CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - SAD:
Sample(s) analyzed with zero headspace. 8260D
pH of sample(s) is less than two in preserved vials. 8260D

8270 Low Level Analytes by GC/MS-8270 PCP by GC/MS

Qualifiers:

SR05 Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.

Phenol-d5

2103182-13[Mobile/RW-1]

Semi-Volatile Compounds-EPA 8270D

Qualifiers:

CC-01 CCV exceeds acceptance limits. Sampe results reported from this calibration were below the reporting limits.

2,4-Dinitrophenol

2103182-02[Mobile/RC-1A], 2103182-06[Mobile/RW-11], 2103182-07[Mobile/T-2], 2103182-08[Mobile/RW-12], 2103182-11[Mobile/RW-13]

M1 MS/MSD Recovery limit exceeded.

Benzo (a) pyrene

1C11030-MS1

M2 MS/MSD Recovery below acceptable limit.

Fluoranthene

1C12027-MS1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

Acenaphthene, Benzo (a) pyrene, Fluorene

1C12027-MS1, 1C11030-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

Fluoranthene, Pyrene

1C12027-DUP1

SR01 The surrogate recovery for this sample is not available either due to matrix interference or due to sample dilution required for high analyte concentration/matrix interferences.

2-Fluorobiphenyl, Nitrobenzene-d5, Terphenyl-dl4

1C11030-DUP1, 1C11030-MS1

SR06 Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.

Terphenyl-dl4

2103182-12[Mobile/RW-2]

Anions-SM 4110B 2011

Qualifiers:

E The concentration indicated for this analyte is an estimated value above the calibration range of the instrument.

Chloride

1C11042-DUP1, 1C11042-MS1, 1C11042-MSD1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

Chloride

1C11042-MS1, 1C11042-MSD1

RPD04 The RPD between the sample and sample duplicate exceeded the acceptance limits.

Chloride

1C11042-DUP1

pH-SM 4500-H+B-2011

Qualifiers:

HT-02 At the time of receipt, this sample had already exceeded the recommended holding time.

pH

Report Definitions

TNC	Too Numerous To Count
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the minimum reporting limit
NR	Not Reported
RPD	Relative Percent Difference
ICV	Initial Calibration Verfiication
CCV	Continuing Calibration Verification Standard
SSV	Secondary Source Verfication Standard
LCS	Lab Control Spike - Lab matrix prepared with known concentration of analyte/s of interest analyzed by method.
MS	Matrix Spike - Sample prepared with known concentration of analyte/s of interest analyzed by method.
MSD	Matrix Spike Duplicate - Duplicate sample prepared with known concentration of analyte/s of interest analyzed by method.
MRL	Minimum Reporting Limit
%REC	Percentage Recovery of known concentration added to matrix
Batch	Group of samples prepared for analysis not to exceed 20 samples.
Matrix	Material containing analyte/s of interest
Surrogate	Analyte added to sample to determine extraction efficiency of method.

RE: Mobile Quarterly Wells New Permit

Enclosed are Micro-Methods Laboratory, Inc. results of analyses performed on samples received 03/11/2021 09:36. If you have any questions concerning this report, please feel free to contact the office.

Sincerely,

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Sample 2103217-08 (RW-6) has no water (cresol). Sample cancelled and client will resample per E. Allen. 3/11/21 TKM

Volatile Technician Comments - SAD:
Sample(s) analyzed with zero headspace. 8260D
pH of sample(s) is less than two in preserved vials. 8260D

Semi-Volatile Compounds-EPA 8270D

Qualifiers:

CC-01 CCV exceeds acceptance limits. Sampe results reported from this calibration were below the reporting limits.

2,4-Dinitrophenol

2103217-02[Mobile/B-25], 2103217-03[Mobile/B-36], 2103217-06[Mobile/RW-3B], 2103217-07[Mobile/RW-3A], 2103217-11[Mobile/RC-2A]

M1 MS/MSD Recovery limit exceeded.

Benzo (a) pyrene

1C11030-MS1

M2 MS/MSD Recovery below acceptable limit.

Fluoranthene

1C12027-MS1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

Acenaphthene, Benzo (a) pyrene, Fluorene

1C12027-MS1, 1C11030-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

Fluoranthene, Pyrene

1C12027-DUP1

SR01 The surrogate recovery for this sample is not available either due to matrix interference or due to sample dilution required for high analyte concentration/matrix interferences.

2-Fluorobiphenyl, 2-Fluorophenol, Nitrobenzene-d5, Phenol-d5, Terphenyl-dl4

1C11030-DUP1, 1C11030-MS1, 2103217-04[Mobile/T-1]

SR06 Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.

Nitrobenzene-d5, Terphenyl-dl4

2103217-07[Mobile/RW-3A], 2103217-09[Mobile/GC-Sump]

Anions-SM 4110B 2011

Qualifiers:

E The concentration indicated for this analyte is an estimated value above the calibration range of the instrument.

Chloride

1C11042-DUP1, 1C11042-MS1, 1C11042-MSD1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

Chloride

1C11042-MS1, 1C11042-MSD1

RPD04 The RPD between the sample and sample duplicate exceeded the acceptance limits.

Chloride

1C11042-DUP1

pH-SM 4500-H+B-2011

Qualifiers:

HT-02 At the time of receipt, this sample had already exceeded the recommended holding time.

pH

1C12030-DUP1, 1C12030-DUP2, 2103217-01[Mobile/B-24], 2103217-02[Mobile/B-25], 2103217-03[Mobile/B-36], 2103217-04[Mobile/T-1], 2103217-05[Mobile/RW-7], 2103217-06[Mobile/RW-3B], 2103217-07[Mobile/RW-3A], 2103217-09[Mobile/GC-Sump], 2103217-10[Mobile/RC-3], 2103217-11[Mobile/RC-2A]

Report Definitions

TNC	Too Numerous To Count
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the minimum reporting limit
NR	Not Reported
RPD	Relative Percent Difference
ICV	Initial Calibration Verfiication
CCV	Continuing Calibration Verification Standard
SSV	Secondary Source Verfication Standard
LCS	Lab Control Spike - Lab matrix prepared with known concentration of analyte/s of interest analyzed by method.
MS	Matrix Spike - Sample prepared with known concentration of analyte/s of interest analyzed by method.
MSD	Matrix Spike Duplicate - Duplicate sample prepared with known concentration of analyte/s of interest analyzed by method.
MRL	Minimum Reporting Limit
%REC	Percentage Recovery of known concentration added to matrix
Batch	Group of samples prepared for analysis not to exceed 20 samples.
Matrix	Material containing analyte/s of interest
Surrogate	Analyte added to sample to determine extraction efficiency of method.

RE: Mobile Quarterly Wells New Permit

Enclosed are Micro-Methods Laboratory, Inc. results of analyses performed on samples received 03/12/2021 08:16. If you have any questions concerning this report, please feel free to contact the office.

Sincerely,

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - SAD:
Sample(s) analyzed with zero headspace. 8260D
pH of sample(s) is less than two in preserved vials. 8260D

8270 Low Level Analytes by GC/MS-8270 PCP by GC/MS

Qualifiers:

SR05 Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.

Phenol-d5
2103253-01[Mobile/E-1], 2103253-02[Mobile/E-2]

Semi-Volatile Compounds-EPA 8270D

Qualifiers:

L3 LCS/LCSD Precision Limit exceeded.

2,4-Dinitrophenol, Benzo (a) pyrene, Pentachlorophenol
1C17040-BSD1, 1C17023-BSD1

SR06 Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.

2-Fluorobiphenyl
1C17023-BS1

pH-SM 4500-H+B-2011

Qualifiers:

HT-02 At the time of receipt, this sample had already exceeded the recommended holding time.

pH
1C12030-DUP1, 1C12030-DUP2, 2103253-01[Mobile/E-1], 2103253-02[Mobile/E-2], 2103253-03[Mobile/B-101], 2103253-04[Mobile/RC-3A], 2103253-05[Mobile/B-108A]

Report Definitions

TNC	Too Numerous To Count
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the minimum reporting limit
NR	Not Reported
RPD	Relative Percent Difference
ICV	Initial Calibration Verfiication
CCV	Continuing Calibration Verification Standard
SSV	Secondary Source Verfication Standard
LCS	Lab Control Spike - Lab matrix prepared with known concentration of analyte/s of interest analyzed by method.
MS	Matrix Spike - Sample prepared with known concentration of analyte/s of interest analyzed by method.
MSD	Matrix Spike Duplicate - Duplicate sample prepared with known concentration of analyte/s of interest analyzed by method.
MRL	Minimum Reporting Limit
%REC	Percentage Recovery of known concentration added to matrix
Batch	Group of samples prepared for analysis not to exceed 20 samples.
Matrix	Material containing analyte/s of interest
Surrogate	Analyte added to sample to determine extraction efficiency of method.

