milligrams per liter or parts per million (ppm)

µS/cm – Microsiemens per centimeter

N/A – Not Applicable

ND – Not Detected

NTU – Nephelometric Turbidity Unit

pCi/L – Picocuries per liter

SU – Standard Unit

TOC – Total Organic Carbon

TON – Threshold Odor Number

µg/L – Micrograms per liter or parts per billion (ppb)

MPN/100 mL – Most Probable Number per 100 milliliters

oocytes/L – oocytes per Liter

Long Term 2 Enhanced Surface Water Treatment Rule (LT2) Source Water Monitoring			The source water for all four treatment plants supplying BWWB potable water distribution system is being tested monthly for cryptosporidium for a 24-month period starting in 2024. This testing meets the requirements of the Long Term 2 Enhanced Surface Water Treatment Rule, or LT2. Monitoring our source water indicated the presence of Cryptosporidium in 1 of 32 samples tested at a level of 0.1 oocysts per liter. Cryptosporidium is a microbial pathogen found in surface water throughout the U.S. Although filtration removes cryptosporidium, the most commonly used filtration methods cannot guarantee 100 percent removal. Current test methods do not allow us to determine if the organisms are dead or if they are capable of causing disease. Ingestion of cryptosporidium may cause cryptosporidiosis, an abdominal infection. Symptoms of infection include nausea, diarrhea, and abdominal cramps. Most healthy individuals can overcome the disease within a few weeks. However, immuno-compromised people are at greater risk of developing life-threatening illness. We encourage immuno-compromised individuals to consult their doctor regarding appropriate precautions to take to avoid infection. Cryptosporidium must be ingested to cause disease, and it may be spread through means other than drinking water.			
Parameters	Range Detected					
Turbidity (NTU)	0.34 - 98.7					
E. coli (MPN/100mL)	ND - 1414					
Cryptosporidium (oocysts/L)	ND - 0.1					

TESTING AND SAFETY

To ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water.

Based on a study conducted by ADEM with the approval of the EPA, a statewide waiver for the monitoring of asbestos and dioxin was issued. Thus, monitoring for any of these contaminants was not required. Exposure to lead in drinking water can cause serious health effects in all ages groups. Infants and children can have decrease in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing leaning and behavior problems. The children of women who are exposed to of lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney, or nervous system problems.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Birmingham Water Works is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking.

If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

BWW will provide an explanation of corrosion control practices by November 1st, 2027. BWW is also developing a Lead Service Line Replacement plan that will be publicly available by November 1st, 2027. Mandatory School and Daycare sampling will begin in 2027, as requested by the facility.

The most recent testing for Lead and Copper Compliance within the distribution system was from June – September 2023. This testing was performed in accordance with applicable regulations. The 90th percentile lead sample was 0.003 mg/L. There was one sample that exceeded the action level. The range of the results for lead are ND – 0.033 mg/L. The 90th percentile copper sample was 0.100 mg/L. No copper samples exceeded the action level. The range of the results for copper are ND – 0.352 mg/L. For complete lead tap sampling results, call 205-244-4467. BWW received a monitoring violation in 2023. It was addressed in the 2024 CCR. BWW is in compliance with all Federal & State Regulations.

BWW prepared a service line inventory for customer review.

For more information and to see if you have a lead service line, visit BWW's Customer Guide to Lead Safety.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/02/2025 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

SOUTHERN BATTERIES I EPA ID:: ALR000008524	5349 FIRST AVENUE NO	WSW 1/8 - 1/4 (0.180 mi.)	58	102

Lists of state- and tribal hazardous waste facilities

SHWS: Alabama uses the federal CERCLIS list in place of a state hazardous waste site list. The Comprehensive Environmental Response, Compensation and Liability Information System database contains information on sites identified by the United States Environmental Protection Agency as abandoned, inactive or uncontrolled hazardous waste sites that may require cleanup. The data come from the United States Environmental Protection Agency.

A review of the SHWS list, as provided by EDR, has revealed that there are 2 SHWS sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

Lists of state and tribal leaking storage tanks

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Management's Leaking Underground Storage Tank Listing.

A review of the LUST list, as provided by EDR, and dated 04/30/2025 has revealed that there are 3 LUST sites within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

AST: The Aboveground Storage Tank database contains registered ASTs. The data come from the Department of Environmental Management's AST Data with Owner/Site/Tank Information database.

A review of the AST list, as provided by EDR, and dated 04/03/2025 has revealed that there are 3 AST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

Storage tank sites removed from the UST database are added to the HIST UST database.

A review of the HIST UST list, as provided by EDR, and dated 04/03/2025 has revealed that there is 1 HIST UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 07/23/2025 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 5 UST FINDER sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 21 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 15 EDR Hist

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Alabama Department of Environmental Management (ADEM) Permit Tracking system provides data entry, retrieval, and accounting functions and includes brief general data about facilities, their ADEM permits and fees owed and/or paid.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

FINDS:

Registry ID: 110003026323

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Alabama Department of Environmental Management (ADEM) Permit Tracking system provides data entry, retrieval, and accounting functions and includes brief general data about facilities, their ADEM permits and fees owed and/or paid.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

INST CONTROL: Land Division Brownfields 128(a) Program Site Listing

Institutional Controls (ICs) are non-engineered instruments, such as administrative and/or legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of a remedy by limiting land or resource use. There are five different types of controls. These are governmental, proprietary, enforcement tools with IC components, informational devices and unrestricted. Unrestricted- No institutional controls (unrestricted for industrial and residential use). Governmental- controls implemented and enforced by state and local governments. (zoning restrictions, ordinances, building permits, etc.). Proprietary- controls which have their basis in real property law (easements, covenants). Enforcement and Permit Tools with IC components- these controls are issued to compel land owners to limit certain site activities on both federal and private sites. Informational devices- informational tools with provide information or notification that residual or capped contamination may remain on site (deed or hazard notices).