RE: Mobile Quarterly Wells New Permit

Enclosed are Micro-Methods Laboratory, Inc. results of analyses performed on samples received 03/16/2021 08:23. If you have any questions concerning this report, please feel free to contact the office.

Sincerely,

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - SAD:
Sample(s) analyzed with zero headspace. 8260D
pH of sample(s) is less than two in preserved vials. 8260D

8270 Low Level Analytes by GC/MS-8270 PCP by GC/MS

Qualifiers:

SR05 Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.

Phenol-d5
2103285-03[Mobile/B-65]

SIM PAH Analysis by GC/MS-EPA 8270D

Qualifiers:

L3 LCS/LCSD Precision Limit exceeded.

Benzo (a) pyrene
1C17023-BSD1

SR06 Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.

2-Fluorobiphenyl
1C17023-BS1

pH-SM 4500-H+B-2011

Qualifiers:

HT-02 At the time of receipt, this sample had already exceeded the recommended holding time.

pH
1C18024-DUP1, 2103285-01[Mobile/B-128], 2103285-02[Mobile/B-60A], 2103285-03[Mobile/B-65]

Report Definitions

TNC	Too Numerous To Count
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the minimum reporting limit
NR	Not Reported
RPD	Relative Percent Difference
ICV	Initial Calibration Verfiication
CCV	Continuing Calibration Verification Standard
SSV	Secondary Source Verfication Standard
LCS	Lab Control Spike - Lab matrix prepared with known concentration of analyte/s of interest analyzed by method.
MS	Matrix Spike - Sample prepared with known concentration of analyte/s of interest analyzed by method.
MSD	Matrix Spike Duplicate - Duplicate sample prepared with known concentration of analyte/s of interest analyzed by method.
MRL	Minimum Reporting Limit
%REC	Percentage Recovery of known concentration added to matrix
Batch	Group of samples prepared for analysis not to exceed 20 samples.
Matrix	Material containing analyte/s of interest
Surrogate	Analyte added to sample to determine extraction efficiency of method.

RE: Mobile Quarterly Wells New Permit

Enclosed are Micro-Methods Laboratory, Inc. results of analyses performed on samples received 03/18/2021 09:33. If you have any questions concerning this report, please feel free to contact the office.

Sincerely,

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

WO# 2103339-01 anions results reported to lowest reporting limits due to creosote in samples.DLW

Volatile Technician Comments - SAD:
Sample(s) analyzed with zero headspace. 8260D
pH of sample(s) is less than two in preserved vials. 8260D

pH-SM 4500-H+B-2011

Qualifiers:

HT-02 At the time of receipt, this sample had already exceeded the recommended holding time.

Report Definitions

TNC	Too Numerous To Count
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the minimum reporting limit
NR	Not Reported
RPD	Relative Percent Difference
ICV	Initial Calibration Verfiication
CCV	Continuing Calibration Verification Standard
SSV	Secondary Source Verfication Standard
LCS	Lab Control Spike - Lab matrix prepared with known concentration of analyte/s of interest analyzed by method.
MS	Matrix Spike - Sample prepared with known concentration of analyte/s of interest analyzed by method.
MSD	Matrix Spike Duplicate - Duplicate sample prepared with known concentration of analyte/s of interest analyzed by method.
MRL	Minimum Reporting Limit
%REC	Percentage Recovery of known concentration added to matrix
Batch	Group of samples prepared for analysis not to exceed 20 samples.
Matrix	Material containing analyte/s of interest
Surrogate	Analyte added to sample to determine extraction efficiency of method.

RE: Mobile Quarterly Wells New Permit

Enclosed are Micro-Methods Laboratory, Inc. results of analyses performed on samples received 03/21/2023 08:07. If you have any questions concerning this report, please feel free to contact the office.

Sincerely

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

Volatile Organic Compounds-EPA 8260D

Qualifiers:

L3 LCS/LCSD Precision Limit exceeded.

Benzene, Ethylbenzene

3C28023-BSD1

Semi-Volatile Compounds-EPA 8270D

Qualifiers:

CC-01 CCV exceeds acceptance limits. Sample results reported from this calibration were below the reporting limits.

2-Methylphenol, 4-Chloro-3-methylphenol, Bis(2-ethylhexyl)phthalate, Carbazole, Di-n-octyl phthalate, Pentachlorophenol

2303327-03[Mobile/RC-1], 3C24011-BLK1, 2303327-01[Mobile/RW-1], 2303327-05[Mobile/E-2], 2303327-06[Mobile/B-25], 2303327-07[Mobile/B-24], 3C24011-DUP1, 3C27020-DUP1, 2303327-04[Mobile/RC-1A]

CC-03 CCV exceeds acceptance limits. QC Results reported from this calibration within acceptance limits.

2,4,6-Tribromophenol, Bis(2-ethylhexyl)phthalate, Carbazole, Di-n-octyl phthalate, Indeno (1,2,3-cd) pyrene, Phenol-d5

2303327-03[Mobile/RC-1], 2303327-04[Mobile/RC-1A], 3C24011-BS1, 3C27020-BLK1, 3C27020-BS1, 3C27020-BSD1, 3C27020-DUP1, 3C27020-MS1, 3C24011-BSD1, 3C24011-MS1, 3C24010-BS1, 3C24010-BSD1, 3C24011-BLK1

DL-6 Dilution required. Lowest achievable MRL due to matrix interterence.

2,4-Dimethylphenol, 4-Chloro-3-methylphenol

2303327-04[Mobile/RC-1A]

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

2-Methylnaphthalene, 2-Methylphenol, Acenaphthylene, Dibenz (a,h) anthracene, Indeno (1,2,3-cd) pyrene

2303327-04[Mobile/RC-1A], 2303327-03[Mobile/RC-1]

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Anthracene, Benzo (a) anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Chrysene, Dibenz (a,h) anthracene, Fluoranthene, Fluorene, Indeno (1,2,3-cd) pyrene, Naphthalene, Phenanthrene, Pyrene

3C24010-MS1, 3C27020-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

Benzo (a) anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Chrysene, Fluoranthene, Phenanthrene

3C24010-DUP1, 3C24011-DUP1

SR01 The surrogate recovery for this sample is not available either due to matrix interference or due to sample dilution required for high analyte concentration/matrix interferences.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

SIM PAH Analysis by GC/MS-EPA 8270D

Qualifiers:

B-10 The analyte value in the BLK or CCB is >=1/2xMRL but <MRL.

2-Methylnaphthalene
3C24010-BLK1

CC-01 CCV exceeds acceptance limits. Sample results reported from this calibration were below the reporting limits.

2-Methylphenol, 4-Chloro-3-methylphenol, Bis(2-ethylhexyl)phthalate, Carbazole, Di-n-octyl phthalate
3C24011-BLK1, 2303355-01[Mobile/B-101], 2303355-02[Mobile/B-128], 2303355-03[Mobile/B-108A], 2303355-04[Mobile/UG-2], 3C24011-DUP1

CC-03 CCV exceeds acceptance limits. QC Results reported from this calibration within acceptance limits.

2,4,6-Tribromophenol, Bis(2-ethylhexyl)phthalate, Carbazole, Di-n-octyl phthalate, Indeno (1,2,3-cd) pyrene, Phenol-d5
3C24011-BS1, 3C24011-BSD1, 3C24011-MS1, 3C24010-BS1, 3C24010-BSD1, 3C24011-BLK1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Anthracene, Benzo (a) anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Chrysene, Dibenz (a,h) anthracene, Fluoranthene, Fluorene, Indeno (1,2,3-cd) pyrene, Naphthalene, Phenanthrene, Pyrene
3C24010-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

RE: Mobile Quarterly Wells New Permit

Enclosed are Micro-Methods Laboratory, Inc. results of analyses performed on samples received 03/23/2023 08:02. If you have any questions concerning this report, please feel free to contact the office.

Sincerely

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

Project: Mobile Quarterly Wells New Permit
Project Number: 1st Quarter
Project Manager: Ethan Allen

Reported:
04/11/2023 09:27

Cooler ID: #685

Receipt Temperature: 0.4 °C

Cooler Custody Seals Present	No	*Received on Ice but Not Frozen*	Yes
Containers Intact	Yes	*No Ice, Short Trip*	No
COC/Labels Agree	Yes	*Obvious Contamination*	No
Labels Complete	Yes	*Rush to meet HT*	No
COC Complete	Yes	*Received within HT*	Yes
Volatile Vial Headspace >6mm	No	*Proper Containers for Analysis*	Yes
Field Sheet/Instructions Included	No	*Correct Preservation*	Yes
Samples Rejected/Documented in Log	No	*Adequate Sample for Analysis*	Yes
Temp Taken From Temp Blank	Yes	*Sample Custody Seals Present*	No
Temp Taken From Sample Container	No	*Samples Missing from COC/Cooler*	No
Temp Taken From Cooler	No		
COC meets acceptance criteria	Yes

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

Volatile Organic Compounds-EPA 8260D

Qualifiers:

L3 LCS/LCSD Precision Limit exceeded.

Benzene, Ethylbenzene
3C28023-BSD1

Semivolatile Organic Compounds by GC/MS-EPA 8270D

Qualifiers:

CC-01 CCV exceeds acceptance limits. Sample results reported from this calibration were below the reporting limits.

2-Methylphenol, 4-Chloro-3-methylphenol, Bis(2-ethylhexyl)phthalate, Carbazole, Di-n-octyl phthalate
2303392-01[Mobile/B-97], 3C24011-BLK1, 2303392-04[Mobile/B-36], 3C24011-DUP1, 2303392-02[Mobile/RW-3A]

CC-03 CCV exceeds acceptance limits. QC Results reported from this calibration within acceptance limits.

2,4,6-Tribromophenol, Bis(2-ethylhexyl)phthalate, Carbazole, Di-n-octyl phthalate, Indeno (1,2,3-cd) pyrene, Phenol-d5
3C24011-BS1, 3C24011-BSD1, 3C24011-MS1, 3C24010-BS1, 3C24010-BSD1, 2303392-01[Mobile/B-97], 3C24011-BLK1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Anthracene, Benzo (a) anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Chrysene, Dibenz (a,h) anthracene, Fluoranthene, Fluorene, Indeno (1,2,3-cd) pyrene, Naphthalene, Phenanthrene, Pyrene
3C24010-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

Benzo (a) anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Chrysene, Fluoranthene, Phenanthrene
3C24010-DUP1, 3C24011-DUP1

SR01 The surrogate recovery for this sample is not available either due to matrix interference or due to sample dilution required for high analyte concentration/matrix interferences.

2-Fluorobiphenyl, Terphenyl-dl4
2303392-02[Mobile/RW-3A]

SR03 The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.

Terphenyl-dl4
2303392-02[Mobile/RW-3A]

Report Definitions

TNC	Too Numerous To Count
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the **minimum reporting limit (MRL)**
NR	Not Reported
RPD	Relative Percent Difference
ICV	Initial Calibration Verfiication
CCV	Continuing Calibration Verification Standard
SSV	Secondary Source Verfication Standard
LCS	Lab Control Spike - Lab matrix prepared with known concentration of analyte/s of interest analyzed by method.
MS	Matrix Spike - Sample prepared with known concentration of analyte/s of interest analyzed by method.
MSD	Matrix Spike Duplicate - Duplicate sample prepared with known concentration of anlayte/s of interest analyzed by method.
MRL	Minimum Reporting Limit
%REC	Percentage Recovery of known concentration added to matrix
Batch	Group of samples prepared for analysis not to exceed 20 samples.
Matrix	Material containing analyte/s of interest
Surrogate	Analyte added to sample to determine extraction efficiency of method.

RE: Mobile Quarterly Wells New Permit

Enclosed are Micro-Methods Laboratory, Inc. results of analyses performed on samples received 03/24/2023 09:40. If you have any questions concerning this report, please feel free to contact the office.

Sincerely

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

Semivolatile Organic Compounds by GC/MS-EPA 8270D

Qualifiers:

CC-01 CCV exceeds acceptance limits. Sample results reported from this calibration were below the reporting limits.

2-Methylphenol, 4-Chloro-3-methylphenol, Bis(2-ethylhexyl)phthalate, Carbazole, Di-n-octyl phthalate, Pentachlorophenol

3C24011-BLK1, 2303414-05[Mobile/B-65], 3C24011-DUP1, 3C27020-DUP1, 2303414-02[Mobile/RC-2A]

CC-03 CCV exceeds acceptance limits. QC Results reported from this calibration within acceptance limits.

2,4,6-Tribromophenol, Bis(2-ethylhexyl)phthalate, Carbazole, Di-n-octyl phthalate, Indeno (1,2,3-cd) pyrene, Phenol-d5

2303414-04[Mobile/RC-3A], 3C24011-BS1, 3C27020-BLK1, 3C27020-BS1, 3C27020-BSD1, 3C27020-DUP1, 3C27020-MS1, 3C24011-BSD1, 3C24011-MS1, 3C24010-BS1, 3C24010-BSD1, 3C24011-BLK1

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

2,4-Dimethylphenol, 2-Methylnaphthalene, 2-Methylphenol, 3 & 4-Methylphenol, 4-Chloro-3-methylphenol, Anthracene, Carbazole, Dibenzofuran, Fluoranthene, Naphthalene, Phenanthrene, Pyrene

2303414-02[Mobile/RC-2A], 2303414-04[Mobile/RC-3A], 2303414-03[Mobile/RC-2]

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Anthracene, Benzo (a) anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Chrysene, Dibenz (a,h) anthracene, Fluoranthene, Fluorene, Indeno (1,2,3-cd) pyrene, Naphthalene, Phenanthrene, Pyrene

3C24010-MS1, 3C27020-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

Benzo (a) anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Chrysene, Fluoranthene, Phenanthrene

3C24010-DUP1, 3C24011-DUP1

SR05 Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.

2-Fluorophenol

Report Definitions

TNC	Too Numerous To Count
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the **minimum reporting limit (MRL)**
NR	Not Reported
RPD	Relative Percent Difference
ICV	Initial Calibration Verfiication
CCV	Continuing Calibration Verification Standard
SSV	Secondary Source Verfication Standard
LCS	Lab Control Spike - Lab matrix prepared with known concentration of analyte/s of interest analyzed by method.
MS	Matrix Spike - Sample prepared with known concentration of analyte/s of interest analyzed by method.
MSD	Matrix Spike Duplicate - Duplicate sample prepared with known concentration of anlayte/s of interest analyzed by method.
MRL	Minimum Reporting Limit
%REC	Percentage Recovery of known concentration added to matrix
Batch	Group of samples prepared for analysis not to exceed 20 samples.
Matrix	Material containing analyte/s of interest
Surrogate	Analyte added to sample to determine extraction efficiency of method.

RE: Mobile Quarterly Wells New Permit

Enclosed are Micro-Methods Laboratory, Inc. results of analyses performed on samples received 03/27/2023 15:06. If you have any questions concerning this report, please feel free to contact the office.

Sincerely

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

SIM PAH Analysis by GC/MS-EPA 8270D

Qualifiers:

B-10 The analyte value in the BLK or CCB is >=1/2xMRL but <MRL.

Naphthalene

3C30004-BLK1

CC-01 CCV exceeds acceptance limits. Sample results reported from this calibration were below the reporting limits.

2,4,6-Trichlorophenol, 2,4-Dinitrophenol, 2-Methylphenol, Bis(2-ethylhexyl)phthalate, Di-n-octyl phthalate

2303451-06[Mobile/RW-12], 2303451-09[Mobile/RW-7], 3D03032-BLK1, 2303451-05[Mobile/RW-11], 2303451-01[Mobile/T-1], 2303451-08[Mobile/RW-6], 3C31004-BLK1, 3C31004-DUP1, 3D03032-DUP1

CC-03 CCV exceeds acceptance limits. QC Results reported from this calibration within acceptance limits.

2,4,6-Tribromophenol, 2,4,6-Trichlorophenol, Bis(2-ethylhexyl)phthalate, Di-n-octyl phthalate

3C31004-BLK1, 3C31004-BS1, 3C31004-BSD1, 3C31004-DUP1, 3D03032-BS1, 3D03032-BSD1

DL-6 Dilution required. Lowest achievable MRL due to matrix interterence.