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

PFAS: PFAS Contamination Site Listing

PFAS have been widely used in numerous industrial and residential applications since the 1950s. Their stability and unique chemical properties produce waterproof, stain resistant, and nonstick qualities in products. They are found in some firefighting foams and a wide range of consumer products such as carpet treatments, non-stick cookware, water-resistant fabrics, food packaging materials, and personal care products.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Version Date:	2020
Northeast Map:	16667654 IRONDALE, AL
Version Date:	2020

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
01073C0392G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
01073C0411G	FEMA FIRM Flood data
01073C0394G	FEMA FIRM Flood data
01073C0413G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
BIRMINGHAM NORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
2	1/2 - 1 Mile WNW	WNW
3	1/2 - 1 Mile SSE	SSE
1G	1/2 - 1 Mile WNW	WNW
2G	1/2 - 1 Mile SSE	SSE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Tupelo

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 6.5 Min: 5.1
2	7 inches	55 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 6.5 Min: 5.1

Soil Map ID: 2

Soil Component Name: Decatur

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 14 Min: 4	Max: 6 Min: 4.5
2	7 inches	72 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 14 Min: 4	Max: 6 Min: 4.5
3	72 inches	75 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 14 Min: 4	Max: 6 Min: 4.5

Soil Map ID: 3

Soil Component Name: Fullerton

Soil Surface Texture: gravelly silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	gravelly silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 14 Min: 4	Max: 5.5 Min: 4.5
2	5 inches	35 inches	gravelly silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 14 Min: 4	Max: 5.5 Min: 4.5
3	35 inches	64 inches	gravelly silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 14 Min: 4	Max: 5.5 Min: 4.5

Soil Map ID: 4

Soil Component Name: Urban land

Soil Surface Texture: gravelly silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Data

Telephone: 334-844-3927

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Uncertainty given in pCi/liter is based on counting statistics and uncertainty for cell calibration and volume of ±5%.																
The Lower Limit of Detection for Rn (95% confidence level as recommended by EPA 402-R-95-012, Oct. 97) is 0.20 pCi/liter.																
Results are reported based on standardization with NIST-traceable radon sources.																
Results corrected to in situ pressure and assumed T of 20°C based on $P/P_o = \exp(-3.56e-5 * (\text{elevation} - \text{lab elevation})) / (273 + \text{Lab T}) / (273 + \text{Site T})$																
These results are for application of naturally-occurring radon as a tracer of soil vapor intrusion, but are not intended for evaluation of radon hazards.																
If observed cpm is less than the average cell background for that cell, 0.001 observed dpm is assigned.																
Note Details: none																
Raw Data, Calculation factors, and Analytical Details																
Collection Analysis

H&P Project: TVS020226-10
Client Project: Bullock 5500 1st

Dear Jim Fineis:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 02-Feb-26 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody
- Sampling Logs (if applicable)

Unless otherwise noted, I certify that all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Kristin Beckley
Quality Assurance Officer

H&P Mobile Geochemistry, Inc. is accredited under the National Laboratory Accreditation Program (NELAP) and the Department of Defense Environmental Laboratory Accreditation Program (DoD-ELAP), operating in accordance with international standard ISO/IEC 17025:2005 for the fields of proficiency and analytes listed on the applicable certificates. The certificates for EPA Method TO-15 and H&P Method 8260SV (modified EPA 8260B) can be found at www.handpmg.com, including accreditation certificate numbers, expiration of certificates, and scope of accreditation including matrix of accreditation. Vehicle Identification Numbers are included on the certifications for mobile lab analysis, if applicable. Fields of services and analytes contained in this report that are not listed on the certificates should be considered uncertified or unavailable for certification.

Notes and Definitions

QL-1H	The LCS and/or LCSD recoveries fell above the established control specifications for this analyte. Any result for this compound is qualified and should be considered biased high.
QL-1H	The LCS and/or LCSD recoveries fell above the established control specifications for this analyte. Any result for this compound is qualified and should be considered biased high.
LCC	Leak Check Compound
ND	Analyte NOT DETECTED at or above the reporting limit
MDL	Method Detection Limit
%REC	Percent Recovery
RPD	Relative Percent Difference

Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory and Mobile Laboratory in accordance with the DoD-ELAP Program and ISO/IEC 17025:2005 programs through PJLA, accreditation number 69070 for EPA Method TO-15 and H&P 8260SV.

H&P is approved by the State of Louisiana Department of Environmental Quality under the National Environmental Laboratory Accreditation Conference (NELAC) certification number 04138

The complete list of stationary and mobile laboratory certifications along with the fields of testing (FOTs) and analyte lists are available at www.handpimg.com/accreditations.