2,4,6-Trichlorophenol, 2,4-Dinitrophenol, Acenaphthylene

2303451-08[Mobile/RW-6]

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

2,4-Dimethylphenol, 3 & 4-Methylphenol, 4-Chloro-3-methylphenol, Anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Bis(2-ethylhexyl)phthalate, Carbazole, Dibenzofuran, Fluoranthene, Fluorene, Indeno (1,2,3-cd) pyrene, Phenanthrene

2303451-08[Mobile/RW-6], 2303451-06[Mobile/RW-12], 2303451-07[Mobile/RW-13], 2303451-05[Mobile/RW-11], 2303451-09[Mobile/RW-7]

L3 LCS/LCSD Precision Limit exceeded.

Fluoranthene, Naphthalene

3C30004-BSD1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

1-Methylnaphthalene, Acenaphthene, Fluoranthene, Fluorene, Naphthalene, Phenanthrene, Pyrene

3C31004-MS1, 3C30004-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

1-Methylnaphthalene, 2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Anthracene, Benzo (a) anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Chrysene, Dibenzofuran, Fluoranthene, Fluorene, Indeno (1,2,3-cd) pyrene, Naphthalene, Pentachlorophenol, Phenanthrene, Pyrene

3C31004-DUP1, 3C30004-DUP1, 3D03032-DUP1

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

Semi-Volatile Compounds-EPA 8270D

Qualifiers:

CC-03 CCV exceeds acceptance limits. QC Results reported from this calibration within acceptance limits.

2,4,6-Tribromophenol
2304120-01[Mobile/T-2], 2304120-02[Mobile/GC-Sump], 3D13006-DUP1

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

Acenaphthylene, Benzo (a) anthracene, Bis(2-ethylhexyl)phthalate, Dibenz (a,h) anthracene, Naphthalene, Phenanthrene
2304120-02[Mobile/GC-Sump], 3D13006-DUP1

L3 LCS/LCSD Precision Limit exceeded.

2,4-Dinitrophenol
3D13006-BSD1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

Phenanthrene
3D13006-DUP1

pH-SM 4500-H+B-2011

Qualifiers:

HT-02 At the time of receipt, this sample had already exceeded the recommended holding time.

Analyte & Samples(s) Qualified:

2304120-01[Mobile/T-2], 2304120-02[Mobile/GC-Sump], 3D10048-DUP1

Report Definitions

TNC	Too Numerous To Count
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the **minimum reporting limit (MRL)**
NR	Not Reported
RPD	Relative Percent Difference
ICV	Initial Calibration Verfiication
CCV	Continuing Calibration Verification Standard
SSV	Secondary Source Verfication Standard
LCS	Lab Control Spike - Lab matrix prepared with known concentration of analyte/s of interest analyzed by method.
MS	Matrix Spike - Sample prepared with known concentration of analyte/s of interest analyzed by method.
MSD	Matrix Spike Duplicate - Duplicate sample prepared with known concentration of anlayte/s of interest analyzed by method.
MRL	Minimum Reporting Limit
%REC	Percentage Recovery of known concentration added to matrix
Batch	Group of samples prepared for analysis not to exceed 20 samples.
Matrix	Material containing analyte/s of interest
Surrogate	Analyte added to sample to determine extraction efficiency of method.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

Semi-Volatile Compounds-EPA 8270D

Qualifiers:

CC-01 CCV outside acceptance limits. Sample results reported from this calibration were below the reporting limits.

Acenaphthylene, Benzo (b) fluoranthene

2309458-01[Mobile/RC-1], 2309458-02[Mobile/RC-1A], 3I28006-BLK1, 3I28006-DUP1

CC-03 CCV outside acceptance limits. QC Results reported from this calibration within acceptance limits.

Acenaphthylene, Benzo (b) fluoranthene

3I28006-BS1, 3I28006-BSD1, 3I28006-MS1

DL-6 Dilution required. Lowest achievable MRL due to matrix interterence.

2,4-Dimethylphenol, 2-Methylnaphthalene, 4-Chloro-3-methylphenol

2309458-02[Mobile/RC-1A], 2309458-01[Mobile/RC-1]

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

2-Methylnaphthalene, Anthracene, Dibenz (a,h) anthracene, Fluoranthene

2309458-02[Mobile/RC-1A], 2309458-01[Mobile/RC-1]

M1 MS/MSD Recovery limit exceeded.

Carbazole

3I28006-MS1

Ammonia as N-Lachat 10-107-06-1-I

Qualifiers:

RPD04 The RPD between the sample and sample duplicate exceeded the acceptance limits.

Ammonia as N

DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the **minimum reporting limit (MRL)**
NR	Not Reported
RPD	Relative Percent Difference
ICV	Initial Calibration Verfiication
CCV	Continuing Calibration Verification Standard
SSV	Secondary Source Verfication Standard
LCS	Lab Control Spike - Lab matrix prepared with known concentration of analyte/s of interest analyzed by method.
MS	Matrix Spike - Sample prepared with known concentration of analyte/s of interest analyzed by method.
MSD	Matrix Spike Duplicate - Duplicate sample prepared with known concentration of anlayte/s of interest analyzed by method.
MRL	Minimum Reporting Limit
%REC	Percentage Recovery of known concentration added to matrix
Batch	Group of samples prepared for analysis not to exceed 20 samples.
Matrix	Material containing analyte/s of interest
Surrogate	Analyte added to sample to determine extraction efficiency of method.

RE: Mobile Quarterly Wells New Permit

Enclosed are Micro-Methods Laboratory, Inc. results of analyses performed on samples received 09/29/2023 08:00. If you have any questions concerning this report, please feel free to contact the office.

Sincerely

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

RE: Mobile Quarterly Wells New Permit

Enclosed are Micro-Methods Laboratory, Inc. results of analyses performed on samples received 10/03/2023 08:32. If you have any questions concerning this report, please feel free to contact the office.

Sincerely

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

Total Metals-EPA 200.8 Rev 5.4

Qualifiers:

C Confirmed by reanalysis or alternate method.

Chromium [He], Lead [He], Nickel [He]
2310035-01[Mobile/RW-3A]

SIM PAH Analysis by GC/MS-EPA 8270D

Qualifiers:

B-01 Target found in blank; laboratory contamination.

2-Methylnaphthalene, Phenanthrene
3J09038-BLK1

B-10 The analyte value in the BLK or CCB is >=1/2xMRL but <MRL.

Acenaphthene, Fluoranthene, Fluorene
3J09038-BLK1

CC-01 CCV outside acceptance limits. Sample results reported from this calibration were below the reporting limits.

2,4,6-Tribromophenol, 2-Fluorophenol
2310035-01[Mobile/RW-3A], 3J09039-DUP1

CC-03 CCV outside acceptance limits. QC Results reported from this calibration within acceptance limits.

2,4,6-Tribromophenol, 2-Fluorophenol
2310035-02[Mobile/RW-2], 2310035-03[Mobile/RW-1], 3J09039-BLK1, 3J09039-BS1, 3J09039-BSD1

DL-6 Dilution required. Lowest achievable MRL due to matrix interterence.

2,4,6-Trichlorophenol, 2,4-Dimethylphenol, 2,4-Dinitrophenol, 2-Methylphenol, 3 & 4-Methylphenol, 4-Chloro-3-methylphenol, Bis(2-ethylhexyl)phthalate, Dibenz (a,h) anthracene, Di-n-octyl phthalate, Pentachlorophenol
2310035-01[Mobile/RW-3A], 3J09039-DUP1

L1 LCS and/or LCSD Recovery Limit exceeded.

Phenanthrene
3J09038-BS1, 3J09038-BSD1

L2 LCS and/or LCSD Recovery below acceptance limit.

1-Methylnaphthalene, 2,4-Dimethylphenol, 2-Methylnaphthalene, 2-Methylphenol, 4-Chloro-3-methylphenol, Acenaphthene, Acenaphthylene, Dibenzofuran, Fluorene, Naphthalene

Report Definitions

TNC	Too Numerous To Count
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the **minimum reporting limit (MRL)**
NR	Not Reported
RPD	Relative Percent Difference
ICV	Initial Calibration Verfiication
CCV	Continuing Calibration Verification Standard
SSV	Secondary Source Verfication Standard
LCS	Lab Control Spike - Lab matrix prepared with known concentration of analyte/s of interest analyzed by method.
MS	Matrix Spike - Sample prepared with known concentration of analyte/s of interest analyzed by method.
MSD	Matrix Spike Duplicate - Duplicate sample prepared with known concentration of anlayte/s of interest analyzed by method.
MRL	Minimum Reporting Limit
%REC	Percentage Recovery of known concentration added to matrix
Batch	Group of samples prepared for analysis not to exceed 20 samples.
Matrix	Material containing analyte/s of interest
Surrogate	Analyte added to sample to determine extraction efficiency of method.

RE: Mobile Quarterly Wells New Permit

Enclosed are Micro-Methods Laboratory, Inc. results of analyses performed on samples received 10/04/2023 08:23. If you have any questions concerning this report, please feel free to contact the office.

Sincerely

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

Semi-Volatile Compounds-EPA 8270D

Qualifiers:

CC-01 CCV outside acceptance limits. Sample results reported from this calibration were below the reporting limits.

Benzo (b) fluoranthene, Carbazole, Indeno (1,2,3-cd) pyrene

3J05002-BLK1, 3J05002-DUP1

CC-03 CCV outside acceptance limits. QC Results reported from this calibration within acceptance limits.

2,4,6-Tribromophenol, Benzo (b) fluoranthene, Indeno (1,2,3-cd) pyrene

3J05002-BLK1, 3J05002-BS1, 3J05002-BSD1, 3J05002-DUP1

CC-04 CCV outside acceptance limits. Results reported are estimated values.

Carbazole

3J05002-BS1, 3J05002-BSD1

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

2,4-Dimethylphenol, 2-Methylnaphthalene, Acenaphthylene, Carbazole, Dibenz (a,h) anthracene, Pentachlorophenol

2310060-02[Mobile/T-2], 2310060-01[Mobile/T-1]

L1 LCS and/or LCSD Recovery Limit exceeded.

Carbazole

3J05002-BS1, 3J05002-BSD1

pH-SM 4500-H+B-2011

Qualifiers:

HT-02 At the time of receipt, this sample had already exceeded the recommended holding time.

pH

2310060-01[Mobile/T-1], 2310060-02[Mobile/T-2], 3J09041-DUP1, 3J09041-DUP2

RE: Mobile Quarterly Wells New Permit

Enclosed are Micro-Methods Laboratory, Inc. results of analyses performed on samples received 10/05/2023 14:50. If you have any questions concerning this report, please feel free to contact the office.

Sincerely

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

SIM PAH Analysis by GC/MS-EPA 8270D

Qualifiers:

B-01 Target found in blank; laboratory contamination.

2-Methylnaphthalene, Phenanthrene

3J09038-BLK1

B-10 The analyte value in the BLK or CCB is >=1/2xMRL but <MRL.

Acenaphthene, Fluoranthene, Fluorene

3J09038-BLK1

CC-01 CCV outside acceptance limits. Sample results reported from this calibration were below the reporting limits.

2,4,6-Tribromophenol, 2,4-Dinitrophenol, 2-Fluorophenol, Dibenz (a,h) anthracene, Indeno (1,2,3-cd) pyrene

3J09039-DUP1, 2310145-01[Mobile/RC-2], 3J10031-BLK1, 3J10031-DUP1

CC-03 CCV outside acceptance limits. QC Results reported from this calibration within acceptance limits.

2,4,6-Tribromophenol, 2,4-Dinitrophenol, 2-Fluorophenol, Dibenz (a,h) anthracene, Indeno (1,2,3-cd) pyrene

2310145-01[Mobile/RC-2], 2310145-03[Mobile/E-1], 2310145-04[Mobile/ RW-4], 2310145-05[Mobile/RW-5], 3J09039-BLK1, 3J09039-BS1, 3J09039-BSD1, 3J10031-BLK1, 3J10031-BS1, 3J10031-DUP1, 3J10031-BSD1

CC-04 CCV outside acceptance limits. Results reported are estimated values.

2,4,6-Tribromophenol

3J10031-BSD1

DL-6 Dilution required. Lowest achievable MRL due to matrix interterence.

2,4,6-Trichlorophenol, 2,4-Dimethylphenol, 2,4-Dinitrophenol, 2-Methylphenol, 3 & 4-Methylphenol, 4-Chloro-3-methylphenol, Bis(2-ethylhexyl)phthalate, Dibenz (a,h) anthracene, Di-n-octyl phthalate, Pentachlorophenol

3J09039-DUP1

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

Acenaphthylene, Dibenz (a,h) anthracene, Phenanthrene

2310145-02[Mobile/RC-3], 2310145-01[Mobile/RC-2]

L1 LCS and/or LCSD Recovery Limit exceeded.

Phenanthrene

3J09038-BS1, 3J09038-BSD1

L2 LCS and/or LCSD Recovery below acceptance limit.

1-Methylnaphthalene, 2,4-Dimethylphenol, 2-Methylnaphthalene, 2-Methylphenol, 4-Chloro-3-methylphenol, Acenaphthene, Acenaphthylene, Dibenzofuran, Fluorene, Naphthalene

Semivolatile Organic Compounds by GC/MS-EPA 8270D

Qualifiers:

3J09039-BS1

L3 LCS/LCSD Precision Limit exceeded.

1-Methylnaphthalene, 2,4,6-Trichlorophenol, 2,4-Dimethylphenol, 2-Methylnaphthalene, 2-Methylphenol, 3 & 4-Methylphenol, Acenaphthene, Acenaphthylene, Dibenzofuran, Fluorene, Naphthalene, Phenanthrene

3J09039-BSD1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

2,4-Dimethylphenol, 2-Methylnaphthalene, 3 & 4-Methylphenol, Dibenz (a,h) anthracene, Naphthalene, Pentachlorophenol

3J09039-DUP1, 3J10031-DUP1

SR01 The surrogate recovery for this sample is not available either due to matrix interference or due to sample dilution required for high analyte concentration/matrix interferences.

2,4,6-Tribromophenol, 2-Fluorobiphenyl, 2-Fluorophenol, Nitrobenzene-d5, Phenol-d5, Terphenyl-dl4

3J09039-DUP1

SR06 Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.

Nitrobenzene-d5

2310145-04[Mobile/RW-4]

pH-SM 4500-H+B-2011

Qualifiers:

HT-02 At the time of receipt, this sample had already exceeded the recommended holding time.

pH

RE: Mobile Quarterly Wells New Permit

Enclosed is the revised report for samples received by the laboratory on 03/24/2022 08:00. This report supercedes any previous version of the above noted work order. If you have any questions concerning this report, please feel free to contact the office.

Sincerely,

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

REVISED REPORT-SCH 12/20/2022:
Results for EPA 8270 reported to the MDL. Results between the MDL and MRL flagged as a "J" value. False positives above the MDL but below the MRL removed from reporting. Revised report issued. 8270D

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Total Metals-EPA 200.8 Rev 5.4

Qualifiers:

IS-05 The internal standard(s) was below the acceptable criteria range. QC results within acceptable limits.

Chromium [He]
2C28024-MS1

Semi-Volatile Compounds-EPA 8270D

Qualifiers:

CC-03 CCV exceeds acceptance limits. QC Results reported from this calibration within acceptance limits.

2,4-Dinitrophenol
2C24009-MSD1

L1 LCS and/or LCSD Recovery Limit exceeded.

Pentachlorophenol
2C30032-BS1

L2 LCS and/or LCSD Recovery below acceptance limit.

Benzo (b) fluoranthene
2C24009-BS1

M3 MS/MSD Precision Limit exceeded.

2,4-Dinitrophenol, 3 & 4-Methylphenol
2C24009-MSD1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

Acenaphthene, Acenaphthylene, Anthracene, Benzo (a) anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Chrysene, Dibenz (a,h) anthracene, Fluoranthene, Fluorene, Indeno (1,2,3-cd) pyrene, Naphthalene, Phenanthrene, Pyrene
2C24009-MS1, 2C30033-MS1, 2C24009-MSD1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

2-Methylnaphthalene, Acenaphthene, Benzo (a) anthracene, Bis(2-ethylhexyl)phthalate, Naphthalene, Phenanthrene
2C30033-DUP1, 2C30032-DUP1

SR06 Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

SIM PAH Analysis by GC/MS-EPA 8270D

Qualifiers:

2-Fluorobiphenyl, Terphenyl-dl4

2203449-01[Mobile/RW-2], 2C30033-BSD1

Ammonia as N-Lachat 10-107-06-1-I

Qualifiers:

RPD04 The RPD between the sample and sample duplicate exceeded the acceptance limits.

Ammonia as N

2C25009-DUP1

pH-SM 4500-H+B-2011

Qualifiers:

HT-02 At the time of receipt, this sample had already exceeded the recommended holding time.

pH

2203449-01[Mobile/RW-2], 2203449-02[Mobile/RC-1], 2203449-03[Mobile/RC-1A], 2C24014-DUP1, 2C24014-DUP2

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

RE: Mobile Quarterly Wells New Permit

Enclosed is the revised report for samples received by the laboratory on 03/29/2022 08:12. This report supercedes any previous version of the above noted work order. If you have any questions concerning this report, please feel free to contact the office.

Sincerely,

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

Project: Mobile Quarterly Wells New Permit
Project Number: 1st Quarter
Project Manager: Ethan Allen

Reported:
12/20/2022 11:55

Cooler ID: client cooler #2

Receipt Temperature: -0.2 °C

Cooler Custody Seals Present	No	*Received on Ice but Not Frozen*	Yes
Containers Intact	Yes	*No Ice, Short Trip*	No
COC/Labels Agree	Yes	*Obvious Contamination*	No
Labels Complete	Yes	*Rush to meet HT*	No
COC Complete	Yes	*Received within HT*	Yes
Volatile Vial Headspace >6mm	No	*Proper Containers for Analysis*	Yes
Field Sheet/Instructions Included	No	*Correct Preservation*	Yes
Samples Rejected/Documented in Log	No	*Adequate Sample for Analysis*	Yes
Temp Taken From Temp Blank	Yes	*Sample Custody Seals Present*	No
Temp Taken From Sample Container	No	*Samples Missing from COC/Cooler*	No
Temp Taken From Cooler	No		
COC meets acceptance criteria	Yes		

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

REVISED REPORT-SCH 12/20/2022:
Results for EPA 8270 reported to the MDL. Results between the MDL and MRL flagged as a "J" value. False positives abvoe the MDL but below the MRL removed from reporting. Revised report issued. 8270D

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Total Metals-EPA 200.8 Rev 5.4

Qualifiers:

DL-5 Dilution performed due to matrix interference

Chromium [He]
2203513-04[Mobile/RW-1]

Semi-Volatile Compounds-EPA 8270D

Qualifiers:

CC-01 CCV exceeds acceptance limits. Sample results reported from this calibration were below the reporting limits.

Pyrene
2D04026-BLK1, 2D04026-DUP1

CC-03 CCV exceeds acceptance limits. QC Results reported from this calibration within acceptance limits.

Pyrene
2D04026-BS1, 2D04026-BSD1

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

2-Methylnaphthalene, Acenaphthene, Benzo (a) anthracene, Carbazole, Chrysene, Dibenz (a,h) anthracene, Indeno (1,2,3-cd) pyrene
2203513-02[Mobile/T-2], 2C30032-DUP1, 2203513-01[Mobile/GC-Sump], 2C30033-DUP1

L1 LCS and/or LCSD Recovery Limit exceeded.

Pentachlorophenol
2C30032-BS1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

Acenaphthene, Acenaphthylene, Anthracene, Benzo (a) anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Chrysene, Dibenz (a,h) anthracene, Fluoranthene, Fluorene, Indeno (1,2,3-cd) pyrene, Naphthalene, Phenanthrene, Pyrene
2C30033-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

2-Methylnaphthalene, Acenaphthene, Benzo (a) anthracene, Bis(2-ethylhexyl)phthalate, Naphthalene, Phenanthrene
2C30033-DUP1, 2C30032-DUP1

SR05 Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Semi-Volatile Compounds-EPA 8270D

Qualifiers:

2,4,6-Tribromophenol

2D04026-DUP1

SR06 Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.

Terphenyl-dl4

2C30033-BSD1

Ammonia as N-Lachat 10-107-06-1-I

Qualifiers:

M3 MS/MSD Precision Limit exceeded.

Ammonia as N

2C29033-MSD1

M8 Target recovery is outside of established control limits due to matrix interference.

Ammonia as N

2C29033-MS1, 2C29033-MSD1

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Report Definitions

TNC	Too Numerous To Count
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the minimum reporting limit
NR	Not Reported
RPD	Relative Percent Difference
ICV	Initial Calibration Verfiication
CCV	Continuing Calibration Verification Standard
SSV	Secondary Source Verfication Standard
LCS	Lab Control Spike - Lab matrix prepared with known concentration of analyte/s of interest analyzed by method.
MS	Matrix Spike - Sample prepared with known concentration of analyte/s of interest analyzed by method.
MSD	Matrix Spike Duplicate - Duplicate sample prepared with known concentration of anlayte/s of interest analyzed by method.
MRL	Minimum Reporting Limit
%REC	Percentage Recovery of known concentration added to matrix
Batch	Group of samples prepared for analysis not to exceed 20 samples.
Matrix	Material containing analyte/s of interest
Surrogate	Analyte added to sample to determine extraction efficiency of method.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Revised Report

December 20, 2022

Ethan Allen

Work Order # : 2203540

Purchase Order #: MO Qrtly Wells

Cavenham Forest Ind./EMS
PO Box 15369
Hattiesburg, MS 39404-5369

RE: Mobile Quarterly Wells New Permit

Enclosed is the revised report for samples received by the laboratory on 03/30/2022 08:15. This report supercedes any previous version of the above noted work order. If you have any questions concerning this report, please feel free to contact the office.

Sincerely,

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

REVISED REPORT-SCH 12/20/2022:
Results for EPA 8270 reported to the MDL. Results between the MDL and MRL flagged as a "J" value. False positives abvoe the MDL but below the MRL removed from reporting. Revised report issued. 8270D

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Total Metals-EPA 200.8 Rev 5.4

Qualifiers:

DL-5 Dilution performed due to matrix interference

Chromium [He]
2203540-03[Mobile/RC-2]

Semi-Volatile Compounds-EPA 8270D

Qualifiers:

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

2-Methylphenol, 3 & 4-Methylphenol, Acenaphthene, Acenaphthylene, Anthracene, Benzo (a) anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Bis(2-ethylhexyl)phthalate, Chrysene, Dibenz (a,h) anthracene, Di-n-octyl phthalate, Fluoranthene, Fluorene, Indeno (1,2,3-cd) pyrene, Naphthalene, Phenanthrene, Pyrene
2203540-05[Mobile/RW-6], 2203540-01[Mobile/T-1], 2203540-03[Mobile/RC-2], 2D06008-BLK1

L1 LCS and/or LCSD Recovery Limit exceeded.

4-Chloro-3-methylphenol, Carbazole, Di-n-octyl phthalate
2D06009-BSD1

L2 LCS and/or LCSD Recovery below acceptance limit.

2,4-Dinitrophenol
2D06009-BSD1

L3 LCS/LCSD Precision Limit exceeded.

2,4-Dinitrophenol, Pentachlorophenol
2D06008-BSD1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

2-Methylnaphthalene, Acenaphthene, Anthracene, Benzo (a) anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Carbazole, Chrysene, Dibenzofuran, Fluoranthene, Fluorene, Indeno (1,2,3-cd) pyrene, Naphthalene, Phenanthrene, Pyrene
2D06008-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

1-Methylnaphthalene, 2-Methylnaphthalene, Carbazole
2D06009-DUP1

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

RE: Mobile Quarterly Wells New Permit

Enclosed is the revised report for samples received by the laboratory on 04/04/2022 09:05. This report supercedes any previous version of the above noted work order. If you have any questions concerning this report, please feel free to contact the office.

Sincerely,

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

REVISED REPORT-SCH 12/20/2022:
Results for EPA 8270 reported to the MDL. Results between the MDL and MRL flagged as a "J" value. False positives abvoe the MDL but below the MRL removed from reporting. Revised report issued. 8270D

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

SIM PAH Analysis by GC/MS-EPA 8270D

Qualifiers:

CC-01 CCV exceeds acceptance limits. Sample results reported from this calibration were below the reporting limits.

2-Methylnaphthalene, Benzo (a) anthracene

2204028-01[Mobile/UG-2], 2204028-02[Mobile/RW-5], 2204028-03[Mobile/RW-4], 2204028-04[Mobile/B-25], 2204028-05[Mobile/B-36], 2204028-06[Mobile/E-2], 2D08008-BLK1

L1 LCS and/or LCSD Recovery Limit exceeded.

Phenanthrene

2D08008-BS1

M2 MS/MSD Recovery below acceptable limit.

Dibenz (a,h) anthracene

2D08008-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

Naphthalene, Phenanthrene

2D08008-DUP1

SR06 Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.

Nitrobenzene-d5

2204028-04[Mobile/B-25], 2D08003-BS1

SR16 The surrogate recovery for this sample is outside of established control limits.

2-Fluorobiphenyl, Nitrobenzene-d5, Terphenyl-dl4

2D08008-MS1

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

RE: Mobile Quarterly Wells New Permit

Enclosed is the revised report for samples received by the laboratory on 04/05/2022 08:01. This report supercedes any previous version of the above noted work order. If you have any questions concerning this report, please feel free to contact the office.

Sincerely,

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

REVISED REPORT-SCH 12/20/2022:
Results for EPA 8270 reported to the MDL. Results between the MDL and MRL flagged as a "J" value. False positives abvoe the MDL but below the MRL removed from reporting. Revised report issued. 8270D

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

SIM PAH Analysis by GC/MS-EPA 8270D

Qualifiers:

CC-01 CCV exceeds acceptance limits. Sample results reported from this calibration were below the reporting limits.

2-Methylnaphthalene, Benzo (a) anthracene

2D08008-BLK1

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

2-Methylnaphthalene, Acenaphthylene, Anthracene, Bis(2-ethylhexyl)phthalate, Carbazole, Dibenzofuran, Fluoranthene, Fluorene, Phenanthrene, Pyrene

2D11025-DUP1, 2204055-01[Mobile/RW-11], 2204055-02[Mobile/RW-12], 2204055-04[Mobile/RW-7], 2204055-05[Mobile/RW-8A]

L1 LCS and/or LCSD Recovery Limit exceeded.

Phenanthrene

2D08008-BS1

M2 MS/MSD Recovery below acceptable limit.

2-Methylphenol, 4-Chloro-3-methylphenol, Dibenz (a,h) anthracene

2D11025-MS1, 2D08008-MS1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

Fluorene

2D11025-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

Fluorene, Naphthalene, Phenanthrene

2D11025-DUP1, 2D08008-DUP1

SR05 Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.

2,4,6-Tribromophenol

2D11025-BSD1

SR06 Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.

Nitrobenzene-d5

2D08003-BS1

SR16 The surrogate recovery for this sample is outside of established control limits.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

RE: Mobile Quarterly Wells New Permit

Enclosed is the revised report for samples received by the laboratory on 04/06/2022 08:05. This report supercedes any previous version of the above noted work order. If you have any questions concerning this report, please feel free to contact the office.

Sincerely,

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

REVISED REPORT-SCH 12/20/2022:
Results for EPA 8270 reported to the MDL. Results between the MDL and MRL flagged as a "J" value. False positives abvoe the MDL but below the MRL removed from reporting. Revised report issued. 8270D

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Semivolatile Organic Compounds by GC/MS-EPA 8270D

Qualifiers:

CC-01 CCV exceeds acceptance limits. Sample results reported from this calibration were below the reporting limits.

2,4-Dinitrophenol

2204093-01[Mobile/B-97], 2204093-02[Mobile/B-65], 2204093-03[Mobile/B-60A], 2204093-06[Mobile/B-24], 2204093-07[Mobile/B-128], 2D12035-BLK1, 2D12035-DUP1

CC-03 CCV exceeds acceptance limits. QC Results reported from this calibration within acceptance limits.

2,4-Dinitrophenol

2D12035-BS1, 2D12035-BSD1, 2D12035-MS1

CC-04 CCV exceeds acceptance limits. Results reported are estimated values.

2-Fluorobiphenyl

2D12036-BS1

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

2,4-Dimethylphenol, 2-Methylnaphthalene, Anthracene, Dibenzofuran, Fluoranthene, Phenanthrene, Pyrene

2204093-05[Mobile/RC-3A], 2204093-04[Mobile/RC-2A], 2D11025-DUP1

L1 LCS and/or LCSD Recovery Limit exceeded.

Fluoranthene

2D12036-BSD1

L2 LCS and/or LCSD Recovery below acceptance limit.

Benzo (k) fluoranthene

2D12036-BS1

L3 LCS/LCSD Precision Limit exceeded.

Benzo (k) fluoranthene, Fluoranthene, Pyrene

2D12036-BSD1

M2 MS/MSD Recovery below acceptable limit.

2-Methylphenol, 4-Chloro-3-methylphenol, Dibenz (a,h) anthracene

2D11025-MS1, 2D12036-MS1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

Fluorene

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Semi-Volatile Compounds-EPA 8270D

Qualifiers:

2D11025-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

Fluorene

2D11025-DUP1

SR05 Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.

2,4,6-Tribromophenol

2D11025-BSD1

SR06 Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.

2-Fluorobiphenyl, Nitrobenzene-d5

2204093-01[Mobile/B-97], 2204093-02[Mobile/B-65], 2204093-03[Mobile/B-60A], 2204093-06[Mobile/B-24], 2204093-07[Mobile/B-128], 2D12036-BSD1, 2D12036-MS1, 2D12035-BSD1

Ammonia as N-Lachat 10-107-06-1-I

Qualifiers:

M2 MS/MSD Recovery below acceptable limit.

Analyte & Samples(s) Qualified:

2D12049-MSD1

Anions-SM 4110B 2011

Qualifiers:

E-11 The concentration indicated for this analyte is an estimated value above the calibration range of the instrument.

Chloride

2D06025-MS1, 2D06025-MSD1

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

REVISED REPORT-SCH 12/20/2022:
Results for EPA 8270 reported to the MDL. Results between the MDL and MRL flagged as a "J" value. False positives abvoe the MDL but below the MRL removed from reporting. Revised report issued. 8270D

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

SIM PAH Analysis by GC/MS-EPA 8270D

Qualifiers:

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

Acenaphthene
2204164-03[Mobile/B-101]

M2 MS/MSD Recovery below acceptable limit.

Dibenz (a,h) anthracene
2D13031-MS1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

Acenaphthene, Fluoranthene
2D13029-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

Acenaphthene, Acenaphthylene, Anthracene, Benzo (a) anthracene, Benzo (a) pyrene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Bis(2-ethylhexyl)phthalate, Chrysene, Dibenzofuran, Fluoranthene, Naphthalene, Phenanthrene
2D13031-DUP1, 2D13029-DUP1

SR01 The surrogate recovery for this sample is not available either due to matrix interference or due to sample dilution required for high analyte concentration/matrix interferences.

2-Fluorobiphenyl
2204164-01[Mobile/E-1]

SR06 Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.

Terphenyl-dl4
2204164-01[Mobile/E-1]

SR16 The surrogate recovery for this sample is outside of established control limits.

2-Fluorobiphenyl, Phenol-d5, Terphenyl-dl4
2D13029-BLK1

Anions-SM 4110B 2011

Qualifiers:

E-11 The concentration indicated for this analyte is an estimated value above the calibration range of the instrument.

Chloride

2D11032-MS1, 2D11032-MSD1

HT-06 The original analysis of this sample yielded QC recoveries outside acceptance criteria. It was re-analyzed after the recommended maximum hold time for confirmation of reported results.

Nitrate as N

2204164-01[Mobile/E-1]

M2 MS/MSD Recovery below acceptable limit.

Nitrate as N

2D11032-MSD1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

Chloride

2D11032-MS1, 2D11032-MSD1

pH-SM 4500-H+B-2011

Qualifiers:

HT-02 At the time of receipt, this sample had already exceeded the recommended holding time.

RE: Mobile Quarterly Wells New Permit

Enclosed is the revised report for samples received by the laboratory on 09/20/2022 08:16. This report supercedes any previous version of the above noted work order. If you have any questions concerning this report, please feel free to contact the office.

Sincerely,

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

REVISED REPORT-SCH 12/20/2022:
Results for EPA 8270 reported to the MDL. Results between the MDL and MRL flagged as a "J" value. False positives abvoe the MDL but below the MRL removed from reporting. Revised report issued. 8270D

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Chloride-ASTM D 512-12

Qualifiers:

L1 LCS and/or LCSD Recovery Limit exceeded.

Chloride

2I30012-BSD1

Semivolatile Organic Compounds by GC/MS-EPA 8270D

Qualifiers:

CC-01 CCV exceeds acceptance limits. Sample results reported from this calibration were below the reporting limits.

2,4-Dinitrophenol, 2-Methylnaphthalene, 3 & 4-Methylphenol, Benzo (k) fluoranthene, Bis(2-ethylhexyl)phthalate, Di-n-octyl phthalate

2209286-01[Mobile/RW-2], 2209286-02[Mobile/RW-1], 2209286-05[Mobile/RW-4], 2I22006-BLK1, 2I22006-DUP1, 2I21035-BLK1, 2209286-04[Mobile/RC-2A], 2I23001-DUP1

CC-03 CCV exceeds acceptance limits. QC Results reported from this calibration within acceptance limits.

2,4-Dinitrophenol, 2-Methylnaphthalene, Phenanthrene

2I22006-BS1, 2I22006-BSD1, 2I22006-MS1, 2I21035-BS1, 2I21035-BSD1

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

2-Methylnaphthalene, 2-Methylphenol, Anthracene, Benzo (a) anthracene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Carbazole, Chrysene, Dibenzofuran, Fluoranthene, Indeno (1,2,3-cd) pyrene, Naphthalene, Phenanthrene, Pyrene

2209286-04[Mobile/RC-2A], 2209286-01[Mobile/RW-2], 2I22006-DUP1, 2209286-03[Mobile/RC-3A], 2I21035-DUP1

L1 LCS and/or LCSD Recovery Limit exceeded.

Di-n-octyl phthalate, Pentachlorophenol

2I22006-BSD1, 2I22006-BS1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

Acenaphthene, Fluorene

2I22006-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

Acenaphthene, Acenaphthylene, Anthracene, Benzo (a) anthracene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Chrysene, Fluoranthene, Fluorene, Indeno (1,2,3-cd) pyrene, Phenanthrene, Pyrene

2I21035-DUP1, 2I22006-DUP1

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

SIM PAH Analysis by GC/MS-EPA 8270D

Qualifiers:

SR01 The surrogate recovery for this sample is not available either due to matrix interference or due to sample dilution required for high analyte concentration/matrix interferences.

2-Fluorobiphenyl, Nitrobenzene-d5, Terphenyl-dl4

2209286-02[Mobile/RW-1], 2I21035-DUP1

SR05 Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.

Phenol-d5

2I23001-DUP1

SR06 Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.

Nitrobenzene-d5, Terphenyl-dl4

2209286-05[Mobile/RW-4], 2I21035-BLK1, 2209286-02[Mobile/RW-1]

SR17 Surrogate CCV check above acceptance limits. Actual surrogate recovery on the CCV is within acceptance limits.

Terphenyl-dl4

2I23001-DUP1

pH-SM 4500-H+B-2011

Qualifiers:

HT-02 At the time of receipt, this sample had already exceeded the recommended holding time.

Analyte & Samples(s) Qualified:

2209286-01[Mobile/RW-2], 2209286-02[Mobile/RW-1], 2209286-03[Mobile/RC-3A], 2209286-04[Mobile/RC-2A], 2209286-05[Mobile/ RW-4], 2I27028-DUP1, 2I27028-DUP2

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Report Definitions

TNC	Too Numerous To Count
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the minimum reporting limit
NR	Not Reported
RPD	Relative Percent Difference
ICV	Initial Calibration Verfiication
CCV	Continuing Calibration Verification Standard
SSV	Secondary Source Verfication Standard
LCS	Lab Control Spike - Lab matrix prepared with known concentration of analyte/s of interest analyzed by method.
MS	Matrix Spike - Sample prepared with known concentration of analyte/s of interest analyzed by method.
MSD	Matrix Spike Duplicate - Duplicate sample prepared with known concentration of anlayte/s of interest analyzed by method.
MRL	Minimum Reporting Limit
%REC	Percentage Recovery of known concentration added to matrix
Batch	Group of samples prepared for analysis not to exceed 20 samples.
Matrix	Material containing analyte/s of interest
Surrogate	Analyte added to sample to determine extraction efficiency of method.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

RE: Mobile Quarterly Wells New Permit

Enclosed is the revised report for samples received by the laboratory on 09/21/2022 08:07. This report supercedes any previous version of the above noted work order. If you have any questions concerning this report, please feel free to contact the office.

Sincerely,

Mitch Spicer

Lab Director
Micro-Methods Laboratory, Inc.

DISCLAIMER

The results only relate to the items or the sample and/or samples received by the laboratory. This report shall not be reproduced except in full, without the approval of the laboratory. All NELAP certified test methods performed meet the requirements of NELAC 2009 Standards. Any variances and/or deviations specific to this analytical report are referenced in the lab report using qualifiers and detailed explanations found in the case narrative.

CASE NARRATIVE SUMMARY

All reported results are within Micro-Methods Laboratory, Inc.defined laboratory quality control objectives unless detailed in narrative summary or identified as qualifications. NOTE: All results listed on this report are calculated on a wet weight basis (as received by the laboratory) unless otherwise noted in the analysis qualification sections.

Summary Comments:

REVISED REPORT-SCH 12/20/2022:
Results for EPA 8270 reported to the MDL. Results between the MDL and MRL flagged as a "J" value. False positives abvoe the MDL but below the MRL removed from reporting. Revised report issued. 8270D

Volatile Technician Comments - BSF:
Sample(s) analyzed with zero headspace. 8260D-5030B
pH of sample(s) is less than two in preserved vials. 8260D-5030B

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Chloride-ASTM D 512-12

Qualifiers:

L1 LCS and/or LCSD Recovery Limit exceeded.

Chloride

2I30012-BSD1

Semivolatile Organic Compounds by GC/MS-EPA 8270D

Qualifiers:

CC-01 CCV exceeds acceptance limits. Sample results reported from this calibration were below the reporting limits.

2,4-Dinitrophenol, 2-Methylnaphthalene, Benzo (k) fluoranthene, Di-n-octyl phthalate

2I22006-BLK1, 2I22006-DUP1, 2I21035-BLK1, 2I23001-DUP1

CC-03 CCV exceeds acceptance limits. QC Results reported from this calibration within acceptance limits.

2,4-Dinitrophenol, 2-Methylnaphthalene, Phenanthrene

2I22006-BS1, 2I22006-BSD1, 2I22006-MS1, 2I21035-BS1, 2I21035-BSD1

J Detected above the MDL but below the MRL; therefore, result is an estimated concentration (CLP J-Flag).

2,4-Dimethylphenol, 2-Methylphenol, 3 & 4-Methylphenol, Acenaphthylene, Anthracene, Benzo (a) anthracene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Chrysene, Indeno (1,2,3-cd) pyrene, Phenanthrene, Pyrene

2209328-02[Mobile/RC-1A], 2209328-01[Mobile/RC-1], 2I22006-DUP1, 2I21035-DUP1

L1 LCS and/or LCSD Recovery Limit exceeded.

Di-n-octyl phthalate, Pentachlorophenol

2I22006-BSD1, 2I22006-BS1

M5 Spike amounts should be in the range of 1 to 5 times the background level when a sample contains the target parameter in order to effectively evaluate spike recoveries. Batch acceptance is based on LCS/LCSD recoveries.

Acenaphthene, Fluorene

2I22006-MS1

P3 Sample/Sample Duplicate RPD exceeded acceptance criteria.

Acenaphthene, Acenaphthylene, Anthracene, Benzo (a) anthracene, Benzo (b) fluoranthene, Benzo (k) fluoranthene, Chrysene, Fluoranthene, Fluorene, Indeno (1,2,3-cd) pyrene, Phenanthrene, Pyrene

2I21035-DUP1, 2I22006-DUP1

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

SIM PAH Analysis by GC/MS-EPA 8270D

Qualifiers:

SR01 The surrogate recovery for this sample is not available either due to matrix interference or due to sample dilution required for high analyte concentration/matrix interferences.

2-Fluorobiphenyl

2I21035-DUP1

SR05 Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.

Phenol-d5

2I23001-DUP1

SR06 Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.

Nitrobenzene-d5

2I21035-BLK1

SR17 Surrogate CCV check above acceptance limits. Actual surrogate recovery on the CCV is within acceptance limits.

Terphenyl-dl4

2209328-01[Mobile/RC-1], 2209328-02[Mobile/RC-1A], 2I23001-DUP1

Ammonia as N-Lachat 10-107-06-1-I

Qualifiers:

M2 MS/MSD Recovery below acceptable limit.

Analyte & Samples(s) Qualified:

2I28033-MS1, 2I28033-MSD1

pH-SM 4500-H+B-2011

Qualifiers:

HT-02 At the time of receipt, this sample had already exceeded the recommended holding time.

Analyte & Samples(s) Qualified:

2209328-01[Mobile/RC-1], 2209328-02[Mobile/RC-1A], 2209328-03[Mobile/RW-5], 2I27028-DUP1, 2I27028-DUP2

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.
